Kraemer, 1992 Under the enlightened rule of the Buyid dynasty 945 1055 A D the Islamic world witnessed an unequalled cultural renaissance This book is an investigation into the nature of the environment in which the cultural transformation took place and into the cultural elite who were its bearers After an extensive introductory section setting the stage the book deals with the main schools and circles and with the outstanding individual representatives of this renaissance The main expression of this renaissance was a philosophical humanism that embraced the scientific and philosophical heritage of Classical Antiquity as a cultural and educational ideal Along with this philosophical humanism a literary humanism was cultivated by litterateurs poets and government secretaries This renaissance was marked by a powerful assertion of individualism in the domains of literary creativity and political action It thrived in a remarkably cosmopolitan atmosphere Baghdad the center of the Abbasid empire and of Buyid rule *The classical heritage in Islam, tr* Franz Rosenthal, **A History of Islamic Societies** Ira M. Islamic Science and the Making of the European Renaissance George Saliba, 2011-01-21 The rise and fall of the Islamic scientific tradition and the relationship of Islamic science to European science during the Renaissance The Islamic scientific tradition has been described many times in accounts of Islamic civilization and general histories of science with most authors tracing its beginnings to the appropriation of ideas from other ancient civilizations the Greeks in particular In this thought provoking and original book George Saliba argues that contrary to the generally accepted view the foundations of Islamic scientific thought were laid well before Greek sources were formally translated into Arabic in the ninth century Drawing on an account by the tenth century intellectual historian Ibn al Naidm that is ignored by most modern scholars Saliba suggests that early translations from mainly Persian and Greek sources outlining elementary scientific ideas for the use of government departments were the impetus for the development of the Islamic scientific tradition He argues further that there was an organic relationship between the Islamic scientific thought that developed in the later centuries and the science that came into being in Europe during the Renaissance Saliba outlines the conventional accounts of Islamic science then discusses their shortcomings and proposes an alternate narrative Using astronomy as a template for tracing the progress of science in Islamic civilization Saliba demonstrates the originality of Islamic scientific thought He details the innovations including new mathematical tools made by the Islamic astronomers from the thirteenth to sixteenth centuries and offers evidence that Copernicus could have known of and drawn on their work Rather than viewing the rise and fall of Islamic science from the often narrated perspectives of politics and religion Saliba focuses on the scientific production itself and the complex social economic and intellectual conditions that made it possible

The Reconstruction of Religious Thought in Islam Muhammad Iqbal, 2013-05-22. The Reconstruction of Religious Thought in Islam (1930) is Muhammad Iqbal's major philosophic work, a series of profound reflections on the perennial conflict among science, religion, and philosophy, culminating in new visions of the unity of human knowledge, of the human spirit, and of God. Iqbal's thought contributed significantly to the establishment of Pakistan, to the religious and political ideals of the Iranian Revolution, and to the survival of Muslim identity in parts of the former USSR. It now serves as a new bridge between East and West and between Islam and the other Religions of the Book. With a new Introduction by Javed Majeed, this edition of The Reconstruction opens the teachings of Iqbal to the modern Western reader. It will be essential reading for all those interested in Islamic intellectual history, the renewal of Islam in the modern world, and political theory of Islam's relationship to the West.

The Graeco-Arabic Translation Movement El-Hussein A. Y. Aly, 2023-07-06. To encompass the history of Arabic practice of translation, this Element redefines translation as a combination of a process of meaning remaking that synthesizes multiple reality. The Arabic translators of the Middle Ages did not simply find an equivalent to the source text but combined its meaning with their own knowledge and experience. Thus, part of translating a text was to add new thought to it. It implies a complex process that Homi Bhabha calls cultural hybridity, in which the target text combines knowledge of the source text with knowledge from the target culture, and the source text is different from the target text without assumed or imposed hierarchy. Arabic translations were a cultural hybridity because the translators added new thought to their target texts and because they saw their language as equal to the Greek.

Late Ottoman Origins of Modern Islamic Thought Andrew Hammond, 2022-11-17 In this major contribution to Muslim intellectual history Andrew Hammond offers a vital reappraisal of the role of Late Ottoman Turkish scholars in shaping modern Islamic thought Focusing on a poet a sheikh and his deputy Hammond re evaluates the lives and legacies of three key figures who chose exile in Egypt as radical secular forces seized power in republican Turkey Mehmed Akif Mustafa Sabri and Zahid Kevseri Examining a period when these scholars faced the dual challenge of non conformist trends in Islam and Western science and philosophy Hammond argues that these men alongside Said Nursi who remained in Turkey were the last bearers of the Ottoman Islamic tradition Utilising both Arabic and Turkish sources he transcends disciplinary conventions that divide histories along ethnic linguistic and national lines highlighting continuities across geographies and eras Through this lens Hammond is able to observe the long neglected but lasting impact that these Late Ottoman thinkers had upon Turkish and Arab Islamist ideology
