Aids Women And The Next Generation:

AIDS, Women, and the Next Generation Ruth R. Faden, Gail Geller, Madison Powers, 1991 The proliferation of Acquired Immune Deficiency Syndrome AIDS among women and children represents one of the gravest health issues confronting contemporary society Women most of childbearing age now constitute 11 percent of all cases and the U S Public Health Service has projected over 3 000 cases of pediatric AIDS by the end of 1991 In the face of these sobering statistics experts have been called upon to grapple with a difficult compelling question under what conditions if any should HIV testing of women and children be required Also at issue are the surreptitious testing for HIV antibodies as part of routine prenatal and neonatal examinations and whether such testing should be performed on all women and infants or only those who belong to groups judged at high risk In this unique contribution to the debate about HIV screening and testing Ruth Faden Madison Powers and Gail Geller have assembled perspectives from experts in public health medicine law and ethics Their wide ranging treatment examines the history of prenatal and neonatal screening programs informed consent legal issues and confidentiality reproductive decision making and numerous other aspects of HIV testing Alternative policy options for both now and the future are discussed in detail This volume provides a comprehensive analysis of these pressing medical public health legal ethical and social issues and is essential reading for AIDS researchers and clinicians public health specialists ethicists health policymakers and analysts obstetricians and pediatricians *Women and New Reproductive Technologies* Judith Rodin, Aila Collins, 2013-01-11 Although major breakthroughs in reproductive technology have created dramatic opportunities for many people they are not without problems More significant than the question of whether the technologies are good or bad however is for whom they are good in what instances and to whom they should be made accessible These issues can be debated at multiple levels from the ethical implications to the social and psychological consequences for society and for the individual to the legal and medical outcomes Each chapter highlights a different array of problems and benefits while emphasizing four major themes the impact of technology on women s lives the role of women the individual versus society and the fetus as patient *Feminism & Bioethics : Beyond Reproduction* Susan M. Wolf Faculty Associate at the Center for Biomedical Ethics and Associate Professor of Law and Medicine University of Minnesota Law School, 1996-03-21 Bioethics has paid surprisingly little attention to the special problems faced by women and to feminist analyses of current health care issues other than reproduction *Feminism Bioethics Beyond Reproduction* aims to counterbalance this one sided approach A breakthrough volume of original essays authored by leading figures in bioethics and feminist theory it moves beyond reproduction and nursing taking bioethics into new territory The book starts with an investigation of the relationship between feminism and bioethics and introduces different approaches to the problem Chapters stress the importance of liberal feminism which prefers feminist over feminine analysis integrate the experience of women of color draw from the women s self help movement and apply feminist standpoint theory In the second part of the book contributors view various

bioethical problems from a feminist perspective euthanasia AIDS the definition of health doctor patient communication the Human Genome Project the conduct of biomedical research and health care reform They examine the pros and cons of the application of gender and feminism to bioethics This provocative volume is bound to change and broaden the way bioethicists students patients and the public consider bioethical issues *HIV, AIDS, and Childbearing* Ruth R. Faden, Nancy E. Kass, 1996 Whether with whom and when to have children are among the most precious of our private decisions Increasingly however the interest of others in these decisions raise difficult questions about the role of government and health professionals in influencing reproductive choice Nowhere is this tension felt more keenly than in the context of HIV and AIDS This book takes on the tough issues related to HIV and childbearing Is there a moral right to have children What are the limits of persuasion Are there constitutional constraints on interference with reproduction What are the precedents with restricting the childbearing behavior of women who use drugs The book includes original work by doctors lawyers ethicists and public health professionals Also included are the experiences of HIV infected women and their health care providers Interviews were conducted over a two year period with HIV infected women and with health care providers from four cities to examine what issues of childbearing in the context of HIV mean to them The book is divided into four sections on medical and public health issues legal issues ethical and social issues and comments from the community It concludes with recommendations for clinical practice and public policy Public policy makers health care providers practitioners in bioethics pediatrics health law and obstetrics gynecology will find this book invaluable when dealing with issues related to HIV and childbearing [AIDS Bibliography](#), 1991 *Reducing the Odds* National Research Council, Board on Children, Youth, and Families, Institute of Medicine, Committee on Perinatal Transmission of HIV, 1999-02-13 Thousands of HIV positive women give birth every year Further because many pregnant women are not tested for HIV and therefore do not receive treatment the number of children born with HIV is still unacceptably high What can we do to eliminate this tragic and costly inheritance In response to a congressional request this book evaluates the extent to which state efforts have been effective in reducing the perinatal transmission of HIV The committee recommends that testing HIV be a routine part of prenatal care and that health care providers notify women that HIV testing is part of the usual array of prenatal tests and that they have an opportunity to refuse the HIV test This approach could help both reduce the number of pediatric AIDS cases and improve treatment for mothers with AIDS *Reducing the Odds* will be of special interest to federal state and local health policymakers prenatal care providers maternal and child health specialists public health practitioners and advocates for HIV AIDS patients January **Primary Care of Women and Children with HIV Infection** Patricia Kelly, 1995 Nurse as Educator Principles of Teaching and Learning for Nursing Practice prepares nurse educators clinical nurse specialists and nurse practitioners for their ever increasing roles in patient teaching health education health promotion and nursing education Designed to teach nurses about the development motivational and sociocultural differences that affect teaching and learning this text combines

theoretical and pragmatic content in a balanced complete style The Third Edition of this best selling text has been updated and revised to include the latest research Nurse as Educator is used extensively in nursing education courses and programs as well as in both institutional and community based settings

