Writing Tangier in the Postcolonial Transition Michael K. Walonen, 2016-02-17 In his study of the Tangier expatriate community Michael K. Walonen analyzes the representations of French and Spanish Colonial North Africa by Paul Bowles Jane Bowles William Burroughs Brion Gysin and Alfred Chester during the end of the colonial era and the earliest days of post independence The conceptualizations of space in these authors' descriptions of Tangier Walonen shows share common components an attention to the transformative potential of the conflict sweeping the region a record of the power relations that divided space along lines of gender and ethnicity including the spatial impact of the widespread sexual commerce between Westerners and natives a vision of the Maghreb as a land that can be dominated or imposed on as a kind of frontier space an expression of anxieties about the specters of Cold War antagonisms and an embrace of the underlying logic of the market to the culture of the Maghreb Counterbalancing the depictions of Tangier by Westerners who sought to reconcile their nostalgia for the colonial order with their support of native demands for independent governance is Walonen's extended analysis of the contrasting sense of place found in the writings of native Moroccan authors such as Mohammed Choukri Tahar Ben Jelloun

and Anouar Majid In its focus on Tangier and the larger Maghreb as a lived environment situated at a particular spatial and temporal crossroads Walonen s study makes an important contribution to the fields of urban transatlantic and postcolonial studies

Between Science and Literature Ira Livingston,2010-10-01 Between Literature and Science follows through to its emerging 21st century future the central insight of 20th century literary and cultural theory that language and culture along with their subsystems and artifacts are self referential systems The book explores the workings of self reference and the related performativity in linguistic utterances and assorted texts through examples of the more open social discursive systems of post structuralism and cultural studies and into the sciences where complex systems organized by recursive self reference are now being embraced as an emergent paradigm This paradigmatic convergence between the humanities and sciences is autopoetics adapting biologist Hubert Maturana s term for self making systems and it signals a long term epistemological shift across the nature culture divide so definitive for modernity If cultural theory has taught us that language because of its self referential nature cannot bear simple witness to the world the new paradigmatic status of self referential systems in the natural sciences points toward a revived kinship of language and culture with the world language bears witness to the world The main movement of the book is through a series of model explications and analyses operational definitions of concepts and terms more extended case studies vignettes and thought experiments designed to give the reader a feel for the concepts and how to use them while working to expand the autopoetic internee by putting cultural self reference in dialogue with the self organizing systems of the sciences Along the way the reader is introduced to self reference in epistemology Foucault sociology Luhmann biology Maturana Varela Kauffman and physics and cosmology Smolin Livingston works through the fundamentals of cultural literary and science studies and makes them comprehensible to a non specialist audience

The Night Orchid Jean-Claude Dunyach,2004 Included in this collection are 14 stories including six that have never before been translated by multiple award winning French science fiction author Dunyach who David Brin The Postman Earth describes as one of the most talented imaginations living today
