Shimasaki, 2009-09-18 My journey into this fascinating field of biotechnology started about 26 years ago at a small biotechnology company in South San Francisco called Genentech. I was very fortunate to work for the company that begat the biotech industry during its formative years. This experience established a solid foundation from which I could grow in both the science and business of biotechnology. After my fourth year of working on Oyster Point Boulevard a close friend and colleague left Genentech to join a start up biotechnology company. Later he approached me to leave and join him in all places Oklahoma. He persisted for at least a year before I seriously considered his proposal. After listening to their plans the opportunity suddenly became more and more intriguing. Finally I took the plunge and joined this entrepreneurial team in cofounding and growing a start up biotechnology company. Making that fateful decision to leave the security of a larger company was extremely difficult but it turned out to be the beginning of an entrepreneurial career that forever changed how I viewed the biotechnology industry. Since that time I have been fortunate to have cofounded two other biotechnology companies and even participated in taking one of them public. During my career in these start ups I held a variety of positions from directing the science operations regulatory and marketing components to subsequently becoming CEO. **Prologue**, 1980