The Patient as Victim and Vector Margaret P. Battin, 2021 This volume is jointly written by four authors at the University of Utah with expertise in bioethics health law and infectious disease In collaboration they attempt to develop a normative framework sensitive to situations of disease transmission situations in which the patient is not only a victim but a vector i e vulnerable to disease but also a threat to others This reissue includes a new preface exploring the implications of the Covid 19 pandemic

The Politics of Women's Health Susan Sherwin, Feminist Health Care Ethics Research Network, 1998 Examines the real world of women's health status and health care delivery in different countries and the assumptions behind the dominant medical model of solving problems without regard to social conditions This book asks what feminist health care ethics looks like if we start with women's experiences and concerns

Ethics and Epidemiology Steven Scott Coughlin, Tom L. Beauchamp, 1996 Written by epidemiologists ethicists and legal scholars this book provides an in depth account of the moral problems that often confront epidemiologists including both theoretical and practical issues The topics covered include informed consent privacy and confidentiality protection the balancing of risks and benefits ethical issues in the study of vulnerable populations the institutional review board system and professional education The solid up to date analyses of these issues will be very helpful to epidemiologists in their practice research and teaching They encourage the latest developments in the field and include detailed bibliographies

Disease and the Modern World: 1500 to the Present Day Mark Harrison, 2013-05-02 Mark Harrison's book illuminates the threats posed by infectious diseases since 1500 He places these diseases within an international perspective and demonstrates the relationship between European expansion and changing epidemiological patterns The book is a significant introduction to a fascinating subject Gerald N Grob Rutgers State University In this lively and accessible book Mark Harrison charts the history of disease from the birth of the modern world around 1500 through to the present day He explores how the rise of modern nation states was closely linked to the threat posed by disease and particularly infectious epidemic diseases He examines the ways in which disease and its treatment and prevention changed over the centuries under the impact of the Renaissance and the Enlightenment and with the advent of scientific medicine For the first time the author integrates the history of disease in the West with a broader analysis of the rise of the modern world as it was transformed by commerce slavery and colonial rule Disease played a vital

role in this process easing European domination in some areas limiting it in others Harrison goes on to show how a new environment was produced in which poverty and education rather than geography became the main factors in the distribution of disease Assuming no prior knowledge of the history of disease Disease and the Modern World provides an invaluable introduction to one of the richest and most important areas of history It will be essential reading for all undergraduates and postgraduates taking courses in the history of disease and medicine and for anyone interested in how disease has shaped and has been shaped by the modern world

AIDS: Setting A Feminist Agenda Lesley Doyal,Jennie Naidoo,Tamsin Wilton,2018-12-07 AIDS Setting a Feminist Agenda presents an overview of the important issues raised for feminist theory and practice by the HIV AIDS epidemic and outlines the direction in which feminist debates about the subject are developing It makes essential links between feminism and HIV AIDS work and not only demonstrates that AIDS is a feminist issue but also suggests areas where feminism is long overdue The essays discuss medical issues the specific social and political impact of HIV AIDS on the lives of women of colour lesbians injecting drug users and prostitute women And Current Health Educational And Health Promotional Practice As It relates to women The volume is theoretical and practical suggesting theoretical models for understanding and challenging the social factors which are conducive to the spread of HIV among women and among men as well as offering models of good practice for working with and for women

Man-made Medicine Kary L. Moss,1996 If not for the reproductive functions of women would there be anything called women s health care A review of medical literature practice and policy in this country would suggest that the answer is no Offering a startling view of the current state of health care for women in the United States and laying the foundation for a new widely defined women s medicine Man Made Medicine makes an urgent statement about gender bias in the medical establishment and its pernicious effects on the well being of women and the care they receive These essays by physicians lawyers activists and scholars present a rare interdisciplinary approach to a complex set of issues Gender stereotyping and bias in the collection analysis and reporting of scientific data and in the ways health related news is covered by the media are examined The exclusion of women from the health care policy making process and the effect such exclusion has on the determination of priorities among potential areas of research are also explored With discussions of the plight of specific populations of women whose health care needs are not being

sufficiently met for example immigrants prisoners the mentally ill or women with HIV AIDS disabilities or reproductive health problems this book considers matters of race and class within the parameters of gender as it builds a fundamental challenge to the existing health care system A range of current reform proposals are also evaluated in terms of their potential impact on women Suggesting no less than a radical rethinking of women s medicine Man Made Medicine gives essential direction to the discussions that will shape the future of health care in this country It will be of great interest to a wide audience including health care advocates policymakers scholars and readers generally concerned with women s health issues Contributors Ellen Barry Laurie Beck Joan Bertin Janet Calvo Wendy Chavkin Kay Dickersin Abigail English Elizabeth Fee Carol Gill Nancy Krieger Joyce McConnell Judy Norsigian Ann Scales Susan Stefan Lauren Schnaper Catherine Teare
