Artificial Morality Virtuous Robots For Virtual Games:

Artificial Morality Peter Danielson,1992 Explores the role of artificial intelligence in the development of a claim that morality is person made and rational

Artificial Morality Peter Danielson,2002-03-11 This book explores the role of artificial intelligence in the development of a claim that morality is person made and rational Professor Danielson builds moral robots that do better than amoral competitors in a tournament of games like the Prisoners Dilemma and Chicken The book thus engages in current controversies over the adequacy of the received theory of rational choice It sides with Gauthier and McClennan who extend the devices of rational choice to include moral constraint Artificial Morality goes further by promoting communication testing and copying of principles and by stressing empirical tests

Springer Handbook of Robotics Bruno Siciliano,Oussama Khatib,2008-05-20 With the science of robotics undergoing a major transformation just now Springer s new authoritative handbook on the subject couldn t have come at a better time Having broken free from its origins in industry robotics has been rapidly expanding into the challenging terrain of unstructured environments Unlike other handbooks that focus on industrial applications the Springer Handbook of Robotics incorporates these new developments Just like all Springer Handbooks it is utterly comprehensive edited by internationally renowned experts and replete with contributions from leading researchers from around the world The handbook is an ideal resource for robotics experts but also for people new to this expanding field

Making Moral Sense Logi Gunnarsson,2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality

Platonistic and Disenchanting Theories of Ethics Hugh Storer Chandler,2007 Original Scholarly Monograph

[Empirically Informed Ethics: Morality between Facts and Norms](#) Markus Christen,Carel van Schaik,Johannes Fischer,Markus Huppenbauer,Carmen Tanner,2013-10-07 This volume provides an overview of the most recent developments in empirical investigations of morality and assesses their impact and importance for ethical thinking It involves contributions of scholars both from philosophy theology and empirical sciences with firm standings in their own disciplines but an inclination to step across borders in particular the one between the world of facts and the world of norms Human morality is complex and probably even messy and this clean distinction becomes blurred whenever one looks more closely at the various components that enable and influence our moral actions

and ethical orientations In that way morality may indeed be located between facts and norms and an empirically informed ethics that is less concerned with analytical purity but immerses into this moral complexity may be an important step to make the contributions of ethics to this world more valuable and relevant

Computer Aided Systems Theory - EUROCAST

2001 Roberto Moreno-Díaz, Bruno Buchberger, Jose-Luis Freire, 2003-08-14 The concept of CAST as Computer Aided Systems Theory was introduced by F Pichler in the late 1980s to include those computer theoretical and practical developments as tools to solve problems in System Science It was considered as the third component the other two being CAD and CAM necessary to build the path from Computer and Systems Sciences to practical developments in Science and Engineering The University of Linz organized the first CAST workshop in April 1988 which demonstrated the acceptance of the concepts by the scientific and technical community Next the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST Las Palmas February 1989 under the name EUROCAST 89 This was a very successful gathering of systems theorists computer scientists and engineers from most European countries North America and Japan It was agreed that EUROCAST international conferences would be organized every two years alternating between Las Palmas de Gran Canaria and a continental European location Thus successive EUROCAST meetings have taken place in Krems 1991 Las Palmas 1993 Innsbruck 1995 Las Palmas 1997 and Vienna 1999 in addition to an extra European CAST Conference in Ottawa in 1994

Liberty, Games and Contracts Malcolm Murray, 2016-05-06 Jan Narveson is one of the most significant contemporary defenders of the libertarian political position Unlike other libertarians who typically defend their view with reference to natural rights or an appeal to utilitarianism Narveson s main contribution has been to offer a philosophical defence of libertarianism based on a Hobbesian individualist contractarian ethic Critiques of Narveson s contractarian libertarianism fall into three categories those that reject contractarian moral theory those that reject any link between contractarianism and libertarianism and those that accuse libertarians of conflating liberty with property In this book Malcolm Murray brings together the most significant of Narveson s critics and presents their work alongside replies by Jan Narveson

The Good Rebel Louis Groarke, 2002 He argues that people can only be free if they are in some robustly objective sense both rational and moral He develops a positive theory of personal freedom derived from a concept of good rebellion Individuals who rebel against an oppressive society for the sake of an objective good furnish the most conspicuous example of human freedom in action

Gunkel,2012-07-13 An investigation into the assignment of moral responsibilities and rights to intelligent and autonomous machines of our own making One of the enduring concerns of moral philosophy is deciding who or what is deserving of ethical consideration Much recent attention has been devoted to the animal question consideration of the moral status of nonhuman animals In this book David Gunkel takes up the machine question whether and to what extent intelligent and autonomous machines of our own making can be considered to have legitimate moral responsibilities and any legitimate claim to moral consideration The machine question poses a fundamental challenge to moral thinking questioning the traditional philosophical conceptualization of technology as a tool or instrument to be used by human agents Gunkel begins by addressing the question of machine moral agency whether a machine might be considered a legitimate moral agent that could be held responsible for decisions and actions He then approaches the machine question from the other side considering whether a machine might be a moral patient due legitimate moral consideration Finally Gunkel considers some recent innovations in moral philosophy and critical theory that complicate the machine question deconstructing the binary agent patient opposition itself Technological advances may prompt us to wonder if the science fiction of computers and robots whose actions affect their human companions think of HAL in 2001 A Space Odyssey could become science fact Gunkel s argument promises to influence future considerations of ethics ourselves and the other entities who inhabit this world *Introduction to Formal Philosophy* Sven Ove Hansson,Vincent F.
