Agricultural Reform In China Getting Institutions Right:

Agricultural Reform in China Yiping Huang, 1998-01-13 Chinese agriculture has experienced some radical changes over the past twenty years Following the successful introduction of the household production system in the early 1980s difficulties were encountered in establishing a unified domestic agricultural market in the later 1980s and 1990s Through a comprehensive analysis of the changes in the Chinese agricultural institutions between the late 1970s and the mid 1990s this study attempts to provide some answers to the main questions presently facing the agricultural sector It focuses on the key elements of the pre reform agricultural institutions reviews the ways these institutions were refashioned and assesses the resulting changes in agricultural development The implications of different policy choices are carefully considered with the assistance of a computable general equilibrium model The author argues that China should push forward with its market oriented reform measures and introduce the rigours of international competition into the agricultural sector Proven Successes in Agricultural Development David J. Spielman, Rajul Pandya-Lorch, 2010-01-01 The world has made enormous progress in the past 50 years toward eliminating hunger and malnutrition While in 1960 roughly 30 percent of the world's population suffered from hunger and malnutrition today less than 20 percent does some five billion people now have enough food to live healthy productive lives Agricultural development has contributed significantly to these gains by increasing food supplies reducing food prices and creating new income and employment opportunities for some of the world's poorest people This book examines where why and how past interventions in agricultural development have succeeded It carefully reviews the policies programs and investments in agricultural development that have reduced hunger and poverty across Africa Asia and Latin America over the past half century The 19 successes included here are described in in depth case studies that synthesize the evidence on the intervention's impact on agricultural productivity and food security evaluate the rigor with which the evidence was collected and assess the tradeoffs inherent in each success Together these chapters provide evidence of what works in agricultural development "Crossing the river while feeling the rocks": Incremental land reform and its impact on rural welfare in China John W. Bruce, Zongmin Li, **The World of Agricultural Economics** Carin Martiin, 2013-04-12 This textbook takes a truly international approach towards agricultural economics uniting many different perspectives on the subject and providing insight into agriculture in general and into how practical farming works in particular The book is laced throughout with real world examples and other pedagogical features Topics covered are wide ranging and include world food production and population the food chain and food safety non foods derived from farming land and soil issues arable and animal production and management at farm level The World of Agricultural Economics an introduction is primarily an introductory textbook for students in agricultural economics agronomy and adjacent fields However its accessible approach means that it is also suitable for readers without any previous knowledge in the field who are seeking an introduction to agriculture **WTO Disciplines on Agricultural Support** David Orden, David

Blandford, Tim Josling, 2011-03-31 Farm support is contentious in international negotiations This in depth assessment of the legal compliance and economic evaluation issues raised by the WTO Agreement on Agriculture presents consistent support data and forward looking projections for eight developed and developing countries EU US Japan Norway Brazil China India Philippines using original estimates where official notifications are not available Variations over time in notified support in some cases reflect real policy changes others merely reflect shifts in how countries represent their measures The stalled Doha negotiations presage significantly tighter constraints for developed countries that provide the highest support but loopholes will persist Developing countries face fewer constraints and their trade distorting farm support can rise Pressure points and key remaining issues if a Doha agreement is reached are evaluated Vigilant monitoring for compliance of farm support with WTO commitments will be required to lessen its negative consequences whether or not the Doha Round is concluded

From Rebel to Ruler Tony Saich, 2021-07-06 On the centennial of the founding of the Chinese Communist Party the definitive history of how Mao and his successors overcame incredible odds to gain and keep power Mao Zedong and the twelve other young men who founded the Chinese Communist Party in 1921 could hardly have imagined that less than thirty years later they would be rulers On its hundredth anniversary the party remains in command leading a nation primed for global dominance Tony Saich tells the authoritative comprehensive story of the Chinese Communist Party its rise to power against incredible odds its struggle to consolidate rule and overcome self inflicted disasters and its thriving amid other Communist parties collapse Saich argues that the brutal Japanese invasion in the 1930s actually helped the party As the Communists retreated into the countryside they established themselves as the populist grassroots alternative to the Nationalists gaining the support they would need to triumph in the civil war Once in power however the Communists faced the difficult task of learning how to rule Saich examines the devastating economic consequences of Mao s Great Leap Forward and the political chaos of the Cultural Revolution as well as the party s rebound under Deng Xiaoping s reforms Leninist systems are thought to be rigid yet the Chinese Communist Party has proved adaptable From Rebel to Ruler shows that the party owes its endurance to its flexibility But is it nimble enough to realize Xi Jinping s China Dream Challenges are multiplying as the growing middle class makes new demands on the state and the ideological retreat from communism draws the party further from its revolutionary roots The legacy of the party may be secure but its future is anything but guaranteed

