Air War Vietnam:

Gradual Failure: The Air War Over North Vietnam, 1965-1966 Jacob Van Staaveren, 2011-07-18 The air war against North Vietnam was launched with the nickname Rolling Thunder This book covers the first phase from March 1965 to late 1966 It begins with the planning and execution of two initial limited air strikes nicknamed Flaming Dart I and II As the air campaign gradually expanded and the permissible targeting area moved northward many in Washington believed air power could never win the war in the north The United States Air Force reached its nadir during the opening two years of the Rolling Thunder air campaign in North Vietnam Never had the Air Force operated with so many restraints and to so little effect These pages are painful but necessary reading for all who care about the nation's military power The author served as a historian for over twenty years with the Air Force history program Originally published by the Air Force History and Museums Program *An Illustrated Guide to the Air War Over Vietnam* Bernard C. Nalty, George M. Watson, Jacob

Neufeld, 1981 *The Vietnam Air War* Dennis M. Ridnour, 2016 As Dennis M Mike Ridnour writes in the foreword of his new oral history *The Vietnam Air War First Person* over five million missions were flown in the Vietnam War The many pilots crew and support personnel who risked their lives daily don't deserve to fade into obscurity Unhappy with the lack of first person retellings of the war Ridnour made it his new mission to preserve these men's tales of bravery and duty The result is more than one hundred stories from the front lines of the war Air Force Fighter Pilots Weapon Systems Operators WSOs and Electronic Warfare Officers EWOs recount their stories of air to air engagements near misses successes and failures A pilot explains why he buys a drink for every tanker driver he meets An airman explains what a Thud is A veteran vividly describes his homecoming These stories and others provide a much different account of the war than those found in history books The pages come alive with perilous missions and skilled maneuvers Airmen from all walks of life were united during the war and their tales include stirring accounts of friendship and comradeship **Air War Vietnam. Plans and Operations 1961 -**

1968 Jacob van Staaveren, Stuart Slade, 2012-10-19 During the middle and late 1970s the United States Air Force Historical Research Center Maxwell Air Force Base Alabama produced a series of 17 monographs that detailed the history of the Vietnam War These studies were classified as being Top Secret for many years and were only recently released to the public The core of these monographs is the series that deal with the political operational and technical development of the Air Force participation in the Vietnam War These remarkable documents contain a wealth of historical data that explain the background and reasoning behind many controversial decisions This compilation has taken these monographs and assembled them into a single narrative The documents have been painstakingly remastered and reset to the printed page but their editorial integrity has been scrupulously preserved *Air War Vietnam Plans and Operations 1969 - 1975* Elizabeth Hartsook, Stuart Slade, 2013-03-31 During the middle and late 1970s the United States Air Force Historical Research Center produced a series of 17 monographs that detailed the history of the Vietnam War These remarkable documents contain a

wealth of historical data that explain the background and reasoning behind many controversial decisions Air War Vietnam is a compilation of these monographs that casts new light on why the Vietnam war was fought the way it was and why a war that could and should have been won was instead lost **On Yankee Station** John B. Nichols, 2013-03-11 Combining vivid personal narrative with historical and operational analyses this book takes a candid look at U S naval airpower in the Vietnam War Coauthors John Nichols a fighter pilot in the war and Barrett Tillman an award winning aviation historian make full use of their extensive knowledge of the subject to detail the ways in which airpower was employed in the years prior to the fall of Saigon Confronting the conventional belief that airpower failed in Vietnam they show that when applied correctly airpower was effective but because it was often misunderstood and misapplied the end results were catastrophic Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and important lessons for future conflicts At the same time it adds important facts to the permanent war record Following an analysis of the state of carrier aviation in 1964 and a definition of the rules of engagement it describes the tactics used in strike warfare the airborne and surface threats electronic countermeasures and search and rescue It also examines the influence of political decisions on the conduct of the war and the changing nature of the Communist opposition Appendixes provide useful statistical data on carrier deployments combat sorties and aircraft losses *Air War - Vietnam* Frank Harvey, 1967 From the briefing rooms and bombing runs to the dogfights and last ditch bail outs here are the true stories of the fighting men of Vietnam as told by aviation expert Frank Harvey This is what it was like to fight in the flame filled skies of Southeast Asia

Gradual Failure Jacob Van Staaveren, 2002 **The Vietnam War** Jayne Susan Werner, Luu Doan Huynh, 1993-03-31 In addition to Jayne Werner and Luu Doan Huynh the contributors are Mark Bradley William Duiker David Elliott Kristin Pelzer George Vickers James Harrison George Herring Ronald Spector Paul Joseph Jeffrey Clarke Ngo Vinh Long Benedict Kiernan Marilyn Young David Hung Keith Taylor and Tran Van Tra **Interservice Rivalry and Airpower in the Vietnam War** Ian Horwood, 2010 Explores the rivalry between the armed services of the U S relating to the employment of tactical airpower during the Vietnam War Not being an American Horwood is able to put a fresh perspective on this complex issue This study focuses on tactical airpower in S Vietnam between 1961 and 1968 Horwood avoids a lengthy discussion of the air war over N Vietnam focusing instead on the combat operations in the South He examines a number of issues which are relevant to the use of airpower in irregular warfare command and control of airpower the use of airpower at the tactical and the operational strategic level of war the role of helicopters and different service understandings of the proper role of airpower in a counterinsurgency **Air Power And The Ground War In Vietnam, Ideas And Actions** Dr Donald J. Mrozek, 2015-11-06 Ultimately this study is about a smaller Vietnam War than that which is commonly recalled It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects but it avoids major treatment of some of the most dramatic air actions of the war such as the bombing of Hanoi To many who fought the war and believe it ought to

