The Artist's Garden Jackie Bennett, 2019-10-29 The Artist's Garden will feature up to 20 gardens that have inspired and been home to some of the greatest painters of history These gardens not only supplied the inspiration for creative works but also illuminate the professional motivation and private life of the artists themselves from Cézanne's house in the south of France to Childe Hassam at Celia Thaxter's garden off the coast of Maine Flowers and gardens have often been the first choice for artists looking for a subject A garden close to the artist's studio is not only convenient for daily material and ideas but also has the advantage of changing through the seasons and over time Claude Monet's Giverny was the catalyst for hundreds of great paintings by Monet and other artists each one different from the one before Sometimes a whole village becomes the focus for a colony of artists as at Gerberoy in Picardy and Skagen on the northernmost tip of Denmark This book is about the real homes and gardens that inspired these great artists gardens that can still be visited today The relationship between artist and garden is a complex one A few artists including Pierre Bonnard and his neighbour Monet were keen gardeners as much in love with their plants as their work while for others like Sorolla in Madrid his courtyard home was both a sanctuary and a source of ideas

persecution of modern and Jewish artists led to the obliteration of Liebermann from the narratives of modern art but this volume contributes to the recent wave of scholarly literature that works to recover his role and his oeuvre from an international perspective

Ostergren, 2019-08-19 This richly illustrated book details the wide ranging construction and urban planning projects launched across Germany after the Nazi Party seized power Hagen and Ostergren show that it was far more than just an architectural and stylistic enterprise Instead it was a series of interrelated programs intended to thoroughly reorganize Germany's economic cultural and political landscapes The authors trace the specific roles of its component parts the monumental redevelopment and cleansing of cities the construction of new civic landscapes for educational athletic and leisure pursuits the improvement of transportation industrial and military infrastructures and the creation of networked landscapes of fear slave labor and genocide Through distinctive examples the book draws out the ways in which combinations of place space and architecture were utilized as a cumulative means of undergirding the regime and its ambitions The authors consider how these reshaped spaces were actually experienced and perceived by ordinary Germans and in some cases the world at large as the regime intentionally built a new Nazi Germany
