Processes: The Case of the Japanese Anti-Nuclear Movement after Fukushima Anna Wiemann, 2018-05-14

Environmental disasters or other large scale disruptive events often trigger the emergence of social movements demanding social and or political change This study investigates mobilization processes at the meso level of the Japanese anti nuclear movement after the nuclear disaster at the Fukushima Daiichi nuclear power plant caused by the Great East Japan Earthquake and subsequent tsunami waves on March 11 2011 To capture such meso level movement dynamics which so far have played only a minor role in research on social movement mobilization the study presents an analytical model based on premises from political process theory network theory and relational sociology This model is then applied to the case of the Japanese anti nuclear movement after Fukushima by looking at the relational dynamics of two coalitional movement networks engaged in advocacy related activities in Tokyo The first case study is the shift a network coalition working for nuclear phase out and the promotion of renewable energy the other is SHSK Shienh Shimin Kaigi a coalition pushing for the rights of people affected by radioactive contamination and or evacuation from contaminated areas The study traces the mobilization processes of these two networks by analyzing data gathered in 2013 and 2014 in the form of participant observation of movement events semi structured interviews with movement organization representatives and documentary data

Me-Search and Re-Search DeMethra LaSha Bradley, Robert Nash, 2011-03-01 From the Foreword Robert and DeMethra's book *Me Searching and Re Search* has caught my fancy in a number of ways The book title cleverly captures what SPN is all about it is about self narratives the me search part and about scholarly meaning making the re search part This eye catching title also illuminates the authors intent to turn this seemingly intimidating method of self inquiry into something very accessible and doable Their jargon free language is friendly and inviting Although they don't intend to make their many methodological tips and tools too prescriptive their practical suggestions provided in this guide book are indeed helpful and useful I believe that Robert and DeMethra have demonstrated admirable talents as effective educators by unpacking the complex method of SPN writing into bite sized steps I am fully convinced that the steps will help both novices

and the experienced researcher to reach the ultimate height of producing engaging and scholarly significant SPN s The book is also fun to read The authors intersperse throughout their own SPN s pedagogical insights from their doing and teaching and real life stories in order to illustrate the methodological process challenges and triumphs Perspectives on Gender and Work Eden B. King,Quinetta M. Roberson,Mikki R. Hebl,2020-09-01 Few time periods in the past five decades match the intensity of intergroup conflict that people around the world are currently experiencing Polarized attitudes around various sociopolitical issues such as gender equality and immigration have dominated the media and our lives Furthermore these powerful social dynamics have also impacted the places where we work and intensified existing strains on workers and workplaces To address these issues and improve organizational climates more theories research and collaborations to understand these phenomena are needed The volumes in this series will describe and instigate scholarship that advances our understanding of diversity in organizations In recognition of the centennial anniversary of the ratification of the 19th Amendment to the U S Constitution which granted American women the right to vote and the subsequent struggle for women of color to exercise it this volume features the personal narratives of recognized scholars in the field who have advanced understanding of gender at work In this way we appreciate and gain perspective on the rewards and challenges of this essential scholarship and the lives of those who engage in it The combination of these narratives is an exciting and meaningful exploration of the study of gender and its intersection with other marginalized social identities at work that authentically captures the experiences of scholars in the field and inventively pushes our understanding of diversity in organizations **Helping College Students Write** Laura M.
