Treichler, 1999 A collection of essays on the AIDS epidemic by a leading feminist cultural theorist of science **A Visual History of HIV/AIDS** Elisabet Björklund, Mariah Larsson, 2018-07-04 The Face of AIDS film archive at Karolinska Institutet Sweden consists of more than 700 hours of unedited and edited footage shot over a period of more than thirty years and all over the world by filmmaker and journalist Staffan Hildebrand The material documents the HIV AIDS pandemic and includes scenes from conferences and rallies and interviews with activists physicians people with the infection and researchers It represents a global historical development from the early years of the AIDS crisis to a situation in which it is possible to live a normal life with the HIV virus This volume brings together a range of academic perspectives from media and film studies medical history gender studies history and cultural studies to bear on the archive shedding light on memories discourses trauma and activism Using a medical humanities framework the editors explore the influence of historical representations of HIV AIDS and stigma in a world where antiretroviral treatment has fundamentally altered the conditions under which many people diagnosed with HIV live Organized into four sections this book begins by introducing the archive and its role setting it in a global context The first part looks at methodological legal and ethical issues around archiving memories of the present which are then used to construct histories of the past something that can be particularly controversial when dealing with a socially stigmatized epidemic such as HIV AIDS The second section is devoted to analyses

of particular films from the archive looking at the portrayal of people living with HIV AIDS the narrative of HIV as a chronic illness and the contemporary context of particular films The third section looks at how stigma and trauma are negotiated in the material in the Face of AIDS film archive discussing ideas about suffering and culpability The final section contributes perspectives on and by the filmmaker as activist and auteur This interdisciplinary collection is placed at the intersection of medical humanities sexuality studies and film and media studies continuing a tradition of studies on the cultural and social understandings of HIV AIDS

**Patient Zero and the Making of the AIDS Epidemic** Richard A. McKay, 2017-11-22 Now an award winning documentary feature film The search for a patient zero popularly understood to be the first person infected in an epidemic has been key to media coverage of major infectious disease outbreaks for more than three decades Yet the term itself did not exist before the emergence of the HIV AIDS epidemic in the 1980s How did this idea so swiftly come to exert such a strong grip on the scientific media and popular consciousness In Patient Zero Richard A McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries old ideas and fears about contagion and social disorder McKay presents a carefully documented and sensitively written account of the life of Ga tan Dugas a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV AIDS epidemic developed and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS and how many individuals grappled with the notion of patient zero adopting challenging and redirecting its powerful meanings as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic With important insights for our interconnected age

Patient Zero untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats What McKay gives us here is myth smashing revisionist history at its best
