Aids The Unnecessary Epidemic:

Media, Culture, and the Religious Right Linda Kintz, Julia Lesage, 1998 As the religious right has increased in both power and visibility there has been a commensurate growth in the prominence of Christian media The contributors to this book provide a broad overview of the organizations history and media influences of the Christian right **The Truth about Homosexuality** John Francis Harvey, 1996-08-21 This book addresses the complex moral and pastoral questions involved in both homosexual orientation and activity including an analysis of lifestyles in accord with the Christian Gospel and those running counter to Christian moral teaching **The Facts on Homosexuality** John Ankerberg, John Weldon, 2011-07-15 Publicity about the homosexual lifestyle has become so commonplace that many people believe its messages that homosexuality is genetic and that being gay is as natural as being heterosexual But are these statements accurate Noted researchers John Ankerberg and John Weldon critique relevant scientific studies examine gay politics to discuss the social ramifications behind the gay movement Is the scientific research on homosexuality accurate How influential is the homosexual community in America How should the church respond to homosexual issues arguments This book will give you the information you need to understand evaluate the homosexual agenda how it relates to biblical truth **AIDS** Gene Antonio, 1992-11 **AIDS** Inge B. Corless, 1989 First published in 1989 Routledge is an imprint of Taylor Francis an informa company *Right-Wing Populism in America* Chip Berlet, Matthew N. Lyons, 2016-05-06 Right wing militias and other antigovernment organizations have received heightened public attention since the Oklahoma City bombing While such groups are often portrayed as marginal extremists the values they espouse have influenced mainstream politics and culture far more than most Americans realize This important volume offers an in depth look at the historical roots and current landscape of right wing populism in the United States Illuminated is the potent combination of anti elitist rhetoric conspiracy theories and ethnic scapegoating that has fueled many political movements from the colonial period to the present day The book examines the Jacksonians the Ku Klux Klan and a host of Cold War nationalist cliques and relates them to the evolution of contemporary electoral campaigns of Patrick Buchanan the militancy of the Posse Comitatus and the Christian Identity movement and an array of millennial sects Combining vivid description and incisive analysis Berlet and Lyons show how large numbers of disaffected Americans have embraced right wing populism in a misguided attempt to challenge power relationships in U S society Highlighted are the dangers these groups pose for the future of our political system and the hope of progressive social change Winner Outstanding Book Award Gustavus Myers Center for the Study of Bigotry and Human Rights in North America , **AIDS Issues: An AIDS update; AIDS and other epidemics; Needle exchange programs** United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Health and the Environment, 1989

Gay Rights Or Wrongs Michael Mazzalongo, 1995 As homosexual advocacy groups continue to be more and more vocal many questions have been raised concerning homosexual issues in the general public This volume will help ministers and

other Christian leaders sort through and understand these issues from a biblical standard Every Christian needs to read this book

The AIDS Pandemic Kenneth H. Mayer, H.F. Pizer, 2004-12-21 The AIDS Pandemic explores the ways in which HIV/AIDS has and continues to transform the wide range of related disciplines it touches Novel perspectives are provided by a unique panel of internationally recognised experts who cover the unprecedented impact of AIDS on culture demographics and politics around the world including how it affected the world's economy health sciences epidemiology and public health This important far reaching analysis uses the lessons learned from a wide array of disciplines to help us understand the current status and evolution of the pandemic as it continues to evolve Unique and timely presentation of new theories and perspectives Concentrates on the changes that have taken place in a broad array of related disciplines Provides key contextual information for those new to the field or at interface areas between disciplines Includes an international focus on evolving African and Asian experiences Focuses on the current strategies for developing vaccines and microbicides Outlines harm reduction and prevention programs Explores issues related to delivery of life saving AIDS medications in resource constrained environments

Hated to Death , Gay Rights or Wrongs Dr. J Estep, Dr. F. LaGard Smith, Dr. J.D. Robertson, James Taylor, Dr. Carl Bridges, Jr., Joe Dallas, Bob Davies, Lori Rentzel, Mike Hawkins, 1995-02-01 This book brings together teachers psychologists ministers and other qualified men and women who have studied and for some experienced homosexuality over a long period of time It is hoped that this work will generate the kind of understanding necessary to be able to deal compassionately with the people who struggle with homosexuality It is also my aim to equip the members of the church with the confidence to respond intelligently to the false arguments being made for the homosexual lifestyle by Gays and their sympathizers

Democracy Under Assault Michele Swenson, 2004 Swenson presents an in depth examination of the fracture of the church state divide challenges to the independent judiciary resurrected 19th century science and socioeconomic Darwinism as well as revisionist history

