Committee on Government Operations. Government Activities and Transportation Subcommittee, 1975 Air Traffic Control Specialist , 1988 Development of New Selection Tests for Air Traffic Controllers John Thomas Dailey, 1977 This report describes the development of a new Multiplex Controller Aptitude Test for initial screening of FAA Air Traffic Controller applicants Its content includes the traditional types of aptitude test items used for today s screening In addition it includes measurement of the ability to identify potential conflicts in air traffic a skill that has been demonstrated experimentally to have a significant relation to success in the ATC speciality Alternate forms of the test have been developed in a format that meets Civil Service test administration requirements The test has been administered experimentally to groups whose abilities approximate those of the applicant population and results indicate that it has satisfactory reliability characteristics It has been administered experimentally to incoming students at the FAA ATC Academy and personnel on the job at operational facilities and constantly produced higher correlations with ATC success than any other test used in the validation studies The available data indicate that this new and customized instrument promises to be a significant improvement over the existing battery for screening FAA Air Traffic Controller applicants Author Air Traffic Control Systems , 1962 **Air Traffic Controllers** United States Civil Service Commission, 1975 *Air Traffic Controller 3 & 2* James T. professionals in Air Transport Management but also undergraduate and postgraduate students studying air transport management and aeronautical engineering It will also be very helpful for the training of air traffic control officers ATCOs The book does not require any prior specialist knowledge as it is an introduction to air navigation service provider ANSP business There is very little literature available that gives a detailed appreciation of the complexities potential risks and issues associated with the provision of air navigation services The role of this book is to fill this significant gap with a comprehensive in depth study of the management principles related to ANSPs This is particularly timely given recent ATC developments in Europe USA and New Zealand Airlines and airports rely on the ANSPs for the management of air traffic Hence air navigation services ANS provision is considered as a core element for air transportation *Development of a Dynamic Air Traffic Control Simulator* Richard E.
