Fantastic Numbers and Where to Find Them Tony Padilla,2022-06-30 What are the mysterious numbers that unlock the secrets of the universe In Fantastic Numbers and Where to Find Them leading theoretical physicist and YouTube star Antonio Padilla takes us on an irreverent cosmic tour of nine of the most extraordinary numbers in physics These include Graham s number which is so large that if you thought about it in the wrong way your head would collapse into a singularity TREE 3 whose finite value could never be reached before the universe reset itself and 10 120 which measures the desperately unlikely balance of energy the universe needs to exist Leading us down the rabbit hole to the inner workings of reality Padilla demonstrates how these unusual numbers are the key to unlocking such mind bending phenomena as black holes entropy and the problem of the cosmological constant which shows that our two best ways of understanding the

universe contradict one another Combining cutting edge science with an entertaining cosmic quest **Fantastic Numbers and Where to Find Them** is an electrifying head twisting guide to the most fundamental truths of the universe **Fantastic Future** Mike Goldsmith, 2004 In 30 years time will you be holidaying on the moon In 100 years time could you genetically engineer your own pet In 1000 years time will you travel through space in an anti matter drive spaceship This eye opening guide predicts the future with a time travelling trip through well time Inside visit vast skyscraper cities make friends with robots and cyborgs colonize far distant galaxies and watch the very last star go out at the end of the universe PLUS Read the Tomorrow s Times news reports from the future discover how to terraform a desert planet and how to create a virtual you If you want to be in the know get The Knowledge