Epidemics Sarah Dry, Melissa Leach, 2010 Recent disease events such as SARS H1N1 and avian influenza and haemorrhagic fevers have focussed policy and public concern as never before on epidemics and so called emerging infectious diseases Understanding and responding to these often unpredictable events have become major challenges for local national and international bodies All too often responses can become restricted by implicit assumptions about who or what is to blame that may not capture the dynamics and uncertainties at play in the multi scale interactions of people animals and microbes As a result policies intended to forestall epidemics may fail and may even further threaten health livelihoods and human rights The book takes a unique approach by focusing on how different policy makers scientists and local populations construct alternative narratives accounts of the causes and appropriate responses to outbreaks about epidemics at the global national and local level The contrast between emergency oriented top down responses to what are perceived as potentially global outbreaks and longer term approaches to diseases such as AIDS which may now be considered endemic is highlighted Case studies on avian influenza SARS obesity H1N1 influenza HIV/AIDS

tuberculosis and haemorrhagic fevers cover a broad historical geographical and biological range. As this book explores, it is often the most vulnerable members of a population—the poor, the socially excluded, and the already ill—who are likely to suffer most from epidemic diseases. At the same time, they may be less likely to benefit from responses that may be designed from a global perspective that neglects social, ecological, and political conditions on the ground. This book aims to bring the focus back to these marginal populations to reveal the often unintended consequences of current policy responses to epidemics. Important implications emerge for how epidemics are thought about and represented, for how surveillance and response is designed, and for whose knowledge and perspectives should be included. Published in association with the Economic and Social Research Council ESRC.

The AIDS Pandemic Lawrence O. Gostin, 2005-11-16 In this collection of essays, Lawrence O. Gostin, an internationally recognized scholar of AIDS law and policy, confronts the most pressing and controversial issues surrounding AIDS in America and around the world. He shows how HIV/AIDS affects the entire population, infected and uninfected, by influencing our social norms, our economy, and our country's role as a world leader. Now in the third decade of this pandemic, the nation and the world still fail to respond to the needs of persons living with HIV/AIDS and continue to tolerate injustice in their treatment. Gostin argues that AIDS, both in the United States and globally, deeply affects poor and marginalized populations, and many U.S. policies are based on conservative moral values rather than public health and social justice concerns. Gostin tackles the hard social, legal, political, and ethical issues of the HIV/AIDS pandemic: privacy and discrimination, travel and immigration, clinical trials, and drug pricing, exclusion of HIV-infected health care workers, testing and treatment of pregnant women and infants, and needle exchange programs. This book provides an inside account of AIDS policy debates together with incisive commentary. It is indispensable reading for advocates, scholars, health professionals, lawyers, and the concerned public.

Eyes Right! Chip Berlet, 1995 A collection of 21 reports on recent research conducted in the area of alpha-keto dehydrogenase complexes reveals their central role in cellular metabolism and regulations sites. The implications in medical research range from defects in regulation linked to diabetes, heart disease, and obesity to inherited and acquired immune diseases such as maple syrup urine disease and biliary cirrhosis. The volume integrates structure-function relationships, gene regulation, and genetic defects and extends the variety of experimental approaches in each area. Annotation copyright by Book News Inc. Blood on the Page Lizzy Attree, 2010-03-08 The fourteen interviews in this book form an unprecedented wealth of material on authors' responses to HIV/AIDS in South Africa and Zimbabwe. They comprise a valuable archive which documents and contextualises the variety of views and opinions of different authors on their often ground-breaking choices in writing about HIV/AIDS. Each author ranks among the first to publish fiction on HIV/AIDS in their respective countries. These interviews are of particular merit as these issues have not been discussed at length with any of the authors before. Collectively, they offer a unique range of approaches and opinions in response to the HIV/AIDS pandemic in southern Africa. Their significance lies in their specific literary as well as their

broader social cultural and political perspectives on a disease which continues to spread despite extensive NGO medical and government intervention In both South Africa and Zimbabwe government responses have failed to address the urgent need for new political and economic solutions to the challenge of HIV infection Responses among the population have varied from widespread silence shame and fear to political activism and outspoken critiques of government inaction Writers give voice to this silence and contextualise the disparate reactions amongst diverse peoples Globally AIDS killed approximately 2 million in 2008 In 1998 AIDS was the largest killer in southern Africa nearly double the one million deaths from malaria and eight times the 209 000 deaths from tuberculosis It has long been the case that of those dying globally of AIDS the majority live in southern Africa When the associated social and cultural implications of infection with HIV are considered fictional representations contribute significantly to our understanding of the impact of HIV AIDS on communities and individuals and provide a much needed basis for humanising an epidemic which is unimaginable statistically It has been said that the feelings and reactions that HIV AIDS inspires are often too unreal for words and it is this very notion that certain diseases are taboo unmentionable and hardly even named as such that makes verbalisation of this epidemic a modern imperative *AIDS the Unnecessary Epidemic* Stanley Monteith,1991 *Sex and the Church* Kathy Rudy,1997 In a provocative reexamination of the ethics of family community and sex the author contends that the Christian right s campaign against homosexuality has come to limit the agenda for American Christianity as a whole We should be asking not whether gay people should be allowed to fit in but rather which historically gay practices can help transform the schismatic failing church today **HIV/AIDS in Prisons** DIANE Publishing Company,1995-09 As part of its work The Expert Committee on Aids in Prisons ECAP prepared this Final Report in which it addresses issues that HIV AIDS drug use raise in federal correctional institutions contains recommendations Analyses issues such as testing housing activities educational programs preventive measures for inmates protective measures for staff health care women inmates etc
