Government and Armed Forces in Britain, 1856-1990 Paul Smith, 2010-07-15 In a period that began with Britain controlling a world wide empire and included two world wars followed by the Cold War and massive expenditure on nuclear armaments the relationship between the politicians and the generals has been central to British history While it is correctly assumed that the Armed Forces have never threatened British political stability in modern times the relationship between the military and their political masters is a major if under emphasised theme of British history While in theory the politicians decided strategy and the military implemented it in practice decisions often depended on the personalities and experience of those involved Asquith the epitome of the civilian left major strategic decisions in the hands of the military while Churchill an ex soldier and ex First Lord of the Admiralty rode roughshod over professional military advice In a period when arms before ever more technologically sophisticated there was also the problem of how far politicians could decide on strategies proposed by the military other than by the crude yardstick of cost The essays in Government and the Armed Forces in Britain 1856 1990 provide a coherent account not only of the major decision making of warfare but also of the changes in the organisation and control of the Armed Forces Armed Forces , 1982 *The Role of European Ground and Air Forces After the Cold War* Gert de Nooy, 2023-09-14 This book is about European ground and air forces after the Cold War and the potential role they might or might not play in shaping a pragmatic common European foreign and security policy It deals with future co operation between West European armies and air forces Challenges in the form of politico military strategic interests at stake and the corresponding risks as well as the possible responses to these challenges in the form of national and multilateral military doctrines and the execution thereof are scrutinized and dealt with First in Chapters Two James Gow Three Fran ois Mermet and Four Stephen Cambone the strategic rationale and the political military implications of an overall European security and defence policy are discussed Next Chapters Five Trevor Taylor Six Madeleine Sandstr m and Seven Lothar R hl deal with the harmonization and restructuring of national defence policies and their tools Chapters Eight Tony Mason Nine Jan Folmer and Ten Luc Stainier then concentrate on the role missions and means of the ground air and joint components of a collective European military instrument for the implementation of a future European security and defence policy Finally in Chapter Eleven the editor provides an overview of topical highlights and tentative conclusions emanating

from both the previous chapters and the discussions during the workshop of experts that was held in conjunction with this book This book is of interest to European policy makers defence planners officers under training in military and defence academies and students of international relations political science and European security

Reference Division,1951 Technical Manual United States Department of the Army,1967 *Ernsting's Aviation Medicine, 4E* David Gradwell,David Rainford,2006-03-31 Ernsting s Aviation Medicine applies current understanding in medicine physiology and the behavioural sciences to the stresses faced by both civil and military aircrew on a daily basis The fourth edition of this established textbook has been revised and updated by a multi disciplinary team of experienced contributors and includes new chapters on *Readiness and recuperation of the Armed Forces* Great Britain: Parliament: House of Commons: Defence Committee,2010-02-10 The Defence Committee states that the forthcoming Strategic Defence Review should take account of the current low readiness levels of the Armed Forces and the need for their effective recuperation The Armed Forces have been involved in operations in Iraq and Afghanistan for many years while maintaining key standing tasks such as the strategic nuclear deterrent and UK air defence They have been deployed above the Defence Planning Assumptions the level at which they are structured and funded for seven years Nevertheless the Committee considers it unsatisfactory that readiness levels have been allowed to fall to the extent that they have and recommends that the Strategic Defence Review reviews the utility and content of the Defence Planning Assumptions and readiness targets Recuperation is the process by which force elements are returned to target levels of readiness It involves all the underlying components manpower equipment training and logistics support The drawdown of troops from Iraq should provide the MoD with an opportunity to recuperate the Armed Forces and to reverse the fall in readiness But there have also been pressures on personnel with significant numbers of the Army and the Marines and those in key pinch point trades such as medical personnel being deployed more frequently than the MoD would wish breaking harmony guidelines If readiness is to be improved then the Army must return to being deployed within harmony guidelines as soon as practicable *Defending Democracy and Securing Diversity* Christian Leuprecht,2013-09-13 Old sergeants say we re here to defend democracy not to practice it But are they right The special mandate with which defence and security organizations are tasked imposes unique constraints with respect to the accommodation of diversity which differs from those faced by any other public or private organization Yet the compound effect of demographic political economic social and legal pressures is making diversity as inevitable in the defence and security sector as in any other organization in advanced industrialized democracies Owing in part to a dearth of research on the way the defence and security sectors can leverage

diversity to enhance their functional imperatives such sectors have been reticent about diversity The chapters in this volume strive to enlighten the debate by laying out the concepts clarifying theoretical issues and providing empirical evidence The case studies draw on Canada Guyana the Netherlands South Africa and the United Kingdom They examine ethno cultural gender and sexual minority diversity in a variety of missions including Bosnia Herzegovina and Afghanistan The chapters are notable for their methodological pluralism and interdisciplinary range including political science sociology anthropology and psychology Although scholarly in nature the book is readily accessible to professionals and practitioners alike This book was published as a special issue of Commonwealth and Comparative Politics

