Political Thought of Archie Mafeje Bongani Nyoka,2020-09-01 This comprehensive treatment of Archie Mafeje as a thinker and researcher analyses his overall scholarship and his role as a theoretician of liberation and revolutionary theory Social scientist Archie Mafeje who was born in the Eastern Cape but lived most of his scholarly life in exile was one of Africa's most prominent intellectuals This ground breaking work is the first of its kind to consider the entire body of Mafeje's oeuvre and offers a much needed engagement with his ideas The most inclusive and critical treatment to date of Mafeje as a thinker and researcher the book analyses his overall scholarship and his role as a theoretician of liberation and revolution Author Bongani Nyoka's main argument is that Mafeje's superb scholarship developed out of his experience as an oppressed black person and his early political education which merged with his university training to turn him into a formidable cutting edge intellectual force There are three main parts to the book Part I evaluates Mafeje's critique of the social sciences part II focuses on his work on land and agrarian issues in sub Saharan Africa and part III deals with his work on revolutionary theory and politics The book engages in the act of knowledge decolonisation making a unique contribution to South Africa's sociological historical and political studies Personal Identity, National Identity and International Relations William

Bloom,1990 Drawing on Freud Mead Erikson Parsons and Habermas William Bloom relates mass psychological processes to international relations The Role of the State in Development Processes Claude Auroi,2013-10-23 First Published in 1992 Bringing together papers from analysts from every continent edited by Claude Auroi this collection offers insight into the state's role and the challenges in researching its development The authors recognise the concerns among young nations focused on which type of state system would lead to an organised nation while acknowledging the two major symbols of discussion in the Western type of state and the Marxist state They argue points of commonality and thus analyse the qualifying adjective of state to suggest patterns and future discernments **Dimensions of Prejudice** Zak Cope,2008 This

book argues that unreasonable dogmatic beliefs are expressions of socially structured patterns of prejudice. Specifically, prejudice is explained as being produced and dispersed within the confines of the political structures governing the manner in which material human needs are created and met. Classifying various dimensions of prejudice: philosophical, epistemological, psychological, sociological, political, and cultural, the book conceptualises the relation between dogmatic thinking and these facets of human existence. Criticising and comparing a wide range of theories and factual data relating to the growth and expression of prejudice, the book is a theoretical discussion of problems surrounding the production of cultural norms, the psychological effects of filial systems and relations between the sexes, the constitution of modern capitalist society and elementary principles of political democracy. Drawing on feminism, whiteness studies, Marxist theories of racism and imperialism, psychoanalysis, critical theory, and cultural studies, the author examines the constraints placed upon individuals, groups, and nations, propensity for scientific and rational thinking.

Underdevelopment and the Transition to Socialism James H. Mittelman, 2013-09-24. Underdevelopment and the Transition to Socialism: Mozambique and Tanzania evaluates the promise and problems of socialism in the Third World by considering the political economies of Mozambique and Tanzania. The aim is to provide a basic account for Marxists and non-Marxists alike interested in alternative strategies of development in the Third World. It offers a materialist political economy approach that should be useful to an interdisciplinary group of scholars and practitioners. The book is organized into four parts: Part I maps out purposes and procedures; Part II on Mozambique is a factually grounded analysis of an initial conjuncture in the transition to socialism, the capture of state power by workers and peasants; Part III on Tanzania focuses on another vital step on the way to socialism, the nationalization of leading financial institutions and the attempt to place them under the aegis of the immediate producers; Part IV knits together the main strands of the foregoing analysis and ties them to the broad themes discussed at the beginning of this book.

The World Trade Organization and Food Security in West Africa Godwin S. Ichimi, 2024-06-25. This book explores the multilateral control of agro-economic spaces in West African developing countries through international trade spearheaded by the World Trade Organization's Agreement on Agriculture. Responding to growing food insecurity in the region, Ichimi here examines the web of intricacies in this arrangement by discussing some of the main international trade policies directly and indirectly impacting on food security in West Africa and critically engaging with empirical praxis as well as the theoretical underpinnings vis-à-vis multilateral strategies adopted for the amelioration of the crisis. In so doing, he exposes how multilateral trading agreements under the auspices of the World Trade Organization

