AIDS THE DEADLY EPIDEMIC

Graham Hancock and Enver Carim

*Governments worldwide have reacted too slowly
to the spread of AIDS. It is an incurable
disease, the virus is carried by millions and the
number of victims doubles every 6-8 months.*

*"The AIDS virus needs to be treated with much
greater urgency...with better education of the
public and by stepping up research."*

Aids The Deadly Epidemic:

AIDS Graham Hancock, Enver Carim, 1986-01-01 **AIDS** Graham Hancock, 1986 Patient Zero and the Making of the AIDS Epidemic Richard A. McKay, 2017-11-22 Now an award winning documentary feature film The search for a patient zero popularly understood to be the first person infected in an epidemic has been key to media coverage of major infectious disease outbreaks for more than three decades Yet the term itself did not exist before the emergence of the HIV AIDS epidemic in the 1980s How did this idea so swiftly come to exert such a strong grip on the scientific media and popular consciousness In Patient Zero Richard A McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries old ideas and fears about contagion and social disorder McKay presents a carefully documented and sensitively written account of the life of Ga tan Dugas a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV AIDS epidemic developed and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS and how many individuals grappled with the notion of patient zero adopting challenging and redirecting its powerful meanings as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic With important insights for our interconnected age Patient Zero untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats What McKay gives us here is myth smashing revisionist history at its best

elsewhere A review of English language cinematic entertainment of the eighties reveals that the health crisis was scarcely alluded to although such values as those of militarism masculinity and family loyalty were addressed whether supportively or critically It is the argument of this book that the HIV virus and AIDS are approached if at all only obliquely particularly within the genre of the horror film and especially through those films dealing with corporeality or with lethal challenges to the traditional nuclear family

December 2003 Policy Paralysis: a Call for Action on HIV/AIDS-related Human Rights Abuses Against Women and Girls in Africa , *AIDS: Virus- or Drug Induced?* P.H. Duesberg, 2012-12-06 Despite enormous efforts over 100 000 papers and over 22 billion spent by the US taxpayer alone the HIV AIDS hypothesis has failed to produce any public health benefits no vaccine no effective drug no prevention no cure not a single life saved Is the science system to be blamed Has science failed to reveal the truth about AIDS In *AIDS Virus or Drug Induced* two dozen scientists scholars and journalists have investigated the status quo of AIDS research Most of them have questioned the HIV AIDS hypothesis before but have since been censored and sociologically excluded from AIDS research politics and journalism Here they are united for the first time to put on trial the HIV AIDS hypothesis There are those who acquit HIV entirely Others who make a case for HIV as a necessary but not a sufficient cause of AIDS And one medical scientist who together with the huge AIDS literature defends the hypothesis that HIV is sufficient to cause AIDS The book convincingly reveals that the scientific method could very well find a solution to AIDS but only if ideas can be exchanged freely and if the HIV monopoly can be broken *AIDS Virus or Drug Induced* illustrates that the solution to AIDS could be as close as one of several very testable and very affordable alternatives to the unproductive HIV AIDS hypothesis *A WHO Public Health Approach to Ending AIDS in the Global South* Charles F. Gilks, Yibeltal Assefa Alemu, 2024-09-01 In highlighting how a WHO Public Health Approach PHA has been successfully used in developing countries to provide HIV AIDS patients with antiretroviral therapy ART this important book provides a template for how the PHA can be implemented to treat other chronic but non communicable diseases NCDs as well With over 28 million people globally now receiving treatment for HIV AIDS it s clear there are lessons to be learnt from the provision of

ART which have great relevance for NCD care and towards achieving universal health coverage in the global south The first section of the book provides a detailed overview of the strategy that enabled such a successful programme to be taken place the challenges faced and its evolution over time The book then moves on to assert that by approaching other chronic NCDs in a similar way focussing on populations with integrated long term and short term person centred care there is a pathway towards universal health care and Universal Health Coverage across the developing world Discussing many of the most pressing diseases and public health issues affecting these regions this book provides global health scholars and practitioners with a detailed analysis of the challenges faced in tackling these diseases but also an integrated person centred health care approach by which these challenges may be met
