

AGEING and HEALTH

Between 2000 and 2050, the number of people aged 60 and over is expected to double

In 2050, more than 1 in 5 people will be 60 years or older.

By 2050, 80% of older people will be living in low- and middle-income countries.

► EVERY OLDER PERSON IS DIFFERENT

Some have the level of functioning of a 30 year old.

Some require full time assistance for basic everyday tasks.

Health is crucial to how we experience older age.

Public Health Policy Based on Risk Factors Yun Gao ,Xiao Tan,Xiaohan Tanner Zhang,2024-11-06 Healthy aging is defined as the process of developing and maintaining the functional ability that enables well being in older age As population aging accelerates rapidly worldwide healthy aging has become a major public health challenge However in later life several metabolic diseases such as diabetes and hypertension and their complications cardiovascular and renal diseases et al impose significant barriers to healthy aging These conditions are influenced by various metabolic risk factors such as smoking high calorie diet and obesity Moreover these risk factors can also affect the aging process itself by disrupting the balance of metabolic regulation in the body Therefore understanding the complex interactions between aging and metabolic diseases is

essential for improving public health outcomes in older populations This Research Topic aims to explore the links between metabolic risk factors chronic and metabolic diseases and healthy aging We wish to unveil evidence on how to prevent treat and manage metabolic risk factors and diseases in older adults in order to offer recommendations for future research and policy interventions toward healthy aging and public health *Aging and chronic disease: Public health challenge and education reform* Xiaodong Sun,Xuan Li,Qinghua Li,2023-10-27 Age-related Diseases Through the Lens of Health Economics Lei Si,Mingsheng Chen,Hui Shao,Susmita Chatterjee,2022-01-27 *National Institute of Aging, Hearings Before the Subcommittee on Public Health and Environment ... 92-2, on H.R. 12308, H.R. 3336 (and Identical Bills), H.R. 13875, H.R. 8491 and H.R. 11962 ... Varavikova,2009 Linking classical public health and intervention with evolving healthcare strategies and policies for the 21st century The New Public Health provides a broad perspective on current issues the kinds of solutions expectations needed in the future World Report on Ageing and Health World Health Organization,2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability This will require a transformation of health systems away from disease based curative models and towards the provision of older person centred and integrated care It will require the development sometimes from nothing of comprehensive systems of long term care It will require a coordinated response from many other sectors and multiple levels of government And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations These actions are likely to be a sound investment in society s future A future that gives older people the freedom to live lives that previous generations might never have imagined The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes The report s recommendations are anchored in the evidence comprehensive and forward looking yet eminently practical Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions Topics explored range from strategies to deliver comprehensive and person centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long term care Active and Healthy Aging and Quality of Life: Interventions and Outlook for the Future Yulan Lin,Waqas Sami,Mila Nu Nu Htay,Sudip Bhattacharya,2024-04-15 The continuous growth of older adult

populations as a consequence of demographic changes is a huge challenge To prevent costly and negative impacts effects on the population as a whole it is crucial that societies increase their knowledge of promoting good health among older adults to promote good health and a better quality of life in their later years Active aging is the process of optimizing opportunities for health participation and security in order to enhance quality of life as people age An active and healthy life has remained one of the most important aspirations for all people both young and older adults alike This ambition has become a genuine possibility for many due to a rising life expectancy among people of diverse attributes across the world While celebrating longer life and with more financial security in later life than ever before we need to challenge how these aspirations can be sustained through our own behavioural responses and through public policy institutional reforms and innovations The challenge is to identify recommend and promote strategies and interventions that stimulate and sustain the activity independence and health of people of all ages especially older adults and in the process promote the well being and quality of life of people and make public welfare systems more sustainable
