love and love has long foiled white supremacy Sheryll Cashin offers us this essential historical revelation and urges us to renew our old fight for the human right to love Ibram X Kendi author of *Stamped from the Beginning* When Mildred and Richard Loving wed in 1958 they were ripped from their shared bed and taken to court Their crime miscegenation punished by exile from their home state of Virginia The resulting landmark decision of *Loving v Virginia* ended bans on interracial marriage and remains a signature case the first to use the words white supremacy to describe such racism Drawing from the earliest chapters in US history legal scholar Sheryll Cashin reveals the enduring legacy of America's original sin tracing how we transformed from a country without an entrenched construction of race to a nation where one drop of nonwhite blood merited exclusion from full citizenship In vivid detail she illustrates how the idea of whiteness was created by the planter class of yesterday and is reinforced by today's power hungry dog whistlers to divide struggling whites and people of color ensuring plutocracy and undermining the common good Not just a hopeful treatise on the future of race relations in America Loving challenges the notion that trickle down progressive politics is our only hope for a more inclusive society Accessible and sharp Cashin reanimates the possibility of a future where interracial understanding serves as a catalyst of a social revolution ending not in artificial color blindness but in a culture where acceptance and difference are celebrated

The Emergence of the Digital Humanities Steven E. Jones, 2013-08-15 The past decade has seen a profound shift in our collective understanding of the digital network What was once understood to be a transcendent virtual reality is now experienced as a ubiquitous grid of data that we move through and interact with every day raising new questions about the social locative embodied and object oriented nature of our experience in the networked world In *The Emergence of the Digital Humanities* Steven E Jones examines this shift in our relationship to digital technology and the ways that it has affected humanities scholarship and the academy more broadly Based on the premise that the network is now everywhere rather than merely out there Jones links together seemingly disparate cultural events the essential features of popular social media the rise of motion control gaming and mobile platforms the controversy over the gamification of everyday life the spatial turn fabrication and 3D printing and electronic publishing and argues that cultural responses to changes in technology provide an essential context for understanding the emergence of the digital humanities as a new field of study in this millennium The Open Access version of this book available at <https://doi.org/10.4324/9780203093085> has been made available under a Creative Commons Attribution Non Commercial
