## **Agrarian Dreams The Paradox Of Organic Farming In California:**

**Agrarian Dreams** Julie Guthman, 2004-08-04 *Agrarian Dreams* throws a cold shower of reality over the dream of organic agriculture in California demonstrating all that is lost when organic farming goes industrial This is a challenging book and until we can answer the hard questions Julie Guthman poses a genuinely sustainable agriculture will elude us Michael Pollan author of *The Botany of Desire A Plant's Eye View of the World* *Agrarian Dreams* puts organic agriculture in a broad intellectual social and theoretical context in a readable way Nobody has written at this scale and scope about organics The availability of this basic data and interpretation will open discussion to a broad range of citizens scholars and decision makers This is an outstanding work Sally K Fairfax Henry J Vaux Distinguished Professor of Forest Policy University of California Berkeley Guthman takes on the sacred cow of organic agriculture that farmers and consumers can transform our food system simply through by adopting new philosophies of eating farming and nature With an analysis that is at the forefront of agrarian theory today she shows that organic farmers no matter what their philosophy have to work under the economic gun of markets and land prices As a result organic growers in California are forced to become increasingly industrialized unjust and unhealthy Her analysis is proof that it will take more than new kinds of thinking to create sustainability in our food system Melanie DuPuis author of *Nature's Perfect Food How Milk Became America's Drink*

**Agrarian Dreams?** Julie Harriet Guthman, 2000      **India's Organic Farming Revolution** Sapna E.

Thottathil, 2014-10-01 Should you buy organic food Is it just a status symbol or is it really better for us Is it really better for the environment What about organic produce grown thousands of miles from our kitchens or on massive corporately owned farms Is local or small scale better even if it's not organic A lot of consumers who would like to do the right thing for their health and the environment are asking such questions Sapna Thottathil calls on us to rethink the politics of organic food by focusing on what it means for the people who grow and sell it what it means for their health the health of their environment and also their economic and political well being Taking readers to the state of Kerala in southern India she shows us a place where the so called Green Revolution program of hybrid seeds synthetic fertilizers and rising pesticide use had failed to reduce hunger while it caused a cascade of economic medical and environmental problems Farmers burdened with huge debts from buying the new seeds and chemicals were committing suicide in troubling numbers Farm laborers suffered from pesticide poisoning and rising rates of birth defects A sharp fall in biodiversity worried environmental activists and everyone was anxious about declining yields of key export crops like black pepper and coffee In their debates about how to solve these problems farmers environmentalists and policymakers drew on Kerala's history of and continuing commitment to grassroots democracy In 2010 they took the unprecedented step of enacting a policy that requires all Kerala growers to farm organically by 2020 How this policy came to be and its immediate economic political and physical effects on the state's residents offer lessons for everyone interested in agriculture the environment and what to eat for dinner Kerala's example shows that when

done right this kind of agriculture can be good for everyone in our global food system      *Sustainable Agriculture-Beyond Organic Farming* Sean Clark,2018-07-17 This book is a printed edition of the Special Issue Sustainable Agriculture Beyond Organic Farming that was published in Sustainability      Re-Thinking Organic Food and Farming in a Changing World Bernhard Freyer,Jim Bingen,2014-10-17 This book is based on the assumption that organic has lost its way Paradoxically it comes at a time when we witness the continuing of growth in organic food production and markets around the world Yet the book claims that organic has lost sight of its first or fundamental philosophical principles and ontological assumptions The collection offers empirically grounded discussions that address the principles and fundamental assumptions of organic farming and marketing practices The book draws attention to the core principles of organic and offers different clearly articulated and well defined conceptual frameworks that offer new insights into organic practices Divided into five parts the book presents new perspectives on enduring issues examines standards and certification gives insights into much discussed and additional market and consumer issues and reviews the interplay of organic and conventional farming The book concludes with a framework for rethinking ethics in the organic movement and reflections on the positioning of organic ethics      **Sociological Perspectives of Organic Agriculture** Georgina Holt,Matthew Reed,2006 This book takes a fresh look at understanding the dynamics of the organic agricultural sector in Europe Australia South America and the US Many of the authors explore the use of combined methodology drawing on theory from a range of social sciences to demonstrate that the complexity of organic agriculture lies in the close connection between nature society and the economy Likewise whilst the book depicts organic agriculture as an engine of growth for the organic sector it reflects also the important role played by not only producers but also other actors in the supply chain such as consumers and certification standards      **Rent from the Land** Johannes Stahl,2012 Rent from the Land examines the effects of the massive political and economic changes of postsocialism on rural society and environment in Albania Stahl argues that the area s postsocialist transformations led to changes in the creation and distribution of resource rent which shifted land users incentives and productive decision making and ultimately led to environmental change Rent from the Land brings together five years of research on Albanian transformation and breaks new ground by discussing postsocialist transformation from a political ecology perspective      **Wilted** Julie Guthman,2019-08-20 Strawberries are big business in California They are the sixth highest grossing crop in the state which produces 88 percent of the nation s favorite berry Yet the industry is often criticized for its backbreaking labor conditions and dependence on highly toxic soil fumigants used to control fungal pathogens and other soilborne pests In Wilted Julie Guthman tells the story of how the strawberry industry came to rely on soil fumigants and how that reliance reverberated throughout the rest of the fruit s production system The particular conditions of plants soils chemicals climate and laboring bodies that once made strawberry production so lucrative in the Golden State have now changed and become a set of related threats that jeopardize the future of the industry      **Organic Struggle** Brian K. Obach,2015-05-08 Organic

