**Behavioral Case Formulation** Ira D. Turkat, 2013-12-14 One of the most frequent requests I receive from graduate students is for references on how to formulate a complex clinical case Typically after reading the recommended materials the student returns to request more detailed accounts of how clinicians think about particular cases The general lack of such materials in the behavior therapy literature led to the formation of the present volume Throughout much of the behavior therapy literature one gets the impression that most cases seen present circumscribed and straight forward psychological problems In my experience such cases are rare Accordingly the present volume was designed to cover more complex

problems such as sociopathy and paranoid personality. These disorders are rarely discussed in the behavior therapy literature but nonetheless seem to appear regularly in clinical settings. The cases presented in this book are descriptions of patients seen clinically by the editor or by the contributors. Work on this text began while I was a faculty member at Vanderbilt University and took several years to complete. As the contributors would attest, the task I set out for them was atypical and often difficult. The complexities involved in articulating how one conceptualizes a case are numerous and may help to explain why there are so few sources available on case formulation. The fact that our current state of knowledge in psychopathology is rather limited further exacerbates the problem.

Later Life Harold Cox, 2015-11-17 An interdisciplinary introduction to the aging process which uses symbolic interactionism as the main theoretical perspective. Accessible interdisciplinary coverage with chapters covering a variety of subject matter areas from biology to psychology from economics to sociology from political science to religion. Utilizes symbolic interaction perspective to explain behavior problems and an individual's adaptations associated with the process of aging.

*Aging and Male Sexuality* Raul C. Schiavi, 1999-06-17 Awareness of the importance of sexuality and its disorders in the aging population is increasing as the proportion of older people increases. Based in part on the author's clinical experience and research at Mount Sinai Medical Center in New York, this book presents an up-to-date overview of the sexuality of aging men in health and illness within a multidimensional conceptual framework. It takes into account physiological, psychological, interpersonal, and social influences. The book also discusses the impact of medical illness, psychopathology, and drugs with a review of coping strategies in shaping individual sexual responses to aging and disease. The author incorporates many case studies and vignettes and devotes a chapter to the sexuality of older gay men. A balanced account of medical and psychosocial evaluation and treatment concludes the book, which will be of broad interest to clinicians and students interested in sexuality and aging.

**The Social Economics of Health Care** John B Davis, 2001-05-10 For too long now the issue of health care reform has been dominated by the techniques of mainstream economics and the constant application of the tools of cost benefit analysis to an area that does not suit it Issues such as privacy genetic testing and the allocation of organ transplants require a more sensitive approach to the setting of budgets and so a more socially responsible attitude towards health care economics is emerging John Davis has gathered together an impressive range of contributors to explore these phenomena
