Summary of David R. Hamilton's Why Woo-Woo Works Everest Media, 2022-05-15T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The placebo effect is when a patient who has been given a placebo in a drugs trial gets better which is because the patients believe the placebo is the real drug or treatment It's their belief that does the work 2 Placebo effects can be opposite depending on what the patient believes the pill will do If they believe it will reduce pain it will reduce pain But if they believe it will cause pain it will cause pain instead 3 Placebos can have a powerful effect on us and this is especially true for Americans who typically speak of getting a shot rather than taking a pill 4 The way a placebo is packaged also makes a difference to its power In a study at Keele University in the UK 835 women were given one of four different pills for headache 9 The branded aspirin worked better than the unbranded one and the main difference was in the appearance of the packaging **Summary of David R. Hamilton's How Your Mind Can Heal Your Body** Everest Media, 2022-03-27T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 I'd like to thank my publisher Hay House who have supported me for many years through my development as an author and have always enabled me to write about the subjects I've wanted to I also thank all the people who sent me stories of their own uses of visualization 2 The mind impacts the body Thoughts feelings ideas imagination beliefs and expectations produce a series of chemical and biological changes that result in a physical effect The brain can't tell the

difference between what's real and what someone imagines 3 The book shares the scientific evidence for the mind-body connection from the impact of attitude on ageing the immune system and the heart to how the placebo effect works and several examples of it It also teaches you how to visualize 4 The mind can play a significant role in healing and it is important to recognize that it is not a substitute for medical advice or interventions We should use our mind as support for natural healing processes as well as support for drug and other medical interventions **The Farmer's Magazine** ,1864
