The Oxford History of Classical Reception in English Literature David Hopkins, Charles Martindale, Norman Vance, Rita Copeland, Patrick Cheney, Jennifer Wallace, Philip R. Hardie, 2012 The Oxford History of Classical Reception OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This fourth volume and second to appear in the series covers the years 1790 1880 and explores romantic and Victorian receptions of the classics Noting the changing fortunes of particular classical authors

and the influence of developments in archaeology aesthetics and education it traces the interplay between classical and nineteenth century perceptions of gender class religion and the politics of republic and empire in chapters engaging with many of the major writers of this period

Classical Traditions in Science Fiction Brett M. Rogers, Benjamin Eldon Stevens, 2015 For all its concern with change in the present and future science fiction is deeply rooted in the past and surprisingly engages especially deeply with the ancient world Indeed both as an area in which the meaning of classics is actively transformed and as an open ended set of texts whose own classic status is a matter of ongoing debate science fiction reveals much about the roles played by ancient classics in modern times Classical Traditions in Science Fiction is the first collection in English dedicated to the study of science fiction as a site of classical receptions offering a much needed mapping of that important cultural and intellectual terrain This volume discusses a wide variety of representative examples from both classical antiquity and the past four hundred years of science fiction beginning with science fiction's rosy fingered dawn and moving toward the other worldly literature of the present day As it makes its way through the eras of science fiction Classical Traditions in Science Fiction exposes the many levels on which science fiction engages the ideas of the ancient world from minute matters of language and structure to the larger thematic and philosophical concerns

Revivals of Classical Drama in Greece and Spain (1860s-1970s) Vasileios Balaskas, 2025-02-03 Vasileios Balaskas explores the revival of classical drama at ancient venues as a sociopolitical apparatus of the European nation states in the nineteenth and twentieth centuries The modern use of Graeco Roman theatres odeons amphitheatres and stadiums depended on social or artistic influences and interconnections In particular the Spanish and Greek cases developed in parallel and addressed similar sociopolitical concepts while the Italian example served as a model for their theatrical tradition in the first decades of the twentieth century In theatrical terms this book argues that the repertoire and orientation of classical drama were influenced by international artistic trends while power relations among theatrical directors actors and actresses companies and institutions determined the course of these artistic traditions Staging classical drama in Greece and Spain transformed Graeco Roman venues into sociopolitical powerhouses that generated collective narratives theatrical modernization and economic development Despite the distinct degree of ideological engagement with classical culture political conditions in Greece and Spain during the nineteenth and twentieth centuries offer a space for reflection and critical comparison In this context this study discusses how historical realities led to the staging of classical drama at Graeco Roman venues and how each country appropriated and showcased this classical heritage as sociopolitical capital
