write a review on google books *Art, Aesthetics, and the Brain* Joseph P. Huston, Marcos Nadal, Francisco Mora, Luigi F. Agnati, Camilo José Cela Conde, 2015-06-25 Humans have engaged in artistic and aesthetic activities since the appearance of our species Our ancestors have decorated their bodies tools and utensils for over 100 000 years The expression of meaning using color line sound rhythm or movement among other means constitutes a fundamental aspect of our species biological and cultural heritage Art and aesthetics therefore contribute to our species identity and distinguish it from its living and extinct relatives Science is faced with the challenge of explaining the natural foundations of such a unique trait and the way cultural processes nurture it into magnificent expressions historically and ethnically unique How does the human brain bring about these sorts of behaviors What neural processes underlie the appreciation of painting music and dance How does training modulate these processes How are they impaired by brain lesions and neurodegenerative diseases How did such neural underpinnings evolve Are humans the only species capable of aesthetic appreciation or are other species endowed with the rudiments of this capacity This volume brings together the work on such questions by leading experts in genetics psychology neuroimaging neuropsychology art history and philosophy It sets the stage for a cognitive neuroscience of art and aesthetics understood in the broadest possible terms With sections on visual art dance music neuropsychology and evolution the breadth of this volume s scope reflects the richness and variety of topics and methods currently used today by scientists to understand the way our brain endows us with the faculty to produce and appreciate art and aesthetics Cognitive Processes in the Perception of Art W.R. Crozier, A.J. Chapman, 1984-06-01 This book reviews progress and describes original research in the cognitive psychology of the arts The invited contributors are leading authorities and the topics which they cover include psychological approaches to symbols and meaning in art issues in experimental aesthetics the development in children of artistic production and appreciation and the perception of musical and pictorial material *Science, Art and Nature in Medieval and Modern Thought* A.C. Crombie, 1990-07-01 The author sees the history of Western Science as the history of a vision and an argument initiated by the ancient Greeks in their search for principles at once of nature and of argument itself This scientific vision explored and controlled by argument and the diversification of both vision and argument by scientific experience and by interaction with the wider contexts of intellectual culture constitute the long history of European scientific thought Underlying that development have been specific commitments to conceptions of nature and of science and its intellectual and moral assumptions accompanied by a recurrent critique their diversification has generated a series of different styles of scientific thinking and of making theoretical and practical decisions which the work describes

Art and Illusionists Nicholas Wade, 2015-10-12 We delight in using our eyes particularly when puzzling over pictures Art and illusionists is a celebration of pictures and the multiple modes of manipulating them to produce illusory worlds on flat surfaces This has proved fascinating to humankind since the dawning of depiction Art and illusionists is also a celebration of the ways we see pictures and of our ability to distil meaning from arrays of contours and colours Pictures are not only a

source of fascination for artists who produce them but also for scientists who analyse the perceptual effects they induce Illusions provide the glue to cement the art and science of vision Painters plumb the art of observation itself whereas scientists peer into the processes of perception Both visual artists and scientists have produced patterns that perplex our perceptions and present us with puzzles that we are pleased to peruse Art and illusionists presents these two poles of pictorial representation as well as presenting novel perceptual portraits of the artists and scientists who have augmented the art of illusion The reader can experience the paradoxes of pictures as well as producing their own by using the stereoscopic glasses enclosed and the transparent overlay for making dynamic moir patterns

An Introduction to Communication Studies Sheila Steinberg,2007 In this introductory textbook the author contextualises approaches and theories on communication studies by making use of local examples from the mass media as well as relevant political and social experiences The book is divided into two parts The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies Each chapter starts with the learning Outcomes and a short overview of the chapter Students can monitor their learning by using the summaries and test yourself questions at the end of every chapter Scenarios provide examples of how the theory can be applied in practice This makes for a learner friendly and accessible book which will prove invaluable to Students and professionals alike Beginner students majoring in Communication Studies as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful

Art and Philosophy ,2025-05-05 Though a field often thought far from the center of contemporary philosophy philosophy of art perhaps more than any other field similarly situated nevertheless enjoys extensive overlap with and points of exchange at that center The last decade has seen a marked resurgence of interest in aesthetics and philosophy of art from those working outside these areas and a reciprocal

resurgence of interest in other subfields from philosophers of art Art and Philosophy brings together twenty one original essays at the intersection of art and philosophy These essays are intersectional in two respects Firstly the authors draw meaningful connections between art and philosophy using artworks to motivate support and shape their views Secondly the authors draw connections between the theoretical discipline of aesthetics and philosophy of art on the one hand and the rest of philosophy on the other Some chapters explore philosophical matters by examining art and other aesthetic objects whilst others bring together contemporary thought and research in aesthetics and philosophy of art with important developments in other areas of philosophy The chapters are organized into ten sections These ten sections represent the current issues best exemplifying the productive and informative exchanges that exist at these intersections The topics range from metaphysics and philosophy of language to creativity and love By placing the connection to art at the forefront Art and Philosophy is a testament to the myriad ways art and the philosophy of art intersect and overlap with issues that lie at the core of contemporary philosophy

Making Theory/Constructing Art Daniel Alan Herwitz, Daniel Herwitz, 1996-05-15 Artists and critics regularly enlist theory in the creation and assessment of artworks but few have scrutinized the art theories themselves Here Daniel examines and critiques the norms assumptions historical conditions and institutions that have framed the development and uses of art theory Spurred by the theoretical claims of Arthur Danto a leader in the philosophy of the avant garde Herwitz reexamines the art and theory of major figures in the avant garde movement including John Cage Jean Francois Lyotard Jean Baudrillard and Andy Warhol

Making Theory/Constructing Art Daniel Herwitz, 1993-11 Artists and critics regularly enlist theory in their creation and assessment of artworks but few have scrutinized the art theories themselves Making Theory Constructing Art On the Authority of the Avant Garde is among the first philosophical texts to provide a close encounter with this theoretical tendency in twentieth century art and aesthetics exploring the norms assumptions historical conditions and institutions that have framed the development and uses of theory in art In a series of intricate readings of constructivism Mondrian and John Cage Daniel Herwitz outlines the avant garde s belief that theory can perfectly prefigure the avant garde art object and invest it with utopian force Through similarly insightful treatments of Arthur Danto Andy Warhol Jean Francois Lyotard Jean Baudrillard and postmodern art and theory Herwitz demonstrates how the contemporary art world is heir to the avant garde s theoretical assumptions and practices In fact avant garde art objects live as art only by partly resisting the master theories of their makers and interpreters Skillfully resisting the lure of grand theory himself Herwitz urges the art world to be more self critical and self reflective about its uses of theory Making Theory Constructing Art is as accessible and entertainingly written as it is philosophically incisive Since the book is both a philosophical and a cultural encounter with theory in twentieth century art it will engage all those who have tried to grapple with the inscrutability of the theoretical art muse
