Class A Guide Through The American Status System:

Class Paul Fussell, 1992 This book describes the living room artifacts clothing styles and intellectual proclivities of American classes from top to bottom *Class*, 1983 **Who Owns Culture?** Susan Scafidi, 2005-05-18 It is not uncommon for white suburban youths to perform rap music for New York fashion designers to ransack the world's closets for inspiration or for Euro American authors to adopt the voice of a geisha or shaman But who really owns these art forms Is it the community in which they were originally generated or the culture that has absorbed them While claims of authenticity or quality may prompt some consumers to seek cultural products at their source the communities of origin are generally unable to exclude copyists through legal action Like other works of unincorporated group authorship cultural products lack protection under our system of intellectual property law But is this legal vacuum an injustice the lifeblood of American culture a historical oversight a result of administrative incapacity or all of the above Who Owns Culture offers the first comprehensive analysis of cultural authorship and appropriation within American law From indigenous art to Linux Susan Scafidi takes the reader on a tour of the no man's land between law and culture pausing to ask What prompts us to offer legal protection to works of literature but not folklore What does it mean for a creation to belong to a community especially a diffuse or fractured one And is our national culture the product of Yankee ingenuity or cultural kleptomania Providing new insights to communal authorship cultural appropriation intellectual property law and the formation of American culture this innovative and accessible guide greatly enriches future legal understanding of cultural production Psychiatry and the Cinema Glen O. Gabbard, Krin Gabbard, 1999 Psychiatry and the Cinema explores this complementary relationship from two angles psychiatrists who have studied the movies and movies that have depicted psychiatry This second edition has updated this definitive text with a discussion of new trends in psychoanalytically oriented film theory and an expanded list of movies is analyzed **Empire of Knowledge** Vinay Lal, 2002-10-20 During the media frenzy over the Millennium celebrations there was hardly any mention of the fact that for the majority of the world there was no Millennium at all This linear understanding of time is a specifically Western and Christian concept This is just one of many examples that Vinay Lal uses to demonstrate that nearly every idea which we take for granted in the west is part of a politics of ideas Oppression is usually associated with class struggle and other forms of economic monopoly Lal looks beyond this deconstructing the cultural assumptions that have emerged alongside capitalism to offer a devastating critique of the politics of knowledge at the heart of all powerbroking Other topics examined are the concept of development which has provided a mandate for surreptitious colonisation and the idea of the nation state something we have lived with for no more than two centuries yet is accepted without question Linking this to the emergence of international governance through the United Nations the US and imperial economic bodies such as the IMF and WTO Lal explains how such universalism came to dominate the trajectory of Western thought **Teaching Difficult Topics** Olivia R. Lucas, Laura Moore Pruett, 2024-10-14 Teaching Difficult Topics provides a

series of on the ground reflections from college music instructors working in a wide variety of institutional settings about their approaches to inclusive supportive pedagogy in the music classroom Although some imagine the music classroom to be an apolitical space instructors find themselves increasingly in need of resources for incorporating issues of race and ethnicity gender and sexuality and historical trauma into their classrooms in ways that support student learning and safeguard their classroom communities The teaching reflections in Teaching Difficult Topics examine difficult themes that fall into three primary categories subjects that instructors sense to be controversial or emotionally challenging to discuss those that derive from or intersect with real world events that are difficult to process and bigger picture discussions of how music studies often focuses on dominant narratives while overlooking other perspectives Some chapters offer practical guidance lesson plans and teaching materials to enable instructors to build discussions of race gender sexuality and traumatic histories into their own classrooms others take a more global view reflecting on the importance and relevance of teaching these difficult topics and on how to respond in the music classroom when external events disrupt daily life

The Dream of a Democratic Culture T. Lacy, 2013-11-26 This book presents a moderately revisionist history of the great books idea anchored in the following movements and struggles fighting anti intellectualism advocating for the liberal arts distributing cultural capital and promoting a public philosophy anchored in mid century liberalism that fostered a shared civic culture

Nothing Succeeds Like Failure Steven Conn, 2019-10-15 Do business schools actually make good on their promises of innovative outside the box thinking to train business leaders who will put society ahead of money making Do they help society by making better business leaders No they don't Steven Conn asserts and what's more they never have In throwing down a gauntlet on the business of business schools Conn's Nothing Succeeds Like Failure examines the frictions conflicts and contradictions at the heart of these enterprises and details the way business schools have failed to resolve them Beginning with founding of the Wharton School in 1881 Conn measures these schools aspirations against their actual accomplishments and tells the full and disappointing history of missed opportunities unmet aspirations and educational mistakes Conn then poses a set of crucial questions about the role and function of American business schools The results aren't pretty Posing a set of crucial questions about the function of American business schools Nothing Succeeds Like Failure is pugnacious and controversial Deeply researched and fun to read Nothing Succeeds Like Failure argues that the impressive facades of business school buildings resemble nothing so much as collegiate versions of Oz Conn pulls back the curtain to reveal a story of failure to meet the expectations of the public their missions their graduates and their own lofty aspirations of producing moral and ethical business leaders

