The Social Psychology of Creativity Teresa M. Amabile, 2012-12-06 The ideas presented in this book have been incubating for over 25 years I was in the first grade I believe when the ideas that eventually developed into this social psychology of creativity first began to germinate The occasion was art class a weekly Friday afternoon event during which we were given small reproductions of the great masterworks and asked to copy them on notepaper using the standard set of eight Crayola crayons I had left kindergarten the year before with encouragement from the teacher about developing my potential for artistic creativity During these Friday afternoon exercises however I developed nothing but frustration Somehow Da Vinci s Adoration of the Magi looked wrong after I d finished with it I wondered where that promised creativity had gone I began to believe then that the restrictions placed on my artistic endeavors contributed to my loss of interest and spontaneity in art When as a social psychologist I began to study intrinsic motivation it seemed to me that this motivation to do something for its own sake was the ingredient that had been missing in those strictly regimented art classes It seemed that intrinsic motivation as defined by social psychologists might be essential to creativity My research program since then has given considerable support to that notion As a result the social psychology of creativity presented in this book gives prominence to social variables that affect motivational orientation

with what we have now come to call virtue ethics If so what is the relationship between those affinities and the more widely recognized influence of Karl Barth Moberly seeks to answer these questions through close analysis of the Ethics and engagement with other interpreters of Bonhoeffer while discussing the nature of virtue ethics in a Christian context The answers may be surprising but they are certainly rewarding for anyone wanting to better understand Bonhoeffer and to see how his work could be helpful for current ethical debates
