Politics in the Global 1960s William Marotti,2023-04-28 Anarchic street performances in late 1950s Japan inauguration of the first Happenings in Antwerp and charging of the magic circle in Amsterdam Bauhaus Situationiste and anti national art exchanges networks and communes As Happener and Art Missionary Yoshio Nakajima s storied career traverses an

astounding range of locations scenes movements media and performance modes in the global 1960s and 1970s in ways that challenge our notions of the possibilities of art Nakajima repeatedly plays a role in jump starting spaces of possibility from Tokyo to Ubbesbodavägen from Spui Square and the Dutch Provo's to Antwerp and Sweden Despite this Nakajima's work has paradoxically been largely excluded from accounts where it might have justifiably featured The present volume represents an international collaboration of researchers working to remedy this oversight Nakajima's work demands a reconceptualization of narratives of this art and politics and their specific interrelation to consider his exemplary nonconformity and its exemplary exclusion This history demonstrates the inadequacy of notions of specificity that would oppose an authentic local or national frame to an inauthentic transnational one Conversely Nakajima manifests a key dimension of the 1960s as a global event in the interrelation between eventfulness itself and the redrawing of categories of practice and understanding

Religion, Space, and the Environment Sigurd Bergmann, 2017-07-05 Religions often nurture important skills that help believers locate themselves in the world Religious perceptions practices emotions and beliefs are closely interwoven with the environments from which they emerge Sigurd Bergmann's driving emphasis here is to explore religion not in relation to but as a part of the spatiality and movement within the environment from which it arises and is nurtured Religion Space and the Environment emerges from the author's experiences in different places and continents over the past decade At the book's heart lie the questions of how space place

and religion amalgamate and how lived space and lived religion influence each other Bergmann explores how religion and the memory of our past impact our lives in urban spaces how the sacred geographies in Mayan and northeast Asian lands compare to modern eco spirituality and how human images and practices of moving in with and through the land are interwoven with the processes of colonization and sacralising and the practices of power and visions of the sacred among other topics

The Analysis of Performance Art Anthony Howell,A. Howell,2013-11-05 This finely illustrated book offers a simple yet comprehensive grammar of a new discipline Performance Art first became popular in the fifties when artists began creating happenings Since then the artist as a performer has challenged many of the accepted rules of the theatre and radically altered our notion of what constitutes visual art This is the first publication to outline the essential characteristics of the field and to put forward a method for teaching the subject as a discipline distinct from dance drama painting or sculpture Taking the theory of primary and secondary colours as his model Anthony Howell posits three primaries of action and shows how these may be mixed to obtain a secondary range of actions Based on a taught course the system is designed for practical use in the studio and is also entertaining to explore Examples are cited from leading performance groups and practitioners such as Bobbie Baker Orlan Stelarc Annie Sprinkle Robert Wilson Goat Island and Station House Opera This volume however is not just an illustrated grammar of action it also shows how the syntax of that grammar has psychoanalytic repercussions This enables the performer to relate the system to lived experience ensuring a realisation that meaning is being dealt with through these actions and that the system set forth is more than a dry structuring of the characteristics of movement Freud's notion of transference and Lacan's understanding of repetition are compared to a performer's usage of the same terms Thus the book provides a psychoanalytic critique of performance at the same time as it outlines an efficient method for creating live work on both fine art and theatre courses
