Myocardial Protection by Calcium Antagonists Lionel H. Opie,1994-08-16 About the Book There are vast amounts of new data emerging in the study of calcium antagonist drugs The major issues involved are no longer just the effects of calcium antagonist drugs in angina or hypertension but their possible postinfarct protective effects both to provide prophylaxis and to improve left ventricular function New trials have also changed our thinking One major trial suggested that the use of one of these agents in postinfarct patients with no history of heart failure in the acute infarct stage was not only safe but could confer positive protection from reinfarction and possibly from sudden death Another study also in postinfarct patients but with a different agent has drawn attention to a further unexpected benefit namely improvement of mechanical diastolic function In the area of hypertension the emphasis has shifted to the regression of left ventricular hypertrophy now recognized as an independent risk factor for cardiovascular mortality and to diastolic dysfunction Looking to the future calcium antagonists may exert protection against end stage heart failure by limiting left ventricular hypertrophy and by vascular beneficial effects There is emerging interest that the combination with ACE inhibitors may exert additive effects on control of hypertension and on diabetic hypertensive renal lesions Reviews of Other Books by the Author *Drugs for the Heart* A gem *New England Journal of Medicine* The Heart The subjects are brilliantly illuminated and made exciting by excellent line diagrams The *Lancet* **Angiotensin Converting Enzyme Inhibitors Scientific Basis for Clinical Use** A milestone *British Medical Journal* **The Diabetic Male's Essential Guide to Living Well** Joseph Juliano,2025-10-16 An up beat take charge daily health care manual for the diabetic Dr Juliano's book pulls no punches about the seriousness of diabetes he has been blind for fifteen years due to his disease and he draws on his own experience to offer hard won day to day advice He discusses insulin and other medications and stresses the importance of self home blood glucose monitoring exercise and good nutrition He is honest about possible long term complications to the diabetic eye kidney and vascular systems and problems such as male pattern baldness and erectile dysfunction Above all he believes in positive thinking to help the diabetic live well There are a resource guide bibliography and selected readings **Progress in Inorganic Chemistry, Volume 55** Kenneth D.
