Berkeley's A Treatise on the

Principles of Human Knowledge P. J. E. Kail, 2014-05-15 A lucid and comprehensive introduction to one of Berkeley's major works which mirrors the structure of that work Berkeley's Doctrine of Signs Manuel Fasko, Peter West, 2024-04-22 This volume focuses on Berkeley's doctrine of signs. The doctrine of signs refers to the use that Berkeley makes of a phenomenon that is central to a great deal of everyday discourse: one whereby certain perceivable entities are made to stand in for as signs of something else. Things signified might be other perceivable entities or they might also be unperceivable notions such as the meanings of words. From his earliest published work *A New Theory of Vision* in 1710 to those works written towards the end of life including *Alciphron* in 1732 Berkeley is at pains to emphasise the crucial role that sign usage particularly but not only in language plays in human life. Berkeley also connects sign usage to our human relationship with God, an issue that was right of the heart of his philosophical project. The contributions in this volume explore the myriad ways that Berkeley built on such insights to better understand a range of philosophical issues: issues of epistemology, language, perception, mental representation, mathematics, science, and theology. The aim of this volume is to establish that the doctrine of signs can be seen as one of the unifying themes of Berkeley's philosophy. What's more, this theme is one which spans his whole philosophical corpus, not just his best known works like the *Principles* and the *Three Dialogues* but also his works on science, mathematics, and theology.

The British Empiricists Stephen Priest, 2007-09-25 The Empiricists represent the central tradition in British philosophy as well as some of the most important and influential thinkers in human history. Their ideas paved the way for modern thought from politics to science, ethics to religion. *The British Empiricists* is a wonderfully clear and concise introduction to the lives, careers, and views of Hobbes, Locke, Berkeley, Hume, Mill, Russell, and Ayer. Stephen Priest examines each philosopher and their views on a wide range of topics including mind and matter, ethics and emotions, freedom and the physical world, language, truth, and logic. The book is usefully arranged so that it can be read by thinker or by topic or as a history of key philosophical problems and equips the reader to recognize and practice philosophical thinking, understand the methods of solving philosophical problems used by the British Empiricists, appreciate the role of empiricism in the history of Western philosophy. For any student new to philosophy, Western philosophy, or the British Empiricists, this masterly survey offers an accessible, engaging introduction.

The Minds of the Moderns Janice Thomas, 2014-12-05 This is a comprehensive examination of the ideas of the early modern philosophers on the nature of mind. Taking Descartes, Spinoza, Leibniz, Locke, Berkeley, and Hume in turn, Janice Thomas presents an authoritative and critical assessment of each of these canonical thinkers' views of the notion of mind. The book examines each philosopher's position on five key topics: the metaphysical character of minds and mental states, the nature and scope of introspection and self-knowledge, the nature of consciousness, the problem of mental causation, and the nature of representation and intentionality. The exposition and examination of their positions is informed by present-day debates in the philosophy of mind and the philosophy of psychology so that students get a clear sense of the importance of these philosophers' ideas, many of which continue to define our current notions of the

mental Again and again philosophers and students alike come back to the great early modern rationalist and empiricist philosophers for instruction and inspiration Their views on the philosophy of mind are no exception and as Janice Thomas shows they have much to offer contemporary debates The book is suitable for undergraduate courses in the philosophy of mind and the many new courses in philosophy of psychology
