## **Artificial Believers The Ascription Of Belief:**

**Artificial Believers** Afzal Ballim, Yorick Wilks, 1991 First Published in 1991 Routledge is an imprint of Taylor Francis an informa company Artificial Believers Afzal Ballim, Yorick Wilks, 2013-02-01 Modeling of individual beliefs is essential to the computer understanding of natural languages Phenomena at all levels syntactic semantic and pragmatic cannot be fully analyzed in the absence of models of a hearer and of the hearer s model of other believers The heart of this text is the presentation of an artificial intelligence AI program intended to simulate certain aspects of a human believer This book provides a prolog program Viewgen that maintains belief structures about the world and other believers and is able to ascribe beliefs to others without direct evidence by using a form of default reasoning The authors contend that a plausible model such as this can in the best cognitive science tradition shed light on the long standing philosophical problem of what belief is The issues presented here will be of considerable interest to an informed general reader as well as those with a background in any of the disciplines that make up what is now called cognitive science philosophy linguistics psychology neuropsychology and also AI itself **Intelligent Tutoring Systems** Claude Frasson, Gilles Gauthier, Alan Lesgold, 1996-05-29 This book presents the refereed proceedings of the Third International Conference on Intelligent Tutoring Systems ITS 96 held in Montreal Canada in June 1996 The book contains 69 revised papers selected from a total of 128 submissions also included are six invited papers from well known speakers All in all the book reflects the state of the art in the area In particular the following topics are covered advising systems ITS architectures cognitive models design issues empirical studies formal models learning environments real world applications software tools for tutoring student modelling teaching and learning strategies and multimedia and WWW **Affective Computing and Sentiment Analysis** Khurshid Ahmad, 2011-08-24 This volume maps the watershed areas between two holy grails of computer science the identification and interpretation of affect including sentiment and mood The expression of sentiment and mood involves the use of metaphors especially in emotive situations Affect computing is rooted in hermeneutics philosophy political science and sociology and is now a key area of research in computer science The 24 7 news sites and blogs facilitate the expression and shaping of opinion locally and globally Sentiment analysis based on text and data mining is being used in the looking at news and blogs for purposes as diverse as brand management film reviews financial market analysis and prediction homeland security There are systems that learn how sentiments are articulated This work draws on and informs research in fields as varied as artificial intelligence especially reasoning and machine learning corpus based information extraction linguistics and psychology **Computing Meaning** H. Bunt, Reinhard Muskens, 2012-12-06 Computational semantics is concerned with computing the meanings of linguistic objects such as sentences text fragments and dialogue contributions As such it is the interdisciplinary child of semantics the study of meaning and its linguistic encoding and computational linguistics the discipline that is concerned with computations on linguistic objects From one parent computational semantics inherits

concepts and techniques that have been developed under the banner of formal or model theoretic semantics This blend of logic and linguistics applies the methods of logic to the description of meaning From the other parent the young discipline inherits methods and techniques for parsing sentences for effective and efficient representation of syntactic structure and logical form and for reasoning with semantic information Computational semantics integrates and further develops these methods concepts and techniques This book is a collection of papers written by outstanding researchers in the newly emerging field of computational semantics It is aimed at those linguists computer scientists and logicians who want to know more about the algorithmic realisation of meaning in natural language and about what is happening in this field of research There is a general introduction by the editors     Principles of Knowledge Representation and Reasoning Jon Doyle,Erik Sandewall,Pietro Torasso,1994 The proceedings of KR 94 comprise 55 papers on topics including deduction an search description logics theories of knowledge and belief nonmonotonic reasoning and belief revision action and time planning and decision making and reasoning about the physical world and the relations between KR     **Computer Applications for Handling Legal Evidence, Police Investigation and Case Argumentation** Ephraim Nissan,2012-06-15 This book provides an overview of computer techniques and tools especially from artificial intelligence AI for handling legal evidence police intelligence crime analysis or detection and forensic testing with a sustained discussion of methods for the modelling of reasoning and forming an opinion about the evidence methods for the modelling of argumentation and computational approaches to dealing with legal or any narratives By the 2000s the modelling of reasoning on legal evidence has emerged as a significant area within the well established field of AI Law An overview such as this one has never been attempted before It offers a panoramic view of topics techniques and tools It is more than a survey as topic after topic the reader can get a closer view of approaches and techniques One aim is to introduce practitioners of AI to the modelling legal evidence Another aim is to introduce legal professionals as well as the more technically oriented among law enforcement professionals or researchers in police science to information technology resources from which their own respective field stands to benefit Computer scientists must not blunder into design choices resulting in tools objectionable for legal professionals so it is important to be aware of ongoing controversies A survey is provided of argumentation tools or methods for reasoning about the evidence Another class of tools considered here is intended to assist in organisational aspects of managing of the evidence Moreover tools appropriate for crime detection intelligence and investigation include tools based on link analysis and data mining Concepts and techniques are introduced along with case studies So are areas in the forensic sciences Special chapters are devoted to VIRTOPSY a procedure for legal medicine and FLINTS a tool for the police This is both an introductory book possibly a textbook and a reference for specialists from various quarters     Construing Experience Through Meaning M.A.K. Halliday,Christian Matthiessen,2006-05-16 The subject of this book is how human beings construe their experience of the world The construction of experience is usually thought of as knowledge represented in the form of conceptual taxonomies

schemata scripts and the like The authors offer an interpretation that is complementary to this treating experience not as knowing but as meaning and hence as something that is construed in language In other words the concern is with the construal of human experience as a semantic system and since language plays the central role not only in storing and exchanging experience but also in construing it language is taken as the interpretative base The focus of the book is both theoretical and descriptive The authors consider it important that theory and description should develop in parallel with constant interchange between the two The major descriptive component is an account of the most general features of the ideational semantics of English which is then exemplified in two familiar text types recipes and weather forecasts There is also a brief reference to the semantics of Chinese Theoretical issues are raised throughout as they become relevant to the discussion with the theoretical base being drawn from systemic functional linguistics Both the theoretical and descriptive proposals offered in the book are compared and contrasted with approaches deriving from AI cognitive science and cognitive linguistics

Envisioning Machine Translation in the Information Future John S. White,2003-07-31 Envisioning Machine Translation in the Information Future When the organizing committee of AMTA 2000 began planning it was in that brief moment in history when we were absorbed in contemplation of the passing of the century and the millennium Nearly everyone was comparing lists of the most important accomplishments and people of the last 10 100 or 1000 years imagining the radical changes likely over just the next few years and at least mildly anxious about the potential Y2K apocalypse The millennial theme for the conference Envisioning MT in the Information Future arose from this period The year 2000 has now come and nothing terrible has happened yet to our electronic infrastructure Our musings about great people and events probably did not ennoble us much and whatever sense of jubilee we held has since dissipated So it may seem a bit obsolete or anachronistic to cast this AMTA conference into visionary themes *Personalized Information Retrieval and Access: Concepts, Methods and Practices* González, Rafael Andrés,Chen, Nong,Dahanayake, Ajantha,2008-03-31 Global information retrieval and anywhere