Why Ethnic Parties Succeed Kanchan Chandra, 2007-02-15 Why do some ethnic parties succeed in attracting the support of their target ethnic group while others fail In a world in which ethnic parties flourish in both established and emerging democracies alike understanding the conditions under which such parties rise and fall is of critical importance to both political scientists and policy makers Drawing on a study of variation in the

performance of ethnic parties in India this book builds a theory of ethnic party performance in patronage democracies Chandra shows why individual voters and political entrepreneurs in such democracies condition their strategies not on party ideologies or policy platforms but on a headcount of co ethnics and others across party personnel and among the electorate

Living It Up James B. Twitchell, 2003-07-02 From neighborhood supermarkets stocked with designer water to the exclusive boutiques of Madison Avenue this witty look at spending habits joins *Bobos in Paradise* and *Why We Buy* in capturing what drives the way consumers live and shop today *Sports, Narrative, and Nation in the Fiction of F. Scott Fitzgerald* Jarom McDonald, 2008-03-25 This study examines the ways that F Scott Fitzgerald portrayed organized spectator sports as working to help structure ideologies of class community and nationhood Situating the study in the landscape of late nineteenth early twentieth century American sport culture Chapter One shows how narratives of attending ballgames reading or listening to sports media and being a fan cultivate communities of spectatorship Adopting this same framework the next three chapters explore how Fitzgerald s literary representations of sport culture express the complexities of American society Chapter Two specifically considers the intense and dramatic spectacle of college football in *This Side of Paradise* as a means of exploring links between spectatorship emulation and ideology Chapter Three continues with college football as its theme but this time looks at how it is portrayed in Fitzgerald s short stories in order to scrutinize the relationship between the performative aspects of sport and the performative aspects of social class Finally Chapter Four scrutinizes how *The Great Gatsby* critiques the romantic nationalist ideology of America s game by revealing the class divisions and tensions of baseball s spectator culture *Demythologizing Educational Reforms* Arthur T. Costigan, Leslee Grey, 2014-08-21 There are dozens of myths surrounding educational reform today maintaining the school s role in economic competitiveness the deficiency of teachers the benefits of increased testing and the worthiness of privatization In this volume the editors argue that this discussion has been co opted to reflect the values and worldviews of special interest groups such as elites in power politicians corporate educational foundations and the media Prominent educational writers tackle contemporary issues such as neoliberalism suburban schooling charter schools and parental involvement They expose the logic behind the talk and critically examine these problematic beliefs to uncover meaningful improvements in education which are better grounded in the social economic political and educational realities of contemporary society **Shared Wisdom** Pamela Cooper-White, 2024-11-19 For twenty years clinical pastoral educators congregational caregivers chaplains pastoral psychotherapists and pastoral theologians have turned to Pamela Cooper White s *Shared Wisdom* to ground their teaching training and understandings of countertransference and how the use of the caregiver s self in turn impacts the relational dynamic between caregivers and care seekers Now Cooper White updates her groundbreaking book to present new insights on how understanding one s own emotional reactions remains a core competency for ministry With precision and depth Cooper White continues to innovate the theory and practice of spiritual care counseling and spiritual

psychotherapy This revised and expanded 20th anniversary edition explores current research on countertransference and intersubjectivity mutual influence and unconscious relationships and intercultural and interreligious dynamics in caring relationships Cooper White examines how the relational paradigm for pastoral assessment and theological reflection that she pioneered now has important implications for evolving types of care relationships As she does so she addresses emerging topics such as postcolonial theory spiritual and religious fluidity and gender diversity CPE supervisors pastoral care and counseling educators and practitioners pastoral theology scholars and psychotherapists looking for an in depth understanding of relationality and intersubjectivity will find the 20th anniversary edition of Shared Wisdom a must have resource to build and expand upon a core competency Divine Hierarchies Sean McCloud, 2009-01-05 Placing the neglected issue of class back into the study and understanding of religion Sean McCloud reconsiders the meaning of class in today's world More than a status grounded in material conditions says McCloud class is also an identity rhetorically and symbolically made and unmade through representations It entails relationships identifications boundaries meanings power and our most ingrained habits of mind and body He demonstrates that employing class as an analytical tool that cuts across variables such as creed race ethnicity and gender can illuminate American religious life in unprecedented ways Through social theory historical analysis and ethnography McCloud makes an interdisciplinary argument for reinserting class into the study of religion First he offers a new three part conception of class for use in studying religion He then presents a focused cultural history of religious studies by examining how social class surfaced in twentieth century theories of religious affiliation He concludes with historical and ethnographic case studies of religion and class Divine Hierarchies makes a convincing case for the past and present importance of class in American religious thought practice and scholarship
