Parental Questionnaires as a Reliable Instrument for the Assessment of Child Language Development Maria-José Ezeizabarrena,Melita Kovacevic,2024-09-13 Language is crucial in child development Therefore general questions such as what are the possible challenges in language acquisition or such as how well the my child is doing are commonly present for researchers clinicians teachers and parents Parent child interaction offers a privileged setting to observe children s behavior in multiple communicative situations which often is only available to the parents caregivers For this reason within the broad range of methods used to assess children s development parental questionnaires are widely used being a non invasive and inexpensive instrument to obtain information which is otherwise difficult to obtain Data obtained with the many questionnaires covering various aspects of child development and communicative competence are equally relevant for basic research and everyday clinical practice Development and use of parental questionnaires as well as data interpretation frequently require an interdisciplinary and cross sector approach bringing together developmental psychologists and practitioners This interdisciplinarity is assumed but rarely addressed directly

Clinical Assessment of Child and Adolescent Personality and Behavior Paul J. Frick, Christopher T. Barry, Randy W. Kamphaus, 2009-12-12 Psychologists offer an increasing variety of services to the public Among these services psychological assessment of personality and behavior continues to be a central activity One main reason is that other mental health professionals often do not possess a high level of competence in this area And when dealing with children and adolescents psychological assessment seems to take on an even greater role Therefore it follows that comprehensive graduate level instruction in assessment should be a high priority for educators of psychologists who will work with these youth This textbook is organized into three sections consistent with the authors approach to teaching Part I

provides students with the psychological knowledge base necessary for modern assessment practice including historical perspectives measurement science child psychopathology ethical legal and cultural issues and the basics of beginning the assessment process Part II gives students a broad review of the specific assessment methods used by psychologists accompanied by specific advice regarding the usage and strengths and weaknesses of each method In Part III we help students perform some of the most sophisticated of assessment practices integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth A text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development For example several of the major tests reviewed in the text such as the Behavioral Assessment System for Children and the Child Behavior Checklist have undergone major revisions since the publication of the last edition making the current content outdated Further another major test the Conners Rating Scales is undergoing substantial revisions that should be completed before publication of the next edition Finally the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current For example there was a special issue of the Journal of Clinical Child and Adolescent Psychology published focusing on evidenced based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in Part 3 This latter point reflects an important trend in the field that should influence the marketing of the book That is there are several initiatives being started in all of the major areas of applied psychology e g school clinical and counseling to promote evidenced based assessment practices These initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment This has been the orientation of this textbook from its first edition that is Clinical Assessment of Child and Adolescent Personality and Behavior has focused on using research to guide all recommendations for practice The ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology

Be As A Child K.L. Schell, 2019-03-12 Christ often used children as examples for believers He told Nicodemus that unless one is born again they cannot see the Kingdom John 3:3 But what is it about children that makes them a model for the Christian life Through psychological science we have learned much about the way children perceive think and act from the moment they are born and throughout their childhood If we apply this knowledge to the theology that Christ brought during His ministry it becomes clear why the child is the model for faith In this book we will see through the child's eyes and hopefully recapture the wonder we all felt when we first believed We will walk through childhood together learning not only about the psychology of children but also insights about our faith our spiritual growth the role of the Church and other important topics

X Age as an Equality Issue Sandra Fredman, Sarah Spencer, 2003-07 Until recently age discrimination attracted little social opprobrium However ageism has now been thrust onto the equality agenda by the spectre of an ageing population This has

led to a range of policies on active ageing. Most importantly, legally binding legislation prohibiting age discrimination in employment will need to be in place by 2006. Remarkably little attention has been paid to the key issues. To what extent is age inevitably linked with declining capacity? What are the central aims of a policy on age equality and how can these be realised in law? How should law and policy address age discrimination in health, education and employment? What lessons can be learned from the US and Europe? And should young people be dealt with in the same way as older people? This book answers these questions in a series of chapters by experts from a wide range of disciplines. It begins by examining the nature of the ageing process and then turns to a detailed analysis of the concept of age equality. In the light of this analysis, the following three chapters critically assess employment, education and health. A separate chapter is devoted to discrimination against children. The last two chapters consider the experience in the US and other European countries.
