### **Berkley Showcase Vol3:**

*A Saucer of Loneliness* Theodore Sturgeon, 2013-10-02 Kurt Vonnegut cites Theodore Sturgeon as the inspiration for his character Kilgore Trout. This volume includes 12 stories from 1953 considered Sturgeon's golden era. Among them are such favorites as the title story, *The Silken Swift*, *A Way of Thinking*, *The Dark Room*, *The Clinic*, and *The World Well Lost*, a story known for being very ahead of its time in advocating gay rights. Piers Anthony Michael R. Collings, 2007-09 Michael R. Collings examines the life and work of American science fiction author Piers Anthony. *Starmont Reader's Guide* 20

**Resource Efficiency Complexity and the Commons** Bruce Lankford, 2013-09-05 The efficient use of natural resources is key to a sustainable economy and yet the complexities of the physical aspects of resource efficiency are poorly understood. In this challenging book the author proposes a major advance in our understanding of this topic by analysing resource efficiency and efficiency gains from the perspective of common pool resources, applying this idea particularly to water resources and its use in irrigated agriculture. The author proposes a novel concept of the paracommons through which the savings of increased resource efficiency can be viewed. In effect he asks who gets the gain of an efficiency gain. By reusing, economising and avoiding losses, wastes and wastages, freed up resources are available for further use by four destinations: the same user, parties directly connected to that user, the wider economy or returned to the common pool. The paracommons is thus a commons of and competition for resources salvaged by changes to the efficiency of natural resource systems. The idea can be applied to a range of resources such as water, energy, forests and high seas fisheries. Five issues are explored: the complexity of resource use, efficiency, the uncertainty of efficiency interventions and outcomes, destinations of freed up losses, wastes and wastages, implications for resource conservation and the interconnectedness of users and systems brought about by efficiency changes. The book shows how these ideas put efficiency on a par with other dimensions of resource governance and sustainability such as equity, justice, resilience and access. Releasing the Commons Ash Amin, Philip Howell, 2016-04-28 This book moves beyond seeing the commons in the past tense, an entity passed over from the public into the private, to reimagine the commons as a process, a contest of force, a reconstitution and a site of convening practices. It highlights new spaces of gathering, opening up such as the digital commons and new practices of being in common such as community economies and solidarity networks. The commons is seen as a contested domain of the collective and as a changing way of being in common, with the balance poised in the tensile play between political economy and social innovation. The book focuses on the possibility of recovering a future in which more can be held by the many, focusing on three concepts: nation and nature as a commons, publics and rights and bodies concerning the management of lives and livelihoods. Across these three passage points the book finds evidence of a commons under attack but also defended in fragile though promising ways. With contributions from leading scholars, this thought provoking book will be of great interest to students and scholars in geography, environmental studies, politics, anthropology and cultural studies. **The Collected Works of Chögyam**

**Trungpa: Volume 3** Chogyam Trungpa, 2010-09-28 The Collected Works of Chogyam Trungpa brings together in eight volumes the writings of the first and most influential and inspirational Tibetan teacher to present Buddhism in the West. Organized by theme, the collection includes full-length books as well as articles, seminar transcripts, poems, plays, and interviews, many of which have never before been available in book form. From memoirs of his escape from Chinese-occupied Tibet to insightful discussions of psychology, mind, and meditation, from original verse and calligraphy to the esoteric lore of tantric Buddhism, the impressive range of Trungpa's vision, talents, and teachings is showcased in this landmark series. Volume Three captures the distinctive voice that Chogyam Trungpa developed in North America in the 1970s and reflects the preoccupations among Western students of that era. It includes *Cutting Through Spiritual Materialism* and *The Myth of Freedom*, the two books that put Chogyam Trungpa on the map of the American spiritual scene. *The Heart of the Buddha* and sixteen articles and forewords complete this volume. Developing Country Debt and Economic Performance, Volume 3

Jeffrey D. Sachs, Susan M. Collins, 2007-12-01 For dozens of developing countries, the financial upheavals of the 1980s have set back economic development by a decade or more. Poverty in those countries has intensified as they struggle under the burden of an enormous external debt. In 1988, more than six years after the onset of the crisis, almost all the debtor countries were still unable to borrow in the international capital markets on normal terms. Moreover, the world financial system has been disrupted by the prospect of widespread defaults on those debts. Because of the urgency of the present crisis and because similar crises have recurred intermittently for at least 175 years, it is important to understand the fundamental features of the international macroeconomy and global financial markets that have contributed to this repeated instability. This project on developing country debt, undertaken by the National Bureau of Economic Research, provides a detailed analysis of the ongoing developing country debt crisis. The project focuses on the middle-income developing countries, particularly those in Latin America and East Asia, although many lessons of the study should apply as well to other poorer debtor countries. The project analyzes the crisis from two perspectives: that of the international financial system as a whole (volume 1) and that of individual debtor countries (volumes 2 and 3). This third volume contains lengthy and detailed case studies of four very different Asian countries: Turkey, Indonesia, Korea, and the Philippines. **The 10th Science Fiction**
