Economy of Middle Class Politics and the Global Crisis in Eastern Europe Agnes Gagyi, 2021-08-09 Contrary to dominant narratives which portray East European politics as a pendulum swing between democracy and authoritarianism conventionally defined in terms of an ahistorical cultural geography of East vs West this book analyzes post socialist transformation as part of the long downturn of the post WWII global capitalist cycle Based on an empirical comparison of two countries with significantly different political regimes throughout the period Hungary and Romania this study shows how different constellations of successive late socialist and post socialist regimes have managed internal and external class relations throughout the same global crisis process from very similar positions of semi peripheral post socialist systemic integration Within this context the book follows the role of social movements since the 1970s paying attention both to the level of differences between local integration regimes and to the level of structural similarities of global integration The analysis maintains a special focus on movements class composition and inter class relationships and the specific position of middle class politics in movements **World, Class, Britain** C. Paton, 2015-12-22 This book begins by tracing the sea

change in British politics from the 1970s to the end of the twentieth century The dominance of market ideology the decline of social democracy and the marketization of public policy are related to a widespread acceptance of globalization Contemporary global capitalism is analyzed not least as to its likely effect on countries such as Britain New Labour's Third Way is portrayed as reinforcing the apparent inevitability of globalization In this environment political and economic alternatives tend to be dismissed fatalistically Politics is no longer about real choice The second part of the book as well as sketching an economic alternative investigates how political theory and ethical concepts can help us today to re establish the search for human freedom and a balanced society Such a vision can appeal to conservatives liberals and socialists alike It argues that a political coalition to further such ends is conceivable if very difficult to organise or maintain Finally the postmodern stance of eschewing ethical and political progress is criticized *Frontiers of Political Economy* Guglielmo Carchedi, 1991 Transcending the arid formalism of present day economic theory *Frontiers of Political Economy* develops a

new and accessible perspective on the world economy Guglielmo Carchedi identifies and analyses three key features of modern capitalism the rapidly increasing share of human labour needed for the advancement of science and technology rather than for the production of goods the global rather than national nature of production distribution and consumption and the dominance of the oligopolies This analysis enables Carchedi to explore new theoretical frontiers from an original theory of mental and material labour to an investigation of the conditions under which mental labour produces value from an assessment of the class structure of modern capitalism to an appraisal of the social content of science and technology from an alternative account of crises inflation and stagflation to a study of their relation to the destruction of value and to arms production He also cast fresh light on a number of basic contemporary issues including the present financial and monetary crisis and surveys the most important recent controversies in language accessible to non specialists Rigorous and wide ranging but written with great lucidity *Frontiers of Political Economy* is an essential book for both specialists and students in economics and politics
