Billig, 2023-05-04 Airline Operations and Management A Management Textbook presents a survey of the airline industry with a strong managerial perspective It integrates and applies the fundamentals of several management disciplines particularly operations marketing economics and finance to develop a comprehensive overview It also provides readers with a solid historical background and offers a global perspective of the industry with examples drawn from airlines around the world Updates for the second edition include Fresh data and examples A range of international case studies exploring real life applications New or increased coverage of key topics such as the COVID 19 pandemic state aid and new business models New chapters on fleet management and labor relations and HRM Lecture slides for instructors This textbook is for advanced undergraduate and graduate students of airline management but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their functional area **Why Can't We Make Money in Aviation?** Adam M.

Pilarski, 2016-02-11 Seemingly since the beginning of aviation history there has been discussion and speculation on the remarkable inability of the industry to generate profits This is even more so the case now when a number of the world's airlines are bankrupt The failure of aviation or at least of airlines to produce a reasonable rate of return on investments has been a fact pondered by many at great length but never satisfactorily understood Somehow the industry seems to violate the

most basic principles of economics and business The question as to how this is the case and how the industry managed to survive let alone actually grow and prosper so far is the subject of this book It details the historical performance of the industry and critically explores the various theories proposed to explain its lack of profitability Summarizing the analysis the book also looks to the future combining lessons from the past and recommendations regarding the better management of airlines In conclusion it offers a prediction on the future of the global airline industry
