**Mathematisation and Demathematisation**, 2007-01-01 In this volume scholars from diverse strands of research have contributed their perspectives on a process of mathematisation which renders social, economical or political relationships increasingly formal. At the same time mathematical skills lose their importance as they become replaced by diverse technological tools: a process of demathematisation takes place. The computerization of financial transactions, calculation of taxes and fees, comparison of prices as well as orientation by means of GPS, visualisation of complex data and electronic voting systems: all these mathematical technologies increasingly penetrate the lifestyle of consumers. What are the perils and promises of this development? Who is in charge? Who is affected? Who is excluded? A common concern of all the authors of this volume is an attempt to draw attention to issues related to the formatting power of mathematics and to its role as implicit knowledge which results in a process of demathematisation. This process, having once received considerable attention, is now threatened to be eclipsed by the proliferation of a discussion of school mathematics which shows a tendency of cutting off its own philosophical and political roots. Taken together, the contributions reveal a rather complex picture. They draw attention to the importance of clarifying epistemological, societal and ideological issues as a prerequisite for a discussion of curriculum

**Science and the Religious Right** John Jagger, 2010-09 In *Science and the Religious Right*, biophysicist John Jagger discusses false scientific and social positions of the Religious Right, including the ideas that the earth is only six thousand years old, evolution never occurred, and the United States was founded as a Christian nation. At best, such stances of the Religious Right have produced extensive political turmoil; they undermine true

understanding of ourselves and the world we live in Many Americans know little science and are thus easily confused by such positions of religious fundamentalists Jagger begins with a scientific primer for the intelligent and curious nonscientist with simple explanations of such highly successful theories as relativity and evolution He then discusses religion explaining why many scientists become freethinkers after the models of Thomas Jefferson and Benjamin Franklin who did not believe in a personal God He shows that while mainstream religion largely accepts modern science the Religious Right holds anti science and anti intellectual ideas that have great social and political consequence they want to replace teaching of evolution in our public schools with creationist ideas that are totally unsupported by science Science and the Religious Right shows why knowledge of some basic science as well as of correct religious history is essential for understanding false stances of the Religious Right that threaten American values and scientific truth

The Best American Science Writing 2004 Dava Sobel,2004-09-14 Jennifer Kahn s Stripped for Parts was selected as the lead story of this year s Best American Science Writing because as Dava Sobel best selling author of Longitude and Galileo s Daughter reveals it begins with one of the most arresting openings I have ever read In Columbia s Last Flight William Langewiesche recounts the February 1 2003 space shuttle tragedy along with the investigation into the nationwide complacency that brought the ship down K C Cole s Fun with Physics is a profile of astrophysicist Janet Conrad that blends her personal life with professional activity In Desperate Measures the doctor and writer Atul Gawande profiles the surgeon Francis Daniels Moore whose experiments in the 1940s and 50s pushed medicine harder and farther than almost anyone had contemplated Also included is a poem by the legendary John Updike Mars as Bright as Venus The collection ends with Diane Ackerman s ebullient essay We Are All a Part of Nature Together these twenty three articles on a wide range of today s most current topics in science from biology physics biotechnology and astronomy to anthropology genetics evolutionary theory and cognition represent the full spectrum of scientific writing from America s most prominent science authors proving once again that good science writing is evidently plentiful Scientific American

Reminiscences on Surgery, History and Humanities Luis Horacio Toledo-Pereyra,2007-09-18 The importance of medical history in the annals of surgery has been frequently underemphasized There is so much we can learn from the deeds and examples of our predecessors There is so much we can admire in their lives and contributions There is so much we can use to guide our professional development This book introduces writings on the history

Communicating Popular Science S. Perrault,2013-07-12 Technoscientific developments often have far reaching consequences both negative and positive for the public Yet because science has the authority to decide which judgments about scientific issues are sound public concerns are often dismissed because they are not part of the technoscientific paradigm they question This book addresses the role of science popularization in that paradox it explains how science writing works and argues that it can do better at promoting public discussions about science related issues To

support these arguments it situates science popularization in its historical and cultural context provides a conceptual framework for analyzing popular science texts and examines the rhetorical effects of common strategies used in popular science writing Twenty six years after Dorothy Nelkin s groundbreaking book *Selling Science How the Press Covers Science and Technology* popular science writing is still not meeting its potential as a public interest genre *Communicating Popular Science* explores how it can move closer to doing so      *Mathematics & Common Sense* Philip J. Davis,2006-11-30 From the Preface This book is addressed to all who are curious about the nature of mathematics and its role in society It is neither a text book nor a specialists book It consists of a number of loosely linked essays that may be read independently and for which I have tried to provide a leitmotif by throwing light on the relationship between mathematics and common sense In these essays I hope to foster a critical attitude towards both the existence of common sense in mathematics and the ambiguous role that it can play      **A Handbook for Yogasana Teachers** Mel Robin,2009 Rev ed of A physiological handbook for teachers of yogasana c2002      **The Oxford American Book of Great Music Writing** Marc Smirnoff,2012-01-01 Not only have a breathtaking array of musical giants come from the South think Elvis Presley Robert Johnson Louis Armstrong Jimmie Rodgers to name just obvious examples but so have a breathtaking array of American music genres From blues to rock roll to jazz to country to bluegrass and areas in between it all started in the American South Since its debut in 1996 The Oxford American s more or less annual Southern Music Issue has become legendary for its passionate and wide ranging approach to music and for working with some of America s greatest writers These writers from Peter Guralnick to Nick Tosches to Susan Straight to William Gay probe the lives and legacies of Southern musicians you may or may not yet be familiar with but whom you ll love being introduced or reintroduced to In one creative fresh way or another these writers also uncover the essence of music and why music has such power over us To celebrate ten years of Southern music issues most of which are sold out or very hard to find the fifty five essays collected in this dynamic wide ranging and vast anthology appeal to both music fans and fans of great writing      **Listening to Cougar** Cara Blessley Lowe,Marc Bekoff,2018-07-09 Awe It s the overwhelming emotion 20 authors express for the cougar or mountain lion or panther or puma in this beautiful literary anthology The Durango Herald Foreword by Jane Goodall This spellbinding tribute to Puma concolor honors the big cat s presence on the land and in our psyches In some essays the puma appears front and center a lion leaps over Rick Bass s feet hurtles off a cliff in front of J Frank Dobie gazes at Julia Corbett when she opens her eyes after an outdoor meditation emerges from the fog close enough for poet Gary Gildner to touch Marc Bekoff opens his car door for a dog that turns out to be a lion Other works evoke lions indirectly Biologists describe aspects of cougar ecology such as its rugged habitat and how males struggle to claim territory Conservationists relate the political history of America s greatest cat Short stories and essays consider lions significance to people reflecting on accidental encounters dreams Navajo beliefs guided hunts and how vital mountain lions are to people as symbols of power and wildness Contributors include Rick Bass Marc Bekoff Janay Brun Julia B Corbett
