that stir the imagination and the heart **The Year's Best Science Fiction: Seventeenth Annual Collection** Gardner Dozois, 2000-08-12 In science fiction's early days stories often looked past 1984 to the year 2000 as the far unknowable future. Here now on the brink of the twenty-first century the future remains as distant and as unknowable as ever and science fiction stories continue to explore it with delightful results. Collected in this anthology are such imaginative gems as *The Wedding Album* by David Marusek. In a high-tech future the line between reality and simulation has grown thin and it's often hard to tell who's on what side. *Everywhere* by Geoff Ryman. Do the people who live in utopian conditions ever recognize them as such? *Hatching the Phoenix* by Frederik Pohl. One of science fiction's Grand Masters returns with a star-crossing tale of the Heechee, the enigmatic vanished aliens whose discarded technology guides mankind through the future. *A Hero of the Empire* by Robert Silverberg. Showing that the past is as much a province of the imagination as the future, this novelette returns to an alternate history when the Roman Empire never fell to show us just how the course of history can be altered. The twenty-seven stories in this collection imaginatively take us to nearby planets and distant futures, into the past and into universes no larger than a grain of sand. Included here are the works of masters of the form and of bright new talents. Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart.

Reader Derek Thiess, 2014-11-25 The writer of alternate history asks what if What if one historical event were different what would the world look like today In a similar way the postmodern philosopher of history suggests that history is literature or that if we read certain historical details differently we would get a distinctly different interpretation of past events While the science fiction alternate history means to illuminate the past to increase our understanding of past events however the postmodern approach to history typically suggests that such understanding is impossible To the postmodern philosopher history is like literature in that it does not offer the reader access to the past but only an interesting story Building on criticism that suggests personal psychological reasons for this obscuring the past and using a literary theory of readership this book challenges the postmodern approach to history It channels the speculative power of science fiction to read the works of postmodern philosophy of history as alternate histories themselves and to map the limits and pathology of their forgetful reading of the past