**International Cooperation with Partner Air Forces** Jennifer D. P. Moroney, 2009 The Air Force faces a challenging environment as it devises an approach to managing security cooperation with partner countries The important mission of countering terrorist and insurgent groups abroad requires working closely with allies and partner countries to strengthen security Accordingly current U S defense strategy emphasizes that the U S armed forces should do more to work by with and through partners to accomplish missions

*U.S.-UK Nuclear Cooperation After 50 Years* Jenifer Mackby, Paul Cornish, 2008-07-02 As Britain and the United States commemorate five decades of the special nuclear relationship embodied in the 1958 Mutual Defense Agreement MDA two leading research institutes one on either side of the Atlantic have collaborated to examine that history The Center for Strategic and International Studies in Washington D C and the Royal Institute of International Affairs Chatham House London enlisted senior officials scientists academics and members of industry who have been involved in the implementation of the MDA over the years The contributors were asked to recount how the U S UK nuclear relationship flourished despite such obstacles as the halt in the scientific cooperation that had spurred the Manhattan Project the Suez crisis and sharp disagreements over scientific political and technical issues They were also asked to look to the future of this unparalleled transatlantic relationship Abstracts from 36 oral histories taken with among others Des Browne UK secretary of state for defence James Schlesinger former U S secretary of energy and Harold Brown former U S secretary of defense add to the historical dimension of this work The resulting collection of histories analyses and anecdotes provides valuable reading for an understanding of how the two nations were drawn together by a common threat during a turbulent era as well as how they will face future challenges in a radically changed security environment Amazon com

The Transformation of Italian Armed Forces in Comparative Perspective Fabrizio Coticchia, Francesco N. Moro, 2016-03-09 European armed forces have undergone deep changes in the past two decades Given the breadth of the debate and the size of transformations that took place it is somewhat surprising that relatively few academic studies have directly dealt with changes in force

structure of European militaries and the Italian armed forces in particular The focus of this book is the organizational dimension of the restructuring of armed forces through 3 different lenses doctrine and strategic framework budget and resource allocation and force structure and deployment The key issues addressed relate to how these factors interact in shaping transformation Of particular interest is the theme of learning which is how armed forces endogenize change in the short and long run This study provides valuable insights into the extent to which armed forces manage to adapt to the emerging strategic and operational challenges they have to face and to illustrate the weight of institutional legacies resource constraints and inter organizational learning in shaping transformation Focusing on the Italian case in comparative perspective and based on a large variety of military operations from airstrikes to peacekeeping and counterinsurgency the book provides an innovative viewpoint on military transformation and significantly contributes to our understanding of contemporary security that is deeply shaped by the lessons learnt in Afghanistan Lebanon Iraq and Libya

**Recruiting and Retaining Armed Forces Personnel** Great Britain. Parliament. House of Commons. Defence Committee, 2008 Recruiting retaining the right number of well trained personnel is vital for the continuing success of the United Kingdom s Armed Forces Yet recruitment and retention targets are not being met There is particular concern about shortages in pinchpoint trades trades or areas of expertise where there is not enough trained strength to perform operational tasks without encroaching on the time provided between deployments for recuperation training and leave This report sets out to examine the factors which hamper recruitment and retention in the Armed Forces and reservists identify what the MoD is doing to improve these There is also concern and examination of the issue of why ethnic minority personnel form such a low proportion of the Armed Forces

*War, Identity and the Liberal State* Victoria Basham, 2013-07-24 This book critically examines the significance of gender race and sexuality to wars waged by liberal states Drawing on original field research with British soldiers it offers insights into how their everyday experiences are shaped by and shape a politics of gender race and sexuality that not only underpins power relations in the military but the geopolitics of wars waged by liberal states Linking the politics of daily life to the international is an intervention into international relations IR and security studies because instead of overlooking the politics of the everyday this book insists that it is vital to explore how geopolitical events and practices are co constituted reinforced and contested by it By utilising insights from Michel Foucault the book explores how shared and collectively mediated knowledge on gender race and sexuality facilitates certain claims about the nature of governing in liberal states and about why and how such states wage war against illiberal ones in pursuit of global peace and security The book also develops post structural work in international relations by urging scholars interested in the linguistic construction of geopolitics to consider the ways in which bodies objects and architectures also reinforce particular ideas about war identity and statehood
