Classics Of Western Thought The Ancient:

Classics of Western Thought: The ancient world, H. S. Nulle, ed.- v. 2. Middle ages, renaissance, and reformation, K. F. Thompson, ed.- v. 3. The modern world, C. Hirschfeld, ed ,1964 **Classics of Western Thought** Stebelton Nulle,1968 Classics of Western Thought ,1964 *A Social History of Western Political Thought* Ellen Meiksins Wood,2022-08-30 In this groundbreaking work Ellen Meiksins Wood rewrites the history of political theory from Plato to Rousseau Treating canonical thinkers as passionately engaged human beings Wood examines their ideas not simply in the context of political languages but as creative responses to the social relations and conflicts of their time and place She identifies a distinctive relation between property and state in Western history and shows how the canon while largely the work of members or clients of dominant classes was shaped by complex interactions among proprietors labourers and states Western political theory Wood argues owes much of its vigour and also many ambiguities to these complex and often contradictory relations In the first volume she traces the development of the Western tradition from classical antiquity through to the Middle Ages in the perspective of social history a significant departure not only from the standard abstract history of ideas but also from other contextual methods From the Ancient Greek polis of Plato Aristotle Aeschylus and Sophocles through the Roman Republic of Cicero and the Empire of St Paul and St Augustine to the medieval world of Averroes Thomas Aquinas and William of Ockham Wood offers a rich dynamic exploration of thinkers and ideas that have indelibly stamped our modern world In the second volume Wood addresses the formation of the modern state the rise of capitalism the Renaissance and Reformation the scientific revolution and the Age of Enlightenment which have all been attributed to the early modern period Nearly everything about its history remains controversial but one thing is certain it left a rich and provocative legacy of political ideas unmatched in Western history The concepts of liberty equality property human rights and revolution born in those turbulent centuries continue to shape and to limit political discourse today Assessing the work and background of figures such as Machiavelli Luther Calvin Spinoza the Levellers Hobbes Locke and Rousseau Ellen Wood vividly explores the ideas of the canonical thinkers not as philosophical abstractions but as passionately engaged responses to the social conflicts of their day *Classical Influences on Western Thought A.D. 1650-1870* R. R. Bolgar,2010-06-10 This volume examines the progress of classical studies to the general history of ideas from 1650 to 1870

Divine Creation in Ancient, Medieval, and Early Modern Thought ,2007-03-31 Throughout his academic career Robert Crouse has insisted that the patristic and medieval philosophical and theological traditions which have so profoundly shaped western culture cannot be understood apart from the subtle and complex dialogue between Christianity and Hellenic culture out of which these traditions emerged In this volume in Father Crouse s honour twenty two eminent scholars from across North America and Europe examine various moments within the emergence of the doctrine of creation in the patristic and medieval periods the Hebraic and Hellenic pre history of this movement as well as modern reactions to the partristic and

medieval syntheses Student and specialist alike will appreciate not only the depth of scholarly research clearly evident in the individual essays but also the broad scope of the volume as a whole Contributors include Stephen Andrews Stephen F Brown Mary T Clark RSCJ Kevin Corrigan Lawrence Dewan Robert Dodaro OSA Wayne J Hankey Walter A Hannam Michael Harrington Paige E Hochschild Dennis House Edouard Jeaneau Angus Johnston Torrance Kirby Terence J Kleven Marguerite Kussmaul Matthew L Lamb D Gregory MacIsaac Ralph McNerny Luca Obertello Willemien Otten Neil G Robertson Horst Seidl and Michael Treschow *Reorientations of Western Thought from Antiquity to the Renaissance* F. Edward Cranz, Nancy Struever, 2024-10-28 The previous Variorum collection of studies by the late F Edward Cranz focused specifically on Nicholas of Cusa The present selection has an equally clear focus but a far broader scope it brings together materials on his major thesis of a fundamental reorientation of the categories of thought in the Latin West c 1100 AD a thesis that dominated his work from the 1960s onwards The volume differs from the usual Variorum collection in that much of the material is hitherto unpublished distributed only in samizdat form to Cranz s friends and colleagues Nancy Struever has collated and edited the versions of these papers and supplied the necessary annotation for his references It includes too some of the research related to his editions of the Late Antique Aristotelian commentator Alexander Aphrodisiensis and his early research on the reception of Classical and early Christian political thought demonstrating the pertinence of this to the reorientation thesis Cranz s argument centering on Anselm s reading of Augustine and Abelard s of Boethius but dealing with Renaissance and Reformation figures such as Petrarch and Valla Cusanus and Luther Nifo and Zabarella claims a reorientation in speculative genres of the most basic premises of the relations of mind language and reality Cranz s meticulous close readings of the texts make the case that the reorientation was so deep and thorough as to problematise our modern readings of Hellenic thinkers such as Aristotle and so radical as to be almost invisible to the Medieval and post Medieval thinkers The definitions and distinctions of thematics in this collection are of intrinsic interest then to Classical and Late Antique Medieval Renaissance and Early Modern intellectual historians Indeed Cranz s work vindicates serious intellectual historical inquiry as indispensable to our understanding of the basic motives and accomplishments of the culture of Pre Modernity

