Aircraft Woodwork Revised Edition:

Leonard Bailey and his Woodworking Planes Paul Van Pernis, John G. Wells, 2019-11-30 New Englander Leonard Bailey was one of the inventive geniuses of the American Industrial Revolution. His designs and patented inventions solved problems with woodworking planes that had plagued craftsmen for centuries. His planes allowed woodworkers to transition from the age of wooden carpenter's planes to modern metallic fully adjustable planes suitable for any kind of woodworking. His plane designs are still in use throughout the world and are essentially unchanged from the planes he first made in the 1860s. He deserves more credit than he has received among America's great inventors. This book covers the thirty-two year period in Leonard Bailey's life between 1852 when he began inventing, making and selling woodworking tools in Winchester, Massachusetts, through his years at the Stanley Rule Level Company from 1869-1874 and ends in 1884 when he worked in Hartford, Connecticut and sold his Victor Tool business to the Stanley Rule Level Company. [Guide to the Makers of American Wooden Planes](#) Thomas L. Elliott, 2018-09-07 With its initial publication in 1983, *A Guide to the Makers of American Wooden Planes* profoundly transformed the emphasis and direction of tool collecting. After several years of meticulous research, Thomas L. Elliott has completely redesigned, revised and expanded this fifth edition to include entries and information accumulated since the fourth edition. The heart of this guide is the alphabetical directory of plane makers and dealers. This fifth edition now includes 4590 biographical entries, 6160 imprint illustrations, 3030 wedge outlines and over 3000 individual ratings for judging relative scarcity and value. Also included are sections providing insights helpful in buying and selling planes, an illustrated glossary of plane terms and styles and an extensive bibliography for further research. This book is useful to both the beginner and the advanced collector, to historians and genealogists and to all others with an interest in the subject. [Official History of the Ministry of Munitions Volume V: Wages and Welfare](#) HMSO, 2012-09-03 Volume V of XII. The foundation of the Munitions Ministry was a revolutionary step coinciding with the shells scandal in which the failure of a series of British attacks at Neuve Chapelle, Aubers Ridge, Festubert and Loos was blamed on inadequate supplies of munitions. A press outcry was followed by questions in Parliament which threatened to bring down the Government. The Ministry was set up in response. Previously the War Office had been responsible for designing, ordering and inspecting ammunition factories and stores. But a year of war on a scale never foreseen, the creation of armies larger than ever contemplated and the demand for unprecedented quantities of material showed the absolute necessity of providing centralised direction of mass war production. The Great War completely upset normal industrial conditions. Preparing this history of the Ministry of Munitions was started during the War itself. It was felt that consulting the officials concerned whilst they were still in post was vital, particularly as many such posts were temporary and while the questions with which the history would deal were vividly present in their minds. Volume V concerns Control of Men's Wages, Control of Women's Wages, Welfare, The Control of Working Conditions, The Provision of Canteens, Provision for the Housing of Munition Workers.
