Applied Mechanics Reviews ,1986 **Ocean Science and the British Cold War State** Samuel A. Robinson,2018-05-03

This book focuses on the activities of the scientific staff of the British National Institute of Oceanography during the Cold War. Revealing how issues such as intelligence gathering, environmental surveillance, the identification of enemy science along with administrative practice informed and influenced the Institute's Cold War program. In turn, this program helped shape decisions taken by Government military and the civil service towards science in post-war Britain. This was not simply a case of government ministers choosing to patronize particular scientists but a relationship between politics and science that profoundly impacted on the future of ocean science in Britain. *King Vidor in Focus* Kevin L. Stoeck, Cullen

Gallagher,2024-07-30 King Vidor 1894-1982 had the longest career of any Hollywood director and his works include some of the most dramatic sublime moments in the history of American cinema. Regarded by many film historians as one of the greatest of silent era filmmakers especially for masterworks *The Big Parade*, *The Crowd* and *Show People*. Vidor is nonetheless one of the most underrated of Hollywood's old masters in terms of his overall career. His sound era films include *Hallelujah Street*, *Scene of the Crime*, *The Champ*, *The Stranger's Return*, *Our Daily Bread*, *Stella Dallas*, *The Citadel*, *Northwest Passage*, *Duel in the Sun*, *Beyond the Forest*, *The Fountainhead*, *Ruby Gentry* and *War and Peace*. He also helped to establish the Screen Directors Guild and served as its first president. This book charts the ways in which Vidor's vast complex body of work ranges over diverse genres and styles while also expressing his recurring personal interests in spirituality especially Christian Science, aesthetics, metaphysics, social realism and the myth of America. The first book since 1988 to give a comprehensive view of Vidor's career, it discusses his artistic evolution in a way that appeals to the general reader as well as to the film scholar. Models of Massive Parallelism Max Garzon,2012-12-06

Locality is a fundamental restriction in nature. On the other hand, adaptive complex systems, life in particular, exhibit a sense of permanence and timelessness amidst relentless constant changes in surrounding environments that make the global properties of the physical world the most important problems in understanding their nature and structure. Thus much of the differential and integral Calculus deals with the problem of passing from local information as expressed for example by a differential equation or the contour of a region to global features of a system's behavior: an equation of growth or an area. Fundamental laws in the exact sciences seek to express the observable global behavior of physical objects through equations about local interaction of their components on the assumption that the continuum is the most accurate model of physical reality. Paradoxically, much of modern physics calls for a fundamental discrete component in our understanding of the physical world. Useful computational models must be eventually constructed in hardware and as such can only be based on local interaction of simple processing elements.

Japan's Imperial Army Edward J. Drea, 2016-05-03 Popular impressions of the imperial Japanese army still promote images of suicidal banzai charges and fanatical leaders blindly devoted to their emperor Edward Drea looks well past those stereotypes to unfold the more complex story of how that army came to power and extended its influence at home and abroad to become one of the world's dominant fighting forces This first comprehensive English language history of the Japanese army traces its origins evolution and impact as an engine of the country's regional and global ambitions and as a catalyst for the militarization of the Japanese homeland from mid nineteenth century incursions through the end of World

War II Demonstrating his mastery of Japanese language sources Drea explains how the Japanese style of warfare burnished by samurai legends shaped the army narrowed its options influenced its decisions and made it the institution that conquered most of Asia He also tells how the army's intellectual foundations shifted as it reinvented itself to fulfill the changing imperatives of Japanese society and how the army in turn decisively shaped the nation's political social cultural and strategic course Drea recounts how Japan devoted an inordinate amount of its treasury toward modernizing professionalizing and training its army which grew larger more powerful and politically more influential with each passing decade Along the way it produced an efficient military schooling system a well organized active duty and reserve force a professional officer corps that thought in terms of regional threat and well trained soldiers armed with appropriate weapons Encompassing doctrine strategy weaponry and civil military relations Drea's expert study also captures the dominant personalities who shaped the imperial army from Yamagata Aritomo an incisive geopolitical strategist to Anami Korechika who exhorted the troops to fight to the death during the final days of World War II Summing up Drea also suggests that an army that places itself above its nation's interests is doomed to failure
