Airliners In Flight:

Civil Airliner Flight Guidance Technology for Four-Dimensional Trajectory-Based Operation Guangwen Li, Shaobo Zhai, Qiuling Jia, 2024-09-16 This book focuses on achieving precision guidance and timely arrival in flight. The content comprehensively describes the civil aircraft flight guidance technology for four-dimensional trajectory-based operation. The main content of this book is the summary of the author's team's research work on flight management systems and flight guidance technology over the past decade, including flight plan analysis and transition path construction, four-dimensional trajectory planning and re-planning, high-precision flight guidance commands calculation, FMS landing system, etc. The theoretical methods described in the book have been verified by pre-research and practical engineering projects, which are of great theoretical significance and engineering application value. This book is used as a reference for engineers engaged in flight control, flight guidance, and flight management research, as well as Masters and Ph.D.s in related disciplines.

Advanced Aircraft Flight Performance Antonio Filippone, 2012-12-17 This unique book deals with the aeroplane at several levels and aims to simulate its flight performance using computer software. **Airline Terrorism** Marc E. Vargo, 2024-04-25 Venturing into the ever-shifting panorama of airborne terrorism, this book immerses the reader in a vivid retelling of pivotal incidents from recent history while delving into the terrorists' favored methods of attack. These include hijackings, in-flight bombings, and precision missile strikes, as well as the rising peril of cyberattacks aimed at airports and commercial airliners mid-flight. Readers will encounter the controversial TWA Flight 800 disaster and the baffling vanishing act of Malaysia Airlines Flight 370. These events ignited enduring discussions about terrorism and governmental transparency. The book ventures into the unsettling world of the September 11th attacks, where jetliners were transformed into guided missiles. Also witnessed are the chilling tales of Black Widows, Chechen female suicide bombers leaving their indelible mark on Russian soil. Also explored are Libyan culpability in the bombings of Pan Am Flight 103 over Lockerbie, Scotland, and UTA Flight 772 over the Sahara Desert. The evolution of security measures in air travel is chronicled, and an examination is given of emerging biometric technologies along with security protocols relevant to the post-Covid era. **AIR CRASH INVESTIGATIONS, FLYING COFFIN? The Near Crash of Olympic Airlines Flight OA202** Pete Collins, editor, 2012-07-01 The Lockheed 1011 registered A6 BSM, operated by Star Jet and chartered by Olympic Airlines, arrived on 4 July 2005 at Terminal 1 at Paris Charles de Gaulle airport. Departure was delayed because the forward hold door could not be closed. A mechanic tried to close the door manually with a hammer and a chuck. Some passengers worried about the apparent state of the cabin and the noise, asked to disembark, and this led to a mass movement. The airplane took off finally at 16h17. Shortly after departure, the crew noticed problems with engine number 3. The captain requested the SEVERE DAMAGE procedure and returned to the airport. The French Bureau d'Enquêtes et d'Analyses pour la Sécurité de l'Aviation Civile (BEA) investigated the incident. BEA found out that the aircraft suffered from many problems, such as leaking fuel.
