The Education of a College President James Rhyne Killian,1985

The Education of a College President is a personal account of the author's association with M I T for sixty years as student editor and administrative officer including his service as President from 1948 to 1959 and as Chairman of the Corporation. Interwoven with this account of an unusual career at one of the world's leading science based universities is the story of Killian's excursions into the public sector as the nation's first full time presidential science adviser when NASA and our national space program were created and Eisenhower began initial efforts to ban atmospheric nuclear tests and to encourage disarmament. Attention is also paid to his role as the father of public television. In his memoir Killian shows how M I T grew from an engineering school offering technical courses to undergraduates into a research university of a unique kind with a new focus on developing better links between the two cultures of science and the humanities. He provides an inside report on the major events and policies of his administration: the establishment of a School of Humanities and Social Science; the rationale for the later formation of a School of Management; and many improvements in the Institute's environment. Following his student days at M I T Killian joined the staff and later became editor of the Institute's alumni journal *Technology Review*. In 1939 he became President Karl T Compton's Executive Assistant. He became Vice President of the Institute in 1943, President in 1948 and Chairman of the Corporation in 1959. James R Killian has received numerous awards including the Public Welfare Medal of the National Academy of Sciences, the first Vannevar Bush Award of the National Science Board, the Hoover Medal, one earned degree S B and thirty nine honorary degrees. He is the author of *Sputnik Scientists* and *Eisenhower* and coauthor with Harold E Edgerton of *Moments of Vision*, both published by The MIT Press. *The Thomas Jefferson Foundation Medal in Architecture* Jayne Riew, Lydia Mattice Brandt, Karen Van Lengen, 2007. The Thomas Jefferson Foundation Medal in Architecture is one of the most prestigious honors awarded in the discipline of architecture and its related fields arising from the unique environment afforded by Jefferson's design for the University of Virginia. Since 1966 the medal has recognized the architects, historians, politicians and benefactors behind some of the most influential designs of the last half century including Shigeru Ban, Tod Williams and Billie Tsien, Richard Rogers, Jane Jacobs, Frank Gehry, Robert Venturi, Vincent J Scully, Lawrence Halprin, Philip Johnson, I M Pei, Kenzo Tange, Marcel Breuer, Alvar Aalto and Mies van der Rohe. This handsome volume catalogues the first forty recipients of this honor, outlining their achievements in brief biographies and showcasing their most famous work in color photographs. As School of Architecture Dean Karen Van Lengen writes in the introduction, the Medal acknowledges the comprehensive nature of the design and development of our public realm. As democracy is a process, so too is design a process that shapes current aesthetic and technological innovations and gives our culture meaning. The Medalists in this book reflect these values and principles in many different ways. Catalog of
