The Complete History of Plague in Norway, 1348-1654 Ole Jørgen Benedictow, 2022-07-08 Historical studies of plague are predominantly related to individual local epidemics often associated with the Black Death However this unique book provides a complete presentation of the entire Second Plague Pandemic in Norway from the Black Death to the last outbreaks of plague in 1654 It begins with a succinct presentation of the history of plague and its basic clinical and epidemiological features while also drawing upon new scholarship and research It confirms the great genetic stability of the plague contagion and shows that the outbreaks and spread of plague can be studied in interaction with two historical societies of two historical periods the late medieval society and the early modern society The changes and differences in epidemiology and dynamics of plague between the two halves of the pandemic are gateways to understanding how plague epidemics are transmitted disseminated and evolve The book s long term perspective allows it to study plague s epidemiology and to identify consistent long term features Libraries, Archives, and Museums in Transition Casper Hvenegaard Rasmussen, Kerstin Rydbeck, Håkon Larsen, 2022-12-15 In this anthology top scholars researching libraries archives and museums LAM issues in Scandinavia explore pressing issues for contemporary LAMs In recent decades relations between libraries archives and museums have changed rapidly collections have been digitized books documents and objects have been mixed in new ways and LAMs have picked up new tasks in response to external changes Libraries now host makerspaces and literary workshops archives fight climate change and support indigenous people and museums are used as instruments for economic growth and urban planning At first glance the described changes may appear as a divergent development where the LAMs are growing apart However this book demonstrates that the present transformation of LAMs is primarily a convergent development Libraries Archives and Museums in Transition will be essential reading for students scholars and practitioners seeking to get on top of the LAM literature or the particularities of Scandinavian LAMs *Initial Risk Assessment of Alien Species in Nordic Coastal Waters* Stephan Gollasch, Erkki Leppäkoski, 1999 **Narrating, Doing, Experiencing** Annikki Kaivola-Bregenhøj, Barbro Klein, Ulf Palmenfelt, 2006-06-15 How do people tell of experiences things and events that mean a lot to them and are unforgettable Eight Nordic folklorists here examine personal experience stories and the way they are narrated in an attempt to gain an understanding of the people behind them and to reveal how these people handle their history their lives and their cultural memory All the articles are based on interviews and narrator researcher collaboration The stories tell about birth sickness and miraculous cures intergenerational relations war and matters not normally talked about The analyses complement one another and the work may be used as a university course book **Climate Change Adaptation in Practice** Philipp Schmidt-Thome, Johannes Klein, 2013-04-17 Climate change adaptation is increasingly recognized as complementary part to climate change mitigation Climate change affects sea level the extent of flood prone areas and precipitation patterns among many others To adapt to these changes the tasks of

municipalities and cities are to implement policies and strategies for changes in land use and coastal management as part of their future development. It is of vital importance to address the uncertainties of climate change scenarios when proposing adaptation measures that are socially viable and economically reasonable. The decision making process promoted here is based on scientific excellence as well as on an integrated communication process. This book provides a comprehensive overview of key elements required for effective analysis and assessment of climate change impacts, economic cost benefit analysis, communication processes and creation and transfer of knowledge, governance issues and implementation of related policies. It describes the results achieved by the BaltCICA www.baltcica.org project whose contributors come from the scientific and public administration communities. The regional cooperation has led to the implementation of climate change adaptation in several case studies. The BaltCICA project developed concepts, methodologies and tools for climate change adaptation that can be translated across other global regions. Scientists and students working on the development of climate change and adaptation strategies, public administrators in the related fields on local, regional and state level including environment, water management, civil defense as well as professionals working with adaptation technologies including engineering, technological solutions, urban planning agencies and construction will value this innovative book.

Narrating, Doing, Experiencing
 Annikki Kaivola-Bregenhøj, Klein Barbro, Palmenfelt Ulf, 2018-11-01. How do people tell of experiences, things and events that mean a lot to them and are unforgettable? Eight Nordic folklorists here examine personal experience stories and the way they are narrated in an attempt to gain an understanding of the people behind them and to reveal how these people handle their history, their lives and their cultural memory. All the articles are based on interviews and narrator-researcher collaboration. The stories tell about birth, sickness and miraculous cures, intergenerational relations, war and matters not normally talked about. The analyses complement one another and the work may be used as a university course book. *Bergen C 800-c 1170*

Heritage and Sustainable Urban Transformations introduces the concept of deep

cities a novel approach to the understanding and management of sustainable historic cities that will advance knowledge about how the long term temporal and transformative character of urban heritage can be better integrated into urban policies for sustainable futures Contrary to the growing emphasis on green or smart cities which focus only on the present and future the concept of deep cities offers an approach that combines an in depth understanding of the past with the present and future Bringing together chapters that cover theoretical methodological and management issues related to deep cities the volume argues that using this approach will force researchers managers and consultants to actively use the heritage and history of a city in the planning and management of sustainable cities Exploring different definitions of deep cities the book reveals varying and sometimes conflicting views among stakeholders concerning how where and when the depth of a city should be conceptualized Despite this the book demonstrates how this new approach can help to create robust cities for the future as new and innovative solutions are combined with the preservation and strengthening of historical features Heritage and Sustainable Urban Transformations is the first international collection on the subject of sustainable historic cities As such the book will be of great interest to academics and students engaged in the study of heritage heritage management architecture heritage conservation anthropology development studies geography planning and archaeology
