**Auch and noch in Child and Adult German** Ulrike Nederstigt,2011-06-24 Auch and noch in Child and Adult German is an empirical study of the early acquisition of auch

also and noch also still in German and the adult use of these additive particles in spoken language It centres around the question of how children acquire these particles but it also investigates the way in which adults use these particles in order to determine what children actually have to learn and what the input they get is like Previous studies on focus particles in adult German mainly focused on the semantic and syntactic properties of primarily constructed examples Based on several corpora of spoken German this is the first comprehensive study of natural language data that systematically analyses the intonation of focus particle utterances as well as their semantic syntactic and information structural properties The study of the child data an extensive longitudinal corpus of one German child was carried out against the background of the adult data It offers a thorough characterisation of the acquisition of the two additive particles that also takes into account results from previous studies on the acquisition of focus particles mainly on their comprehension In addition to studying the acquisition of these particles the author also introduces an analysis of focus particles that emphasises the differences between stressed and unstressed particles which makes this book not only interesting to researchers in language acquisition and psycholinguistics but also to those interested in phonology prosody semantics syntax and information structure *Isaiah Berlin's Liberalism*

Claude Galipeau, 1994 Isaiah Berlin is a towering figure in the world of letters To the international community of scholars he is best known as the author of *Two Concepts of Liberty* yet his career covers many fields in addition to moral and political philosophy music and literary criticism historiography scholarship in the history of ideas cultural interpretation translation teaching university and arts administration diplomacy community work and broadcasting This is the first systematic study of Berlin's political ideas to draw on all of his writings including manuscripts interviews and correspondence Berlin's defence of political liberalism is based on a theory of moral pluralism a view of human nature and an interpretation of the historical and cultural development of Western civilization rather than on abstract arguments about rights Claude Galipeau brings out the uniqueness and force of this defence while acknowledging in his discussion of Berlin's Zionism the tensions and complexities inherent in it In all his writings Berlin seeks to understand the intricacies and paradoxes of human behaviour His political thought offers a compelling justification of liberal institutions in the contemporary world and Claude Galipeau's study will be an invaluable guide to the range and depth of his work **Isaiah Berlin** George Crowder, 2004-11-12 An accessible introduction to the ideas of Isaiah Berlin this work argues that Berlin's critique of the modern enemies of liberty is exciting and powerful but also that the coherence of his thought is threatened by a tension between its liberal and pluralist elements

**The Camp, Housing, and the City** Christian Sowa, 2024-01-05 In 2015 many camps were opened to accommodate newly arriving migrants in Berlin Christian Sowa studies this form of accommodation Moving beyond an exclusive focus on borders and migration he argues that camp accommodation must be thought of and studied as part of the urban context and as a specific form of housing The study provides an in depth case study discusses policy alternatives argues for housing for all instead of camps and contributes to bringing urban and migration studies into public discussion In times of new waves of

migration the topic of migrant accommodation within urban environments remains highly relevant today *On the Role of Contrast in Information Structure* Jorina Brysbaert, Karen Lahousse, 2024-06-04 In research on Information Structure there is an ongoing discussion about the role of contrast While most linguists consider contrast to be compatible with both focus and topic some argue that it is an autonomous IS category Contrast has been shown to be encoded by different linguistic means such as specific morphemes adverbials clefts prosodic cues Hence this concept is also related to other domains in particular morphosyntax and prosody The precise way in which they interact is however not yet entirely clear Moreover from a methodological point of view the identification and annotation of contrast in corpora is not straightforward This volume provides a selection of articles discussing the definition of contrast the importance of distinguishing different types of contrast the use of several encoding strategies and the annotation of contrast in corpora using the Question Under Discussion Model The contributions offer data on English French French Belgian Sign Language German Hindi Italian and Spanish **The Oxford Handbook of Information Structure** Caroline Féry, Shinichiro Ishihara, 2016 This book provides linguists with a clear critical and comprehensive overview of theoretical and experimental work on information structure Leading researchers survey the main theories of information structure in syntax phonology and semantics as well as perspectives from psycholinguistics and other relevant fields Following the editors introduction the book is divided into four parts The first on theories of and theoretical perspectives on information structure includes chapters on topic prosody and implicature Part 2 covers a range of current issues in the field including focus quantification and sign languages while Part 3 is concerned with experimental approaches to information structure including processes involved in its acquisition and comprehension The final part contains a series of linguistic case studies drawn from a wide variety of the world's language families This volume will be the standard guide to current work in information structure and a major point of departure for future research Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriations for 1963 United States. Congress. House. Committee on Appropriations, 1962 The Discourse Potential of Underspecified Structures Anita Steube, 2008-11-03 The volume demonstrates the interdependence of man's language capacity and his other conceptual capacities This enables linguistic structures to be minimalised and for extra linguistic domains to provide much of the interpretations of sound and meaning Underspecification is demonstrated in the word formation of Indo European Late Archaic Chinese and modern Khmer on the word and sentence levels by the event structures of German and in the information structure predominantly of languages with the so called free word order German Slavic languages Arabic compared with English and the tone language Hausa The volume is noteworthy due to the close cooperation between theoretical and experimental research Within grammar it has especially strengthened prosodic research and the syntax phonology interrelations and their interpretations and it has helped to create data bases for the relations within texts and to evaluate the findings *Departments of State, Justice, Commerce, the Judiciary, and Related Agencies Appropriations for*