Struggle analyzes the evolution of the sustainable agriculture movement in the United States and evaluates its achievements and shortcomings. It traces the development of organic farming from its roots in the 1940s through its embrace by the 1960s counterculture to its mainstream acceptance and development into a multi billion dollar industry. Fair Trade and Organic Initiatives in Asian Agriculture Rie Makita, Tadasu Tsuruta, 2017-03-16. In addition to constituting an evolving area of inquiry within the social sciences, agricultural certification and particularly its Fair Trade and organic components has emerged as a significant tool for promoting rural development in the global South. This book is unique for two reasons. First, in contrast to existing studies that have tended to examine Fair Trade and organic certification as independent systems, the studies presented in this book reveal their joint application within actual production settings, demonstrating the greater complexity entailed in these double certification systems through the generation of contradictions and tensions compared with single certification systems. Second, the authors, who are both Asian, reveal the realities of applying Fair Trade and organic certification systems within Asian agriculture. In doing so, they challenge the fact that most Fair Trade studies have been undertaken by Western scholars who have tended to focus on Latin American and African producers. Drawing on a wealth of grounded case studies conducted in India, Thailand, and the Philippines, this pioneering study on double certification makes a significant contribution to studies on Fair Trade and organic agriculture beyond Asia. *Organic Agriculture* Acram Taji, John Reganold, 2006-06-20. With global revenue surpassing twenty five billion dollars annually, organic agriculture is a highly visible and rapidly growing component of agricultural production. In *Organic Agriculture: A Global Perspective*, Paul Kristiansen, Acram Taji, and John Reganold, and their international group of contributors, scientifically review key aspects of organic agriculture. At the intersection of research, education, and practice, the contributors look at the organic agricultural movement's successes and limitations. The first half of this book critically evaluates the agricultural production of both plants and livestock in organic farming systems. All major aspects of organic agriculture are explored, including historical background and underlying principles, soil fertility management, crop and animal production, breeding strategies, and crop protection. This global and comprehensive overview also addresses the economic, social, and political aspects of organic farming. These include economics and marketing, standards and certification, environmental impacts, and social responsibility and research, education, and extension. The book is a unique and timely science-based international work documenting current practices in organic agriculture and evaluating their strengths and weaknesses. For more than two decades, research into organic methods by mainstream scientists has generated a large body of information that can now be integrated and used for assessing the actual impacts of organic farming in a wide range of disciplines. The knowledge of selected international experts has been combined in one volume, providing a comprehensive review of organic farming globally. Researchers, teachers, extensionists, students, primary producers, and others around the world who are interested in sustainable agriculture will find this book to be a valuable and reliable resource. **Agroecology in Action** Keith Warner, 2007. Detailed case

studies of agroecological initiatives show how growers scientists agricultural organizations and public agencies can form partnerships to develop innovative ecologically based techniques for reducing reliance on agrochemicals

*Regulatory Issues in Organic Food Safety in the Asia Pacific* Bee Chen GOH, Rohan Price, 2020-06-16 The book seeks to address the intersection of food organics and the emergence of a new contractualism between producers distributors and consumers and between nation states Additionally it seeks to cater to the needs of a discerning public concerned about how its own country aims to meet their demands for organic food quality and safety as well as how they will benefit from integration in the standard setting processes increasingly occurring regionally and internationally This edited volume brings together expert scholars and practitioners and draws on their respective insights and experiences in the field of organics food and health safety The book is organized in three parts Part I outlines certain international perspectives Part II reflects upon relevant histories and influences and finally Part III examines the organic food regulatory regime of various jurisdictions in the Asia Pacific

*Agribusiness and Society* Kees Jansen, Sietze Vellema, 2013-07-04 This volume examines how far agribusiness corporations are responding to the opportunities and pressures resulting from emerging environmental awareness In particular in what ways are they changing their R some changed their production practices in a sustainable way while others have complied with or resisted state environmental regulation notably labelling systems and certification Each study explores how institutional cultural economic political and technological contexts shape the strategies of big business Topics include green bananas genetically modified tomatoes and soy the new markets in organic produce health and pesticides and access to justice The book explains why some corporations are successful in introducing environmentally friendly innovations and others are not The key to understanding contrasting outcomes is examining the interaction between internal corporate environments where profit and efficiency considerations predominate and external environments where consumer preferences NGO pressures and government regulation are important The book also explores possible new roles for the public sector The result is a sophisticated and critical analysis of business practices and regulatory systems in the agro food sector

**Taking Food Public** Psyche Williams Forson, Carole Counihan, 2013-09-13 The field of food studies has been growing rapidly over the last thirty years and has exploded since the turn of the millennium Scholars from an array of disciplines have trained fresh theoretical and methodological approaches onto new dimensions of the human relationship to food This anthology capitalizes on this particular cultural moment to bring to the fore recent scholarship that focuses on innovative ways people are recasting food in public spaces to challenge hegemonic practices and meanings Organized into five interrelated sections on food production consumption performance Diasporas and activism articles aim to provide new perspectives on the changing meanings and uses of food in the twenty first century

**Radical Food Geographies** Colleen Hammelman, Charles Z. Levkoe, Kristin Reynolds, 2024-08-20 This collection presents critical and action oriented approaches to addressing food systems inequities across places spaces and scales With case studies from around the globe Radical Food

Geographies explores interconnections between power structures and the social and ecological dynamics that bring food from the land and water to our plates Through themes of scale spatial imaginaries and human and more than human relationships the authors explore ongoing efforts to co construct more equitable and sustainable food systems for all Advancing a radical food geographies praxis the book reveals multiple forms of resistance and resurgence and offers
