Articulate Energy:

The Energy Security Paradox Jonna Nyman, 2018 The decisions we make about energy shape our present and our future From geopolitical tension to environmental degradation and an increasingly unstable climate these choices infiltrate the very air we breathe Energy security politics has direct impact on the continued survival of human life as we know it and the earth cannot survive if we continue consuming fossil energy at current rates The low carbon transition is simply not happening fast enough and change is unlikely without a radical change in how we approach energy security But thinking on energy security has failed to keep up with these changing realities Energy security is primarily considered to be about the availability of reliable and affordable energy supplies having enough energy and it remains closely linked to national security The Energy Security Paradox looks at contemporary energy security politics in the United States and China the top two energy consumers and producers Based on in depth empirical analysis it demonstrates that current energy security practices actually lead to a security paradox they produce insecurity To illustrate this it develops the energy security paradox as a framework for understanding the interconnected insecurities produced by current practices However it also goes beyond this examining resistance to current practices to highlight that we not only can do energy security differently this is already happening In the process the volume demonstrates that the value of security depends on the context Based on this The Energy Security Paradox proposes a radical reconsideration of how we approach and practice energy security *At Home in Time* Patrick Deane, 1994 Patrick Deane argues that modern English poetry in some key aspects is deeply indebted to the classical tradition and more particularly to the attitudes and modes of the eighteenth century He illustrates how neo Augustan values are apparent in the works of T S Eliot W H Auden Louis MacNeice A D Hope Donald Davie Charles Tomlinson and others *Articulate Energy* Donald Davie, 1971 *Energy challenge Badge* Food and Agriculture Organization of the United Nations, 2019-12-12 The purpose of the United Nations Challenge Badges is to raise awareness educate and most of all motivate young people to change their behaviour and be active agents of change in their local communities Challenge Badges are appropriate for use with school classes and youth groups and are endorsed by WAGGGS and WOSM They include a wide range of activities and ideas that can easily be adapted by teachers or leaders Additional badges are available or are being developed on a number of other topics including Agriculture Biodiversity Climate Change Forests Gender Governance Hunger Nutrition the Ocean Soils and Water The ENERGY CHALLENGE BADGE is designed to show the crucial role energy plays for life on our planet as well as for our daily lives The badge looks at the different sources of energy considers how people use energy and how our planet is affected by it and motivates young people to save energy and to engage in efforts to increase access to clean energy **Mackenzie Pipeline** Peter H.
