Design and Implementation of Symbolic Computation Systems Alfonso Miola,1993-09-02 This volume constitutes the proceedings of the International Symposium on Design and Implementation of Symbolic Computation Systems DISCO 93 held in Gmunden Austria in September 1993 The growing importance of systems for symbolic computation has greatly influenced the decision of organizing this third conference in the series DISCO 93 focuses mainly on the most innovative methodological and technological aspects of the design and implementation of hardware and software systems for symbolic and algebraic computation automated reasoning geometric modeling and computation and automatic programming The general objective of DISCO 93 is to present an up to date view of the field and to serve as a forum insymbolic computation for the scientific exchange among academic industrial and user communities Besides invited talks by Buchberger Monagan Omodeo and Hong the volume contains 28 contributions carefully selected by a highly competent international program committee from a total of 56 submissions *Design and Implementation of Symbolic Computation Systems* Jacques Calmet,Carla Limongelli,1996-09-04 This book presents the refereed proceedings of the Fourth International Symposium on Design and Implementation of Symbolic Computation Systems DISCO 96 held in Karlsruhe Germany in September 1996 The volume includes four invited contributions surveying the state of the art in a particular subfield or pointing to some new research directions together with 31 revised full papers selected from a total of some 70 submissions Many current aspects of mathematical software systems as employed e g in computer algebra automated theorem proving or al gebraic specification are addressed **Design and Implementation of Symbolic Computation Systems** John Fitch,1993-09-02 DISCO 92 was held on the Newton Park campus of Bath College of Higher Education England April 13 15 1992 Beside the formal lectures dedicated to design and implementation issues of computer algebra there were several software demonstrations and an opportunity for system designers to compare systems This volume presents the proceedings of the conference It contains 18 papers on a variety of design and implementation issues One general theme which clearly emerges is the need for interconnections between systems as no one systems incorporates all the facilities that users want Various effortsare being made to design such links but generally in limited contexts suchas the Maple project or the Posso project

Conference,1991 AISB91 is the eighth conference organized by the Society for the Study of Artificial Intelligence and Simulation of Behaviour It is not only the oldest regular conference in Europe on AI which spawned the ECAI conferences in 1982 but it is also the conference that has a tradition for focusing on research as opposed to applications The 1991 edition of the conference was no different in this respect On the contrary research and particularly newly emerging research dir ections such as knowledge level expert systems research neural networks and emergent functionality in autonomous agents was strongly emphasised The conference was organized around the following sessions dis tributed intelligent agents situatedness and emergence in autonomous agents new modes of reasoning the knowledge level perspective and theorem proving and machine learning Each of these sessions is discussed below in more detail DISTRIBUTED INTELLIGENT AGENTS Research in distributed AI is concerned with the problem of how multiple agents and societies of agents can be organized to co operate and collectively solve a problem The first paper by Chakravarty MIT focuses on the problem of evolving agents in the context of Minsky s society of mind theory It addesses the question of how new agents can be formed by transforming existing ones and illustrates the theory with an example from game playing Smieja GMD Germany focuses on the problem of organizing networks of agents which consist internally of neural networks
