*Witches, Westerners, and HIV* Alexander Rödlach, 2016-09-17 A witch s curse an imperialist conspiracy a racist plot HIV AIDS is a catastrophic health crisis with complex cultural dimensions From small villages to the international system explanations of where it comes from who gets it and who dies are tied to political agendas religious beliefs and the psychology of devastating grief Frequently these explanations conflict with science and clash with prevention and treatment programs In *Witches Westerners and HIV* Alexander Rödlach draws on a decade of research and work in Zimbabwe to compare beliefs about witchcraft and conspiracy theories surrounding HIV AIDS in Africa He shows how both types of beliefs are part of a process of blaming others for AIDS a process that occurs around the globe but takes on local culturally specific forms He also demonstrates the impact of these beliefs on public health and advocacy programs arguing that cultural misunderstandings contribute to the failure of many well intentioned efforts This insightful book provides a cultural perspective essential for everyone interested in AIDS and cross cultural health issues

**Final Days** Susan Orpett Long, 2005-07-31 In postindustrial societies people must consciously define their individuality through the choices they make Recently death has become yet another realm of personal choice making a good death one in which we die in our own way Does culture matter in these decisions *Final Days* represents a new perspective on end of life decision making arguing that culture does make a difference but not as a checklist of customs or as the source of a moral code Grounded in rich ethnographic data the book offers a superb examination of how policy and meaning frame the choices Japanese make about how to die As an essay in descriptive bioethics it engages an extensive literature in the social sciences and bioethics to examine some of the answers people have constructed to end of life issues Like their counterparts in other postindustrial societies Japanese find no simple way of handling situations such as disclosure of diagnosis discontinuing or withholding treatment organ donation euthanasia and hospice Through interviews and case studies in hospitals and homes Susan Orpett Long offers a window on the ways in which ordinary people respond to serious illness and the process of dying Moving beyond stereotypes of stylized samurai violence

and Buddhist meditation as Japanese cultural models of dying Long offers fresh insights into how experiential and social factors mediate between formal cultural rules and what people do Given the existence of various culturally legitimate scripts on how to die well and the complex nature of human relationships she makes a convincing and original argument that ambivalence need not be viewed as anomalous Indeed ambiguity and a diversity of views are not obstacles to the moral life of a society but rather are the raw material in postindustrial societies from which people construct meaningful deaths and thus meaningful lives
