Forrest,1985 The Community Health Nurse and Alcohol-related Problems: Instructor's curriculum planning guide ,1978 *The Community Health Nurse and Alcohol-related Problems ...* National Center for Alcohol Education,1978 **The Effectiveness and Costs of Alcoholism Treatment** Leonard Saxe,United States. Congress. Office of Technology Assessment,1983 Drug and Alcohol Abuse Marc A. Schuckit,2012-12-06 When this series was conceived a book on substance abuse including alcohol and alcoholism was to be of the highest priority This priority was a reflection of my view that the subject is often inadequately or insufficiently taught in many training programs Few clinicians have had comprehensive didactic education in this area despite the frequency with which these problems are encountered in practice All too often these encounters are in situations in which accurate diagnosis and rapid treatment are of critical importance We wanted a book that would be concise and easily readable but also comprehensive in its presentation of the basic principles underlying clinical manifestations diagnosis and management It was of particular importance that the book also serve as an easy reference guide in emergency situations Marc Schuckit a man with impeccable credentials as a scholar and an experienced clinician in this field produced just such a book with his critically acclaimed first edition That volume rapidly became a resource of great significance for psychiatrists psychotherapists and physicians in general It has been adopted as a text in medical schools and residency training as well as for courses in psychology emergency medicine social work and nursing The entire volume has been revised and updated to reflect changes in knowledge and clinical practice since the publication of the first edition and in order to keep the comprehensive references

current There is a new chapter on phencyclidine and another on caffeine and nicotine *Practical Approaches to Alcoholism Psychotherapy* Sheldon Zimberg, 2013-06-29

Sodetal attitudes toward alcoholism are characterized by several types of denial with disastrous personal and social consequences Refusal to admit the extent of alcoholism as a major national health problem leads to a public policy which allocates relatively few resources to research prevention treatment or rehabilitation On an individual basis the combination of socially approved drinking and the stigma assigned to the chronic alcoholic results in individuals blinding themselves to the existence of the problem in family friend and self until it has reached such an advanced or obvious degree that denial is no longer possible There is the third kind of denial exemplified by therapeutic despair which proclaims that gaps in knowledge of the cause of alcoholism are so great and failures to treat alcoholics successfully so dramatic that there is no assurance that efforts will lead to a positive outcome This denial is perhaps the most troublesome because it reflects an attitude of therapeutic helplessness It discourages families from seeking help and it reinforces the tendency of physicians and other human services workers to overlook the presence of alcoholism as they treat its physical social and economic consequences Denial frequently surrounds those who treat alcoholics with an aura of hopelessness which itself is a negative therapeutic force

The Biology of Alcoholism Benjamin Kissin, 2012-12-06 Pathogenesis is defined in Blakiston s Medical Dictionary as the course of development of disease including the sequence of processes or events from inception to the characteristic lesion or disease The central position of the word pathogenesis in the

titles of Volumes 6 and 7 in itself connotes a bias on the part of the editors in favor of the disease concept of alcoholism inasmuch as the end product of the pathogenetic process is presumed to be a disease. But the disease model as here conceptualized is vastly different from that of Jellinek or of Alcoholics Anonymous or of psychoanalysis. In those theories alcoholism is seen as the inevitable consequence of some specific flaw in the heredity or the experience of the afflicted individual that inexorably leads to alcoholism. In these present volumes the alcoholic syndrome is viewed rather as the outgrowth of the interaction of a variety of biological, psychological, and social influences which, depending on the predominance of one or another, may lead to different types of alcoholism. This view, which has been labeled the bio-psycho-social perspective, encompasses a larger view of the dynamics of the development of alcoholism, incorporating data from each of the phenomenologic levels involved. An additional complication arises from the fact that the physiological and psychosocial stigmata of alcoholics, which are probably most often the result of prolonged drinking, frequently have come to be considered as causes of the disease.
