**AgriScience**, 1993 **Transforming Agriculture and Foodways** David Goodman, 2024-09-10 A wave of innovation driven by the convergence of digital and molecular technologies is transforming food production and ways of eating in the US Western Europe and Australasia This book explores a range of contemporary agri food issues such as the digitalisation of farm production aka Precision Agriculture farmer independence gene editing alternative proteins and the rise of app based home food deliveries This is the first book to provide a systemic analysis of technological innovation and its socio economic consequences in modern food systems including the hollowing out of rural communities and pronounced industrial concentration The food system is under growing public pressure to respond to global climate change but this book finds little evidence of transition to sustainable low carbon trajectories Preparing Agriculture and Agriscience Educators for the Classroom Thoron, Andrew C., Barrick, R. Kirby, 2022-06-24 The preparation of school based agriculture teachers has been a part of public education for over 100 years However there is a lack of texts available that address the components of teacher education in agriculture including teacher preparation and related activities Further study that goes beyond concepts to include practice and applications is required in order to further develop educators in this sector Preparing Agriculture and Agriscience Educators for the Classroom provides an up to date consideration of the best practices for developing and enhancing a complete teacher preparation program and highlights and showcases concepts and applications It is a mainstay for teacher education and teacher preparation in agriculture and is applicable anywhere in the world where teaching agriculture exists Covering a range of topics such as field experiences and student learning this reference work is ideal for researchers scholars practitioners academicians administrators instructors and students Titans of Industrial Agriculture Jennifer Clapp, 2025-02-18 How a small handful of giant transnational corporations has come to dominate the farm inputs sector why it matters and what can be done about it Every year hundreds of billions of dollars worth of farm machinery fertilizer seeds and pesticides are sold to farmers around the world Although agricultural inputs are a huge sector of the global economy the lion s share of that market is controlled by a relatively small number of very large transnational corporations The high degree of concentration among these agribusiness titans is striking considering that just a few

hundred years ago agricultural inputs were not even marketed goods In *Titans of Industrial Agriculture* Jennifer Clapp explains how we got from there to here outlining the forces that enabled this extreme concentration of power and the entrenchment of industrial agriculture Clapp reveals that the firms that rose to the top of these sectors benefited from distinct market technology and policy advantages dating back a century or more that enabled them to expand their businesses through mergers and acquisitions that made them even bigger and more powerful These dynamics matter because the firms at the top have long shaped industrial farming practices that in turn have generated enormous social ecological and health impacts on the planet and the future of food systems Beyond analyzing how these problems have arisen and manifested the book examines recent efforts to address corporate power and dominance in food systems and assesses the prospects for change Among the first works to examine deep roots of corporate power in agriculture *Titans of Industrial Agriculture* helps illuminate just how corporate actors have encouraged the lock in of industrial agriculture despite all its known social and ecological costs

*Precision Agriculture Technologies for Food Security and Sustainability* Abd El-Kader, Sherine M., Mohammad El-Basioni, Basma M., 2020-10-16 Precision agriculture integrates new technologies with the agronomic experience to intelligently manage the high spatial variability of all agricultural variables and the time scales at which these variables change The right application of this approach increases the size and quality of the agricultural production saves resources improves environmental quality helps to achieve self sufficiency food security and agricultural sustainability increases exports and more *Precision Agriculture Technologies for Food Security and Sustainability* is an essential reference source that compiles a comprehensive multidisciplinary review of current research in the field of precision agriculture It also discusses cutting edge tools and models that can help facilitate and improve the systems implementation Featuring coverage of a wide range of topics including agronomy public policy and internet of things this book is ideally designed for agriculturalists government officials economists environmentalists academicians researchers students and engineers in the fields of electronics ICT and agriculture

*Agriculture and Aquaculture Applications of Biosensors and Bioelectronics* Khang, Alex, 2024-01-22 In recent years the advent of biosensors and bioelectronics has facilitated the swift and precise detection of

numerous biomolecules or pathogens in animal samples aquatic habitats and plants These technologies have emerged as potent assets for the agriculture and aquaculture industries Many experts have raised the question how might the integration of biosensors into portable devices or automated monitoring systems enable on site and real time detection of diverse biomolecules or pathogens Agriculture and Aquaculture Applications of Biosensors and Bioelectronics presents the recent developments in biological recognition elements transducer materials and signal processing techniques for biosensors and bioelectronics used in agriculture and aquaculture applications Sophisticated biosensors and bioelectronics operate through the immobilization of biological recognition components such as enzymes or antibodies on a transducer surface This immobilization process allows for the targeted recognition and binding of biomolecules or pathogens The resulting electrical optical or chemical changes triggered by the recognition event are quantifiable through various methods and are often enhanced by applications utilizing artificial intelligence AI The necessity for high sensitivity and selectivity the optimization of biocompatibility and stability and the integration of biosensors with AI aided solutions are just some of the challenges and opportunities in developing biosensors for high tech agriculture and aquaculture This book targets a mixed audience of biotechnology engineers biosensors scientists bioelectronics researchers high tech agriculture analysts Ph D scholars researchers academics professionals engineers and students

This is the first book to clarify the relationships between multi functions of urban agriculture creative classes and social business in China and Japan Specifically it constructs a new framework showing how these factors contribute to the sustainability of cities by introducing the mixed methods research of structural equation modeling and the trajectory equifinality model Policy implications drawn from the research suggests that governments should provide opportunities to create a virtuous cycle to improve the accumulation of social capital in order to attract those who think creatively It is widely agreed that a sustainable city should meet the needs of the present generation without sacrificing the ability of future generations to meet their own needs However there has been no completely agreed upon definition for what a sustainable city should be nor upon the paradigm for what components should be included On the other hand there is a possibility that the multi functions of urban agriculture may attract especially those who are thinking creatively These creative thinkers have a high level of social capital pay attention to social issues and are greatly motivated to find solutions through social enterprises such as agriculture related
