*Air Power and Warfare* Elwood L. White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history Like most editions of the United State Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy It includes books reports government documents and journal articles Excluded are pictorial works newspaper articles works of fiction studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation Readers wanting information on the history of aviation certainly prior to the Wright Brothers are encouraged to consult the U S Air Force Academy Friends of the Library publication *The Genesis of Flight The Aeronautical History Collection* of Colonel Richard Gimbel

**The Development of British Tactical Air Power, 1940-1943** Matthew Powell, 2016-09-10 This book explores the development of tactical air power in Britain between 1940 and 1943 through a study of the Royal Air Force s Army Co operation Command It charts the work done by the Command during its existence and highlights the arguments between the RAF and Army on this contentious issue in Britain Much is known about the RAF both in the years preceding and during the Second World War particularly the exploits of Fighter Bomber and Coastal Commands yet the existence of the RAF s Army Co operation Command is little known Through extensive archival research Matthew Powell maps the creation and work of the RAF s Army Co operation Command through an analysis of tactical air power developments during the First World War and inter war periods highlighting the debates and arguments that took place between the Air Ministry and the War Office [WLA](#) ,2001 *A History of Air Warfare* John Andreas Olsen, 2010 An overview of air power s history and effectiveness by the top experts in the field

**Rearming for the Cold War, 1945-1960** Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods *History of Acquisition in the Department of Defense, Volume*

1 Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs Bombing, States and Peoples in Western Europe 1940-1945 Claudia Baldoli, Andrew Knapp, Richard Overly, 2011-06-30 This is the first book to treat bombing during WWII as a European phenomenon and not just the Blitz on Britain and Germany With Western Europe now at the heart of a united continent it is even more difficult to explain how only 70 years ago European states destroyed much of the urban landscape from the air There were many blitzes between 1940 and 1945 with an estimated 700 000 people killed The purpose of this book is to provide the basis for a comparison of the experience of western states under the impact of bombing In particular it considers the political cultural and social responses to bombing rather than the military strategic and social dimensions which have formed the core of the discussion hitherto This book will correct the popular perception of the British Blitz as the key bombing experience by exposing the reality of life under the bombs for communities as far apart as Brest Palermo and Rostock An international panel of historians consider the issues raised amidst the bombing of human rights and protection of civilians in this seminal event in 20th history *Military Review* ,2003 **Joint Force Quarterly** ,1993 Special Bibliography Series ,1957 **American Carrier Air Power at the Dawn of a New Century** Benjamin S. Lambeth, 2006-05-22 In the Afghanistan war U S carrier based fighters substituted almost entirely for land based theater air

forces The Navy's carriers again played a key role in conducting around the clock operations against Saddam Hussein's forces in Iraq American carrier air power is now able to conduct coordinated deep strike missions well beyond coastal reaches The Navy's performance over Afghanistan and Iraq showed how the nation's carrier force can provide around the clock target coverage consistently accurate target attack and multiple successful target attacks per sortie The Evolution of Strategy Beatrice Heuser, 2010-10-14 Is there a Western way of war which pursues battles of annihilation and single minded military victory Is warfare on a path to ever greater destructive force This magisterial account answers these questions by tracing the history of Western thinking about strategy the employment of military force as a political instrument from antiquity to the present day Assessing sources from Vegetius to contemporary America and with a particular focus on strategy since the Napoleonic Wars Beatrice Heuser explores the evolution of strategic thought the social institutions norms and patterns of behaviour within which it operates the policies that guide it and the cultures that influence it Ranging across technology and warfare total warfare and small wars as well as land sea air and nuclear warfare she demonstrates that warfare and strategic thinking have fluctuated wildly in their aims intensity limitations and excesses over the past two millennia Air Force Magazine, 2014-07 *Reassessing the Liberal State* Timothy Fuller, John Hittinger, 2001 This collection of essays revisits Jacques Maritain's book *Man and the State* the University of Chicago Walgreen lectures of 1949 and critically engages its greatest themes and arguments the character of the modern state and its relation to the body politic the state's functions and claims the basis of authority the foundation of human rights and natural law structural pluralism Church and State relations national sovereignty and the prospects for world government The contributors address whether Maritain has successfully accomplished his project of engaging modernity from the perspective of a 20th century disciple of Thomas Aquinas whether his reformulations and revisions of the modern state are philosophically sound and prudent and whether his developments of Aristotle and Aquinas are faithful to the sources Maritain drawing upon the philosophy of Aquinas represents a significant achievement he provides a viable reassessment of the liberal state uniting Thomistic and Aristotelian traditions with the human rights thrust of modern political philosophy In short Maritain reassesses the liberal state in light of ancient and medieval political traditions seeking to find what is true enduring and practical in the modern liberal state while criticizing its excesses and reconceptualizing its philosophical foundations The contributors to this collection find Maritain has achieved much in the accomplishment of this project Some continue this project by applying Maritain's philosophy to contemporary issues Other contributors find it helpful however to compare Maritain to other contemporary political philosophers and to question his use of the philosophy of Aquinas Maritain's political philosophy and *Man and the State* in particular is worth continued study Although his influence was greatest in the 1950s and 1960s and his philosophy has been displaced by new trends his work shows a remarkable resilience and relevance to the issues of the day offering a deeper philosophical foundation and more flexible set of tools for analysis than currently provided Timothy Fuller