Agricultural Markets Beyond Liberalization Aad van Tilburg, Henk A.J. Moll, A. Kuyvenhoven, 2012-12-06 Agricultural markets have entered a long term process of liberalization with the aim of reducing imposed market imperfections such as monopolistic public trade entry barriers and subsidies The experience of more than a decade of agriculture liberalization offers a good opportunity to review and analyze the outcome of this process and to draw lessons for the future The central topic in *Agricultural Markets Beyond Liberalization* is the relationship between market structure and how markets perform in a dynamic context during a liberalization process The topic is studied from both a micro and macro viewpoint and refers to

different types of agricultural markets This volume brings together the dynamics of agricultural markets in several parts of the world with a special focus on transition economics and Africa The different studies cover geographical areas as wide as a district as well as a group of countries and institutions from individual contracts to multi national organizations The analysis of liberalization under different circumstances and the different methods of analysis used by the authors provide a valuable foundation for the assessment of liberalization

Agricultural Biotechnology in China Valerie J. Karplus,Xing Wang Deng,2007-12-17 Agricultural Biotechnology in China Origins and Prospects is a comprehensive examination of how the origins of biotechnology research agendas along with the effectiveness of the seed delivery system and biosafety oversight help to explain current patterns of crop development and adoption in China Based on firsthand insights from China s laboratories and farms Valerie Karplus and Dr Xing Wang Deng explore the implications of China s investment for the nation s rural development environmental footprint as well as its global scientific and economic competitiveness

China's State Enterprise Reform John Hassard,Jackie Sheehan,Meixiang Zhou,Jane Terpstra-Tong,Jonathan Morris,2007-06-11 Based on extensive original research this book provides a comprehensive overview of the current status of state enterprise reform in China Chinese State Enterprise Reform considers the relationship between public ownership and public enterprises and the historical evolution of China s economic reform programme since 1978 including assessments of the Contrast Responsibility System which operated from the early 1980s to the early 1990s and the Group Company Experiments which began in the 1990s It discusses the relations between workers managers and the state in post Dengist China the implications of the reform programme for human resources management in state enterprises the nature of labour representation and organization under state capitalism and the problems of surplus labour and reemployment

Village China Under Socialism and Reform Huaiyin Li,2009-03-12 Village China Under Socialism and Reform offers a comprehensive account of rural life after the communist revolution detailing villager involvement in political campaigns since the 1950s agricultural production under the collective system family farming and non agricultural economy in the reform and everyday life in the family and community Li s rich examination draws on original documents from local agricultural collectives newly accessible government archives and his own fieldwork in Qin village of Jiangsu province to highlight the continuities in rural transformation Firmly disagreeing with those who claim that recent developments in rural China represent a radical break with pre reform sociopolitical practices and patterns of production Li instead draws a clear history connecting the current situation to ecological social and institutional changes that have persisted from the collective era

From Food Scarcity to Surplus Ashok Gulati,Yuan Zhou,Jikun Huang,Alon Tal,Ritika Juneja,2021-02-07 This book brings together unique experiences of India China and Israel in overcoming economic social and natural resource challenges Through its eleven chapters the book captures the role of groundbreaking innovations in achieving unprecedented agricultural growth and stabilizing these nations It provides a future outlook of the new challenges that will confront these countries in 2030 and

beyond related to tackling food and nutrition security sustainable agricultural growth and adhering to improved food safety standards This book provides useful insights for exploring technological innovations and policies that can address these future challenges and develop profitable and sustainable agriculture This volume also highlights valuable lessons that India China and Israel provide for the rest of the developing world where population is growing fast natural resources are limited and it is a challenge to produce enough food feed and fibre for their populations Tracing the historical past this book is an impressive resource for academicians policymakers practitioners agribusiness players entrepreneurs in understanding the role of innovations in addressing future challenges China's Disappearing Countryside Yongjun Zhao,2016-05-23 While China's hybrid rural land tenure system has contributed to agricultural development it is interwoven with rising farmland loss and social conflicts This book examines the linkages between land tenure development and governance in the context of China's development transformation Drawing on empirical studies it advocates the exploration of innovative land tenure systems that address the wider determinants institutions power politics and social development It argues that a land tenure system can only be sustainable when it is compatible with the overall biophysical social political and economic conditions This new institutional lens into the conditions and dynamics of land tenure systems marks a paradigm shift away from those focusing on the narrow meaning of land rights and tenure security strengthening as these approaches can paradoxically contribute to weaker land and resource governance Contributing to an enhanced understanding of the challenges China faces in agricultural development and natural resource governance and to the international debates on land tenure reform this book will be of interest to researchers practitioners policy makers and students in development studies anthropology sociology political sciences law geography economics public administration and other relevant disciplines The lessons learnt from China also shed light on its global engagement on sustainable development and governance issues Remaking the Chinese State Chao Chien-min,Bruce Dickson,2003-09-02 After more than twenty years of economic and political reform China is a vastly different country to that left by Mao Almost all the characteristic policies and practices of the Maoist era have been abandoned with the goals of revolution in foreign and domestic policy being replaced by an emphasis on economic modernization accompanied by radical social transformation and an increasingly significant international role Yet despite these dramatic changes other fundamental features of China's policy remain unchanged This book explores the strategies of reform in China and their implications for its domestic and foreign policies It challenges the misconceptions that no political reforms are taking place and that China is eagerly embracing capitalism It also challenges the view that China does not abide by international norms and practices on military and security matters Its contributors all highly respected scholars avoid simple generalisations about the nature of China's politics or future path instead offering comparisons and contrasts between policy areas and regions to create a more complete picture of this complex country *Socio-Economic Evaluation of Cropping Systems for Smallholder Farmers - Challenges and Options* Subhasis Mandal,Sendhil Ramadas,Rupak

