Meaning, Expression and Thought Wayne A. Davis, 2002-11-11 This philosophical treatise on the foundations of semantics is a systematic effort to clarify deepen and defend the classical doctrine that words are conventional signs of mental states principally thoughts and ideas and that meaning consists in their expression This expression theory of meaning is developed by carrying out the Gricean programme explaining what it is for words to have meaning in terms of speaker meaning and what it is for a speaker to mean something in terms of intention But Grice's own formulations are rejected and alternatives developed The foundations of the expression theory are explored at length and the author develops the theory of thought as a fundamental cognitive phenomenon distinct from belief and desire argues for the thesis that thoughts have parts and identifies ideas or concepts with parts of thoughts This book will appeal to students and professionals interested in the philosophy of language

Rifkin, 2004-11-01 Conventional wisdom views anger as red hot yelling and screaming a force to be feared and repressed But psychotherapist John Rifkin views anger in a revolutionary way as the natural energy created to heal one's emotional injuries In The Healing Power of Anger Rifkin explains how to identify dysfunctional uses of anger so that readers can unbend it and become empowered and self-nurturing To do so he explains his Stop Drop and Roll system which he's used with clients for more than 20 years In addition Rifkin explores the childhood roots of anger the spectrum of angry behavior how anger can be a gift to a relationship and ice cold passive aggressive anger

Anger and Aggression J. R. Averill, 2012-12-06 In recent years a great deal has been written on the topic of aggression another book on the same topic might seem superfluous at this time However the present volume is not just or even primarily about aggression It is rather a book on anger Anger and aggression are closely related phenomena and it is not possible to discuss one without the other Yet not all anger is aggressive nor can all aggression be attributed to anger Therefore somewhat different considerations apply to each Even more importantly the type of theoretical generalizations one can make differs depending upon whether the primary focus is on anger or aggression The present volume is subtitled an essay on emotion This indicates that the generalizations to be drawn have more to do with emotional responses e.g. grief love envy etc than with various forms of aggression e.g. riots war crimes of violence etc Stated somewhat differently anger is here being used as a paradigm case for the study of emotion not for the study of aggression

Anger and Forgiveness Martha Craven Nussbaum, 2016 In this volume based on her 2014 Locke Lectures Martha C. Nussbaum provides a bracing new view that strips the notion of forgiveness down to its Judeo-Christian roots where it was structured by the moral relationship between a score-keeping God and penitent self-abasing and erring mortals

Aristotle on What Emotions Are Giles Pearson, 2024-07-31 This book provides the first systematic interpretation of

what Aristotle thinks occurrent emotions are and points to some philosophical merits of his account It is argued that he holds that emotions are representational pleasures or distresses that are formed in response to other intentional states that apprehend their objects Even this bare formulation of his view is notable in several respects First the idea that the pleasures or distresses of emotions are representational directed at objects in the world or ourselves contrasts sharply with accounts that identify emotions with non representational sensations or feelings Second the notion that emotions are pleasurable or distressful responses to other intentional states that apprehend their objects provides a fundamental contrast with many current accounts which instead view emotions as in part modes of apprehension or kinds of epistemic state themselves Third Aristotle s view stands in opposition to motivational accounts of emotions insofar as while he thinks that emotions interact with desires or motivational states in important ways he does not think they are themselves even in part motivational states They are representational pleasures or distresses alone Together these three points give Aristotle a novel understanding of the representational role emotions play namely neither descriptive nor prescriptive but reactive Besides developing these ideas both textually and philosophically the book also explores how Aristotle individuates emotion types his understanding of the material dimension of emotions and how his view can provide a novel explanation of recalcitrant emotions a notoriously problematic phenomenon for many recent accounts of emotions