have been conducted on a still larger scale or with fewer restraints this study may seem almost perverse emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe inspiring technology Although the chapters in this study are intended to form a coherent and unified argument each also offers discrete messages The chapters are not meant to be definitive They do not exhaust available documentary material and they often rely heavily on published accounts Nor do they provide a complete chronological picture of the uses of air power even with respect to the ground war Nor is coverage of areas in which air power was employed South Vietnam Laos Cambodia and North Vietnam evenly distributed nor necessarily proportionate to the effort expended in each place during the war Lastly some may find one or another form of air power either slightly or insufficiently treated Such criticisms are beside the point for the objectives of this study are to explore a comparatively neglected theme the impact of air power on the ground and to encourage further utilization of lessons drawn from the Vietnam experience Airwar Phillip S. Meilinger,2003-04-29 According to the author all aircrews tacticians and those who direct them have to realise the limitations of air power during conflicts For years opinion has differed as to whether the aircraft has altered war strategies or merely the tactics of war This volume explores the limits of airpower Battle for the Skies Over North Vietnam Drew Middleton,1978 **Rolling Thunder 1965-68** Richard P. Hallion,2018-02-22 Operation Rolling Thunder was the campaign that was meant to keep South Vietnam secure and dissuade the North from arming and supplying the Viet Cong It pitted the world s strongest air forces against the MiGs and missiles of a small Soviet client state But the US airmen who flew Rolling Thunder missions were crippled by a badly thought out strategy rampant political interference in operational matters and aircraft optimised for Cold War nuclear strikes rather than conventional warfare Ironically Rolling Thunder was one of the most influential episodes of the Cold War its failure spurring the 1970s US renaissance in professionalism fighter design and combat pilot training Dr Richard P Hallion one of America s most eminent air power experts explains how Rolling Thunder was conceived and fought and why it became shorthand for how not to fight an air campaign Air War Over Vietnam Dana Bell,1982-01-01 These books contain photographs of the Vietnam War The focus is on various aspects of the air war following no strict chronology or subject line but is aimed to give an overall impression of the conflict through this random selection Volume 2 covers the operations between 1964 and 1968 The third volume contains photographs of the war as recorded by a variety of photographers who were lucky enough to be present at an interesting scene in the sky or on the ground Volume 4 is a full color pictorial survey of US air involvement during the war The compiler hopes to convey the atmosphere of that difficult combat environment as well as provide a general overview of the major aircraft types used in the war **Air War Over North Vietnam** Stephen Emerson,2018-02-28 In early 1965 the United States unleashed the largest sustained aerial bombing campaign since World War II against North Vietnam Through an ever escalating onslaught of destruction Operation Rolling Thunder intended to signal Americas unwavering commitment to its South Vietnamese ally in the face of continued

North Vietnamese aggression break Hanoi political will to prosecute the war and bring about a negotiated settlement to the conflict It was not to be Against the backdrop of the Cold War and fears of widening the conflict into a global confrontation Washington policy makers micromanaged and mismanaged the air campaign and increasingly muddled strategic objectives and operational methods that ultimately sowed the seeds of failure despite the heroic sacrifices by U S Air Force and Navy pilots and crews Despite flying some 306 000 combat sorties and dropping 864 000 tons of ordnance on North Vietnam 42 per cent more than that used in the Pacific theater during World War II Operation Rolling Thunder failed to drive Hanoi decisively to the negotiating table and end the war That would take another four years and another air campaign But by building on the hard earned political and military lessons of the past the Nixon Administration and American military commanders would get another chance to prove themselves when they implemented operations Linebacker I and II in May and December 1972 And this time the results would be vastly different *Air Power's Lost Cause* Brian D. Laslie,2021-05-14

The first comprehensive treatment of the air wars in Vietnam Filling a substantial void in our understanding of the history of airpower in Vietnam this book provides the first comprehensive treatment of the air wars in Vietnam Brian Laslie traces the complete history of these air wars from the beginning of American involvement until final withdrawal Detailing the competing roles and actions of the air elements of the United States Army Navy and Air Force the author considers the strategic operational and tactical levels of war He also looks at the air war from the perspective of the North Vietnamese Air Force Most important for understanding the US defeat Laslie illustrates the perils of a nation building a one dimensional fighting force capable of supporting only one type of war **Air War Against North Vietnam** United States. Congress. Senate. Committee on Armed Services. Preparedness Investigation Subcommittee,1967 **Gradual Failure** Office of Air Force History,United States Air Force,2015-03-08 The United States Air Force reached its nadir during the opening two years of the Rolling Thunder air campaign in North Vietnam Never had the Air Force operated with so many restraints and to so little effect These pages are painful but necessary reading for all who care about the nation s military power Jacob Van Staaveren wrote this book in the 1970s near the end of his distinguished government service which began during the occupation of Japan the University of Washington Press published his book on that experience in 1995 He was an Air Force historian in Korea during the Korean War and he began to write about the Vietnam War while it was still being fought His volume on the air war in Laos was declassified and published in 1993 Now this volume on the air war in North Vietnam has also been declassified and is being published for the first time Although he retired to McMinnville Oregon a number of years ago we asked him to review the manuscript and make any changes that seemed warranted For the most part this is the book he wrote soon after the war **The Vietnam War: Air war, North Vietnam** ,1988