Goswami,2023-11-23 The FAO estimated that five out of six farms in the world are operating less than two hectares of land suggesting that small holder farmers are producing over one third of the global food The cropping systems practiced by smallholder farmers play a vital role in agri food production systems and help to reduce hunger improve nutrition and provide livelihoods to millions across the developing countries The performance of these cropping systems has a direct impact on achieving the multiple Sustainable Development Goals 2030 of No Poverty SDG 1 Zero Hunger SDG 2 and Good Health and Wellbeing SDG 3 System intensification is now widely recognized as an essential pathway to achieve food and nutrition security in developing countries The numbers of smallholder farmers are rapidly increasing in both developing and underdeveloped countries however they are increasingly facing challenges to run profitably Cropping system intensification CSI could be one of the ways to make such production systems more remunerative for these farmers *Handbook on Inequality in China* Björn Gustafsson,Xiuna Yang,2025-09-10 This comprehensive Handbook addresses a wide range of issues concerning inequality in contemporary China and its recent past It covers diverse forms of inequality faced by Chinese citizens from wage and income disparities to employment education the role of social insurance and public revenues

Making Capitalism in Rural China Michael John Webber,2012-01-01 This stimulating and challenging book explores the duplicitous nature of development in China On the positive side it brings longer and healthier lives fewer children dead before they are five years old more comfort and security from famine and disaster more education more communication more travel less war But from another darker perspective development brings violence to some people those who are in the way of the new things those who cannot adapt to the new ways and it threatens old knowledges habits and societies as it disrupts old power structures Michael Webber presents fascinating case studies that demonstrate what these forms of development mean for people who are relatively weak or powerless those who post colonial theorists call the subalterns The cases illustrate how development can change the manner in which people relate to each other and threatens their entire environment Through this detailed consideration of the impacts of development on the people who live in those places he examines whether these changes represent the emergence of capitalism or a transition develops a theory of relationships between economy and daily life and questions the very nature of Chinese capitalism This multidisciplinary study encompasses the social sciences to provide a coherent view of the forms that development takes in various places within rural China As such it will prove a fascinating and thought provoking read for undergraduates postgraduate students and researchers within economics Asian studies development studies and geography **China's Rural-Urban Inequality in the Countryside** Yan Gao,Shailaja Fennell,2018-03-15 This book approaches the issue of rural urban inequality through fieldwork conducted in a specific township Zuogang in Qinggang County part of Heilongjiang Province in northeastern China Presenting painstaking fieldwork in a single location it successfully illuminates fundamental aspects of the reality and the complexity of rural urban inequality that cannot be found in macro level studies most of which are prepared by economists

The book offers a unique combination of rigorous economic analysis with insightful social and anthropological analysis as well as revealing interviews with local government officials This approach provides a rich tapestry of rural perceptions of rural urban inequality With in depth analysis and empirical evidence on questions concerning the development and root causes of urban rural disparities the book significantly enriches our understanding of the widely discussed issue of rural urban income inequality but from the unique perspective of rural China *China: Shadow WTO Agricultural Domestic Support Notifications* Fuzhi Cheng, *The Third Revolution in the Chinese Countryside* Ross Garnaut, Guo Shutian, Ma Guonan, 1996-04-18 The first revolution in the Chinese countryside was the land reform implemented in the liberated areas and extended throughout China after the proclamation of the People s Republic of China in 1949 This was important in the consolidation of the Communist Party s political power The second revolution was the decollectivization of agriculture and the shift to the household responsibility system as a basis for agricultural production The phenomenal increase in Chinese agricultural output from 1978 to 1984 resulted partly from the new system of production and with a resulting explosion of farm incomes The second revolution in the Chinese countryside from the late 1970s set the scene for the third revolution the freeing of markets for farm products and the linking of domestic markets and international markets The third revolution is still in progress and this book explores its beginnings Initially the book covers the issues of poverty in China and feeding the population The second section describes the agricultural markets in China and the price reform of agricultural products The next two parts discuss international and regional issues of China s agricultural economy Finally there are contributions on what institutional changes have been associated with the third agricultural revolution The contributions are from a team of experts on the Chinese economy from inside and outside China led by Professor Garnaut **Developmental Dilemmas** Peter Ho, 2005-05-24 *Developmental Dilemmas* singles out land as an object of study and places it in the context of one of the world s largest and most populous countries undergoing institutional reform the People s Republic of China The book demonstrates that private property protected by law the principle of getting the prices right and the emergence of effectively functioning markets are the outcome of a given society s historical development and institutional fabric Peter Ho argues that the successful creation of new institutions hinges in part on choice and timing in relation to the particular constellation of societal economic political and cultural parameters Disregarding these could result in rising inequality bad land stewardship and the eruption of land related grievances