produce negative outcomes for the food security status of a large and growing population in West Africa privileging primary commodity production and export maintaining the preference for food imports and driving the pattern of agricultural investment towards an inexorable dependence of the sector on the dictates of the international market Introduction to Critical Sociology George N. Katsiaficas, Robert George Kirkpatrick, Mary Lou Emery, 1987 **Class, Ideologies and Educational Futures** D Livingstone, 2012-05-16 This book provides a systematic and detailed analysis of class relations in advanced capitalist societies as a basis for understanding both class differences in educational practices and the relative effects of class and other social background factors on public attitudes toward education Secondly the book offers an empirically grounded summary of the contending educational ideologies in advanced capitalism through a discourse analysis of the public statements of spokes persons for major class groupings Thirdly using the data from several public opinion surveys in Ontario profiles of public attitudes on critical education issues are interpreted in terms of the actual effects of class and other social background factors as well as the mediating influences of contending ideologies Finally a general approach and array of tactics for creating practical alternative educational and social futures are illustrated through the book

The National Question Berch Berberoglu, 1995-08-29 This volume examines the volatile nature and complex dynamics of national movements and ethnic conflict around the world The Geography of Underdevelopment Dean Forbes, 2010-11-26 First published in 1984 this title discusses the emergence of both the orthodox and political economy based approaches to underdevelopment in geography critically assessing their strengths and weaknesses and showing the relationship between intellectual developments and changing material conditions The work is primarily concerned with theories though it does contain much empirical material drawn from throughout the Third World The book examines the emergence of theories of development historically and considers the various contemporary theoretical schools both Marxist and non Marxist It goes on to consider four aspects of development which are of particular interest to geographers namely the world economy regional imbalances the human nature theme and the analysis of urban space and concludes by suggesting some directions for future research Alternatives to Economic Orthodoxy Randy Albelda, 2016-07-08 Exploring the question of whether China s peasantry was a revolutionary force this volume pays particular attention to the first half of the 20th century when peasant based conflict was central to nationwide revolutionary processes It traces key themes of social conflict and peasant resistance **State and Society** John Gledhill, Barbara Bender, Mogens Trolle Larsen, 1995 The traditional Eurocentric view of state formation and the rise of civilization is challenged in this broad ranging book Bringing archaeological research into contact with the work of ethno historians and anthropologists it generates a discussion of fundamental concepts rather than a search for modern analogies for processes that occurred in the past Global Struggles and Social Change Christopher Chase-Dunn, Paul Almeida, 2020-09-22 Deftly demonstrates how the rise and fall of social movements throughout history is closely linked to economic and political developments In the early decades of the twenty

first century an international movement to slow the pace of climate change mushroomed across the globe The self proclaimed Climate Justice movement urges immediate action to reduce carbon emissions and calls for the adoption of bold new policies to address global warming before irreversible and catastrophic damage threatens the habitability of the planet On another front since the 1980s multiple waves of resistance have occurred around the world against the uneven transition from state led development to the neoliberal globalization project Both Climate Justice and Anti Austerity movements represent the urgency of understanding how global change affects the ability of citizens around the world to mobilize and protect themselves from planetary warming and the loss of social protections granted in earlier eras In *Global Struggles and Social Change* Christopher Chase Dunn and Paul Almeida explore how global change stimulates the formation and shape of such movements Contending that large scale economic shifts condition the pattern of social movement mobilizations around the world the authors trace these trends back to premodern societies revealing how severe disruptions of indigenous communities led to innovative collective actions throughout history Drawing on historical case studies world system and protest event analysis and social networks they also examine the influence of global change processes on local national and transnational social movements and explain how in turn these movements shape institutional shifts Touching on hot button topics including global warming immigrant rights protests the rise of right wing populism and the 2008 financial crisis the book also explores a broad range of premodern social movements from indigenous people in the Americas Mesopotamia and China The authors pay special attention to periods of disruption and external threats as well as the role of elites emotions charisma and religion or spirituality in shaping protest movements Providing sweeping coverage *Global Struggles and Social Change* is perfect for students and anyone interested in globalization international and comparative politics political sociology and communication studies

Theory is History Samir Amin, 2013-12-12 This book focuses on a central concept that Theory is History as the theory of capitalism can only be formulated on the basis of an analysis of its history In contrast bourgeois thinking replaces the analysis of historical capitalism with an abstract theory without any links to reality Economics which is the theory of an imaginary system then becomes an apologia intended to give legitimacy to the behaviour of the owners of capital The author pays special attention to the globalization of the law of value The individual chapters illustrate the author's thesis by focusing on the links between capital and land ownership between modernity and religious interpretation and on questions of the global expansion of capitalism particularly the ways it has evolved in certain countries in this case Russia and China This anthology supplements the author's previous work centred on the rise of the South his reading of capitalism focusing on its imperialist nature