International Relations and

Non-Western Thought Robbie Shilliam, 2010-09-13 International Relations as a discipline tends to focus upon European and Western canons of modern social and political thought Alternatively this book explores the global imperial and colonial context within which knowledge of modernity has been developed The chapters sketch out the historical depth and contemporary significance of non Western thought on modernity as well as the rich diversity of its individuals groups movements and traditions The contributors theoretically and substantively engage with non Western thought in ways that refuse to render it exotic to superfluous to or derivative of the orthodox Western canon of social and political thought Taken as a whole the book provides deep insights into the contested nature of a global modernity shaped so fundamentally by Western colonialism and imperialism Now as ever these insights are desperately needed for a discipline that is so closely implicated in Western foreign policy making and yet retains such a myopic horizon of inquiry This work provides a significant contribution to the field and will be of great interest to all scholars of politics political theory and international relations theory

A New History of Western Philosophy Anthony Kenny, 2012-08-16 This book is no less than a guide to the whole of Western philosophy the ideas that have undergirded our civilization for two and a half thousand years Anthony Kenny tells the story of philosophy from ancient Greece through the Middle Ages and the Enlightenment into the modern world He introduces us to the great thinkers and their ideas starting with Plato Aristotle and the other founders of Western thought In the second part of the book he takes us through a thousand years of medieval philosophy and shows us the rich intellectual legacy of Christian thinkers like Augustine Aquinas and Ockham Moving into the early modern period we explore the great works of Descartes Hobbes Locke Leibniz Spinoza Hume and Kant which remain essential reading today In the nineteenth and twentieth centuries Hegel Mill Nietzsche Freud and Wittgenstein again transformed the way we see the world Running through the book are certain themes which have been constant concerns of philosophy since its early beginnings the fundamental questions of what exists and how we can know about it the nature of humanity the mind truth and meaning the place of God in the universe how we should live and how society should be ordered Anthony Kenny traces the development of these themes through the centuries we see how the questions asked and answers offered by the great philosophers of the past remain vividly alive today Anyone interested in ideas and their history will find this a fascinating and stimulating read

Judaism as Philosophy Jacob Neusner, 2004-06-15 The Mishnah is the first canonical writing of Judaism

after the Hebrew Scriptures of ancient Israel the Old Testament and the foundation of the two Talmuds and of all Judaism thereafter According to eminent religion scholar Jacob Neusner the key to understanding the Mishnah is to read it as philosophy in accord with the generally accepted understanding of philosophy in its time and place In Judaism as Philosophy Neusner studies a large sample of evidence meticulously translated and carefully explained and identifies the philosophical side of the Mishnah s system method and message alike The philosophical tradition in which the Mishnah takes its place Neusner explains utilizes the Aristotelian method of hierarchical classification to demonstrate the proposition important to Middle Platonism and profoundly expressed by Plotinus that many things really form a single thing many species a single genus many genera an encompassing well crafted and cogent whole Through the systematic and orderly hierarchical classification of the things of nature the framers of the Mishnah illustrate the ultimate unity of all being emanating from the One on high Arguing that the document s writers chose a legal form for a philosophical proposition this book completely changes a centuries old way of reading the Mishnah Judaism emerges as a sustained demonstration of the unity of all being under one God

Concepts of Philosophy in Asia and the Islamic World Raji C. Steineck, Ralph Weber, Robert Gassmann, Elena Lange, 2018-05-07 The contributions to Concepts of Philosophy in Asia and the Islamic World reflect upon the problems implied in the received notions of philosophy in the respective scholarly literatures They ask whether and for what reasons a text should be categorized as a philosophical text or excluded from the canon of philosophy and what this means for the concept of philosophy The focus on texts and textual corpora is central because it makes authors expose their claims and arguments in direct relation to specific sources and discourages generalized reflections on the characteristics of for example Japanese culture or the Indian mind The volume demonstrates that close and historically informed readings are the sine qua non in discussing what philosophy is in Asia and the Islamic world just as much as with regard to Western literature Contributors are Yoko Arisaka Wolfgang Behr Thomas Fr hlich Lisa Indraccolo Paulus Kaufmann Iso Kern Ralf M ller Gregor Paul Lisa Raphals Fabian Sch fer Ori Sela Rafael Suter Christian Uhl Viatcheslav Vetrov Yvonne Schulz Zinda and Nicholas Zufferey

Religious Liberty in Western Thought Noel B. Reynolds, W. Cole Durham, 2003 This is a print on demand book and is therefore non returnable In this volume several leading scholars harvest the best of Western thinking on religious liberty An opening chapter shows how religious liberty emerged slowly in the West through centuries of cruel experience and growing enlightenment Separate chapters thereafter take up the unique role of such titans as Marsilius Luther Calvin Hobbes Locke Rousseau Burke Tocqueville and the American framers in the Western drama of religious liberty From widely divergent experiences these titans discovered the cardinal principles of religious liberty religious pluralism and toleration religious equality and non discrimination liberty of conscience and association freedom of expression and exercise From widely discordant convictions they distilled the most enduring models of church and state and of religion and law in the West from the organic models of earlier centuries to the dualistic models of more recent times Contributors Brian Tierney
