and provides a critical understanding of the cultural dimension of reconciliation Taking an anthropological view on decentralization and peacebuilding in Indonesia it sets new standards for an interdisciplinary research field Culture and Privilege in Capitalist Asia Michael Pinches, 2005-06-23 The Asian financial crisis has distracted attention from the realities of a growing affluent class in Asia this latest volume in the New Rich in Asia series the authors examine the cultural reconfiguration consumer behaviour economic success and cultural status of the new rich Case studies from Indonesia Singapore Malaysia Thailand the Philippines India and China paint a picture of the real significance of the affluent classes and their effect on national ethnic and religious restructuring **Men and Masculinities in Southeast Asia** Michele Ford, Lenore Lyons, 2012 This book brings together extensive recent innovative research on the study of men and masculinities in Southeast Asia Drawing on rich ethnographic fieldwork from Vietnam Cambodia Thailand the Philippines Singapore Indonesia and Timor Leste the book examines both dominant and marginal constructions of heterosexual masculinity and the ways in which these are performed in different localized contexts in insular and mainland Southeast Asia Through the presentation of detailed ethnographic studies on topics ranging from the professional practices of Filipino merchant seafarers to the sex lives of Thai migrant workers to the stand over tactics of Indonesian gangsters the authors in this collection challenge the idea of emerging globalizing forms of masculinities Where existing studies of gender in Asia tend to concentrate on women East Asia and gay men this book fills a significant gap and demonstrates overall how gender ethnicity class sexuality and nationality shape contemporary understandings of what it means to be a man in contemporary Southeast Asia *The Enduring Legacies of the Global Financial Crisis in East Asia* Iain Pirie, 2024-07-25 The Enduring Legacies of the Global Financial Crisis in East Asia challenges the assumption that the global financial crisis had a limited structural impact on East Asian political economies arguing that the crisis has led to a significant if uneven reorganization of major national political economies within the region where in response to the crisis states have promoted domestic processes of financialization as a means of stimulating their economies The major East Asian economies bar Japan enjoyed strong recoveries from the 2008 2009 financial crisis However this success has been achieved by promoting domestic processes of financialization to maintain demand more precisely the rapid build up of household debt Malaysia Korea Taiwan China and asset price bubbles China Japan In short East Asia has employed precisely those practices that the global financial crisis itself illustrated the unsustainability of to maintain growth Using a post Keynesian framework the book argues that the dependency on these forms of financialization to support demand is a direct product of a failure to address the issue of inequality High levels of inequality slow the growth of non debt based domestic consumption An alternative approach to supporting demand in the post crisis period would need to focus on progressive redistribution through strengthening of labour rights and systems of social support which would directly challenge the interests of economic and political elites The structural vulnerabilities that accelerated financialization is creating in East Asia demonstrate the

necessity of a post Keynesian growth strategy based on redistribution and curbing financialization The book also argues that in certain Northeast Asian economies the crisis has led to a consolidation of systems of industrial activism state control which could have occurred without accelerated financialization and vice versa This book will be of great interest to students and scholars of political economy and Asian studies **Cambodia, 1975-1978** Karl D. Jackson, 2014-04-28 One of the most devastating periods in twentieth century history was the rule of Pol Pot and the Khmer Rouge over Cambodia From April 1975 to the beginning of the Vietnamese occupation in late December 1978 the country underwent perhaps the most violent and far reaching of all modern revolutions These six essays search for what can be explained in the ultimately inexplicable evils perpetrated by the Khmer Rouge Accompanying them is a photo essay that provides shocking visual evidence of the tragedy of Cambodia's autogenocide The most important examination of the subject so far Without in any way denying the horror and brutality of the Khmers Rouges the essays adopt a principle of detached analysis which makes their conclusion far more significant and convincing than the superficial images emanating from the television or cinema screen Ralph Smith The Times Literary Supplement A book that belongs on the shelf of every scholar interested in Cambodia revolution or communism Answers to questions such as What effect did Khmer society have on the reign of the Khmer Rouge focus on understanding rather than merely describing Randall Scott Clemons Perspectives on Political Science *Criteria and Indicators for Sustainable Forest Management* Robert John Raison, Alan Gordon Brown, David W. Flinn, 2001 There is increasing pressure on the forestry industry to adopt sustainable practices but a lack of knowledge about how to facilitate this and how to measure sustainability This book reviews current thinking about scientifically based indicators and sustainable management of natural forests and plantations Information is applicable to boreal temperate and tropical biomes The contents have been developed from papers presented at a IUFRO conference held in Australia in order to develop a state of the art report on this subject
